This volume provides the first comprehensive investigation of the Netherlands in the World Englishes paradigm. It explores the history of English contact, the present spread of English and attitudes towards English in the Netherlands. It describes the development and analysis of the Corpus of Dutch English, the first Expanding Circle corpus based on the design of the International Corpus of English. In addition, it investigates the applicability of Schneider's (2003, 2007) Dynamic Model, concluding that this and other such models need to move away from a colonisation-driven approach and towards a globalisation-driven one to explain the continued spread and evolution of English today.

The volume will be highly relevant to researchers interested in the status and use of English in the Netherlands. More broadly, it provides a timely contribution to the debate on the relevance of the World Englishes framework for non-native, non-postcolonial settings such as Continental Europe.

analysis, ensuring that this book is lively, accessible and approachable. The full scope of the sports economy is examined, covering the three main arenas in which sport takes place - mass participation, professional sports and sports events. The key elements of the economic representation of these three markets are considered, such as the underlying demand for and supply of these sports, together with the main policy issues affecting them. Whilst truly international in scope, it focuses particularly on specific comparisons between the US, the UK and mainland Europe. The breadth of discussion and international emphasis is brought to life by a detailed discussion of the evidence throughout the book to illustrate the key themes discussed - ideal for both lecturer and student. Knowledge production and knowledge transfer from science to industry as well as between different national communities of resource users are very important in the Arctic as is transfer of legitimacy. All these fields might give opportunities for future research. The different contributions in this book try to answer some of these questions.

The Power of Design offers an introduction and a practical guide to product innovation, integrating the key topics that are necessary for the design of sustainable and energy-efficient products using sustainable energy technologies. Product innovation in sustainable energy technologies is an interdisciplinary field. In response to its growing importance and the need for an integrated view on the development of solutions, this text addresses the functional principles of various energy technologies next to the latest design processes and innovation methods. From the perspective of product applications, the

Chemistry seeks to provide qualitative and quantitative explanations for the observed behaviour of elements and their compounds. Doing so involves making use of three types of representation: the macro (the empirical properties of substances); the sub-micro (the natures of the entities giving rise to those properties); and the symbolic (the number of entities involved in any changes that take place). Although understanding this triplet relationship is a key aspect of

chemical education, there is considerable evidence that students find great difficulty in achieving mastery of the ideas involved. In bringing together the work of leading chemistry educators who are researching the triplet relationship at the secondary and university levels, the book discusses the learning involved, the problems that students encounter, and successful approaches to teaching. Based on the reported research, the editors argue for a coherent model for understanding the triplet relationship in chemical education. BACOMET cannot be evaluated solely on the basis of its publications. It is important then that the reader, with only this volume on which to judge both the BACOMET activities and its major outcome to date,

Access Free Pincode Vwo 2 Antwoorden

should know some thing of what preceded this book's publication. For it is the story of how a group of educators, mainly tutors of student-teachers of mathematics, committed themselves to a continuing period of work and self-education. The concept of BACOMET developed during a series of meetings held in 1978-79 between the three editors, Bent Christiansen, Geoffrey Howson and Michael Otte, at which we expressed our concern about the contributions from mathematics education as a discipline to teacher education, both as we observed it and as we participated in it. The short time which was at the teacher-educator's disposal, allied to the limited knowledge and experience of the students on which one had to build, raised puzzling problems concerning

priorities and emphases. The recognition that these problems were shared by educators from many different countries was matched by the fact that it would be fruitless to attempt to search for an internationally (or even nationally) acceptable solution to our problems. Different contexts and traditions rule this out.

Sinners and Citizens explores how sexual habits changed in Sweden during its development from an agrarian society into a modern welfare state. Jens Rydström examines the history of homosexuality and bestiality in that country to consider why these sexual practices have been so closely linked in virtually all Western societies. He limns sharply the distinctive experience of rural life, showing that

Access Free Pincode Vwo 2 Antwoorden

to regularly witness farm animals stirred passions and sparked ideas, especially among young farmhands. Based on medical journals, psychiatric reports, and court records from the period, as well as testimonies from men in diaries, letters, and interviews, Sinners and Citizens reveals that bestiality was once a dreaded crime in Sweden. But in time, mention of the practice disappeared completely from legal and medical debates. This, Rydström contends, is because models of penetrative sodomy shifted from bestiality to homosexuality as Sweden transformed from a rural society into a more urban one. As the nation's economy and culture became less identified with the countryside, so too did its idea of deviant sexual behavior.

How national culture impacts organizational culture—and business success Using extensive case studies of successful global corporations, this book explores the impact of national culture on the corporate strategy and its execution, and through this ultimately business success—or failure. It does not argue that different cultures lead to different business results, but that all cultures impact organizations in ways both positive and negative, depending on the business cycle, the particular business, and the particular strategies being pursued. Depending on all of these factors, cultural dynamics can either enable or derail performance. But recognizing

those cultural factors is difficult for business leaders; like everyone else, they too can be blind to the culture of which they are a part. The book offers managers and leaders eight recommendations for recognizing those cultural factors that negatively impact performance, as well as those that can be harnessed to encourage superior performance. With real case studies from companies in Asia, Europe, and the United States, this book offers a truly global approach to organizational culture. Offers a fresh approach to the effects of national culture on organizational culture that is applicable to any country in any region Based on case studies of such companies as Toyota, Samsung, General Motors, Nokia, Walmart, Kone and British Leyland It describes the origins and nature of the most common

A gripping wilderness adventure and survival story It was getting colder. Johnny pulled the fur-lined hood of his parka over his head and walked towards his own cabin with the sound of snow crunching beneath his boots. "He should be back tomorrow," he thought, as a star raced across the sky just below the North Star. "He should be back tomorrow for sure." Seventeen-year-old Johnny Least-Weasel knows that his grandfather Albert is a stubborn old man and won't stop checking his own traplines even though other men his age stopped doing so years ago. But Albert Least-Weasel has been running traplines in the Alaskan wilderness alone for the past sixty years. Nothing has ever
