"Gender Matters' is a manual aimed to assist educators and youth leaders work on issues of gender and gender-based violence with young people. This publication presents theoretical information, methods and resources for education and training activities, along with concrete exercises that users can put into practice in their daily work. Violence is a serious issue which directly affects the lives of many young people. It often results in lasting damage to their well-being and integrity, putting even their lives at risk. Gender-based violence, including violence against women, remains a key human rights challenge in contemporary Europe and in the world. Working with young people on human rights education is one way of preventing gender-based violence from occurring. By raising awareness on why and how it manifests and exploring its impact on people and in society, gender-based violence will no longer go undetected. Gender really does matter, to women, to men, to young people - to all of us. This manual serves to explore these human rights issues and act upon them."--Book jacket.

An in-depth treatment in two volumes of the historical and cultural contexts of rape and rape culture, this set discusses both victims and perpetrators internationally during war and peace times and examines the treatment of survivors. • Includes case studies on a variety of sexual assault survivors in environments ranging from college campuses to war zones • Integrates the expertise of contributors, who include both academics and activists on sexual violence in different parts of the world • Represents, through case studies, incidents of rape in countries from Africa to Europe and from Asia to the United States • Compares "rape cultures" across the world

How can schools and the school curriculum contribute to building democratic citizens? This is a major question posed by governments, educational systems, schools, teachers and researchers around the world. One important way is to identify the competences needed for preparing democratic citizens and incorporate these within both the formal and informal school curriculum. Another question must then be posed- what competences do young citizens need to be considered as active and engaged in modern democracies? In 2011 an invited research symposium of leading civic and political educators, and social scientists from across Europe met in Hannover, Germany to consider this key concern facing Europe today. In examining the above questions the symposium addressed two significant issues: 1. Identify key competencies required for active citizenship of young people in Europe of the future. 2. Translate those competencies to school-based activities in the form of curricular and pedagogical strategies. The publication Civic Education and Competences for Engaging Citizens in Democracies addressed the first issue and this volume addresses the second issue. Through discussion in the invited symposium, previously prepared papers, and participation in a modified Delphi Technique the participants have prepared chapters for this book. The chapters of this book represent the contribution of the participants before, during and after the symposium with opportunities for review and reflection about competences for democratic citizenship and the role of schools and the curriculum. Murray Print and Dirk Lange are professors from the University of Sydney and Leibniz University of Hannover respectively and are national leaders in civics and citizenship education in their respective countries. They have brought together a group of leading European civic and citizenship educators from different academic fields to explore the key issue and to identify the competences for young people to become active and engaged European citizens.

A Novel

There are a wide range of variables for actuaries to consider when calculating a motorist's insurance premium, such as age, gender and type of vehicle. Further to these factors, motorists' rates are subject to experience rating systems, including credibility mechanisms and Bonus Malus systems (BMSs). Actuarial Modelling of Claim Counts presents a comprehensive treatment of the various experience rating systems and their relationships with risk classification. The authors summarize the most recent developments in the field, presenting ratemaking systems, whilst taking into account exogenous information. The text: Offers the first self-contained, practical approach to a priori and a posteriori ratemaking in motor insurance. Discusses the issues of claim frequency and claim severity, multi-event systems, and the combinations of deductibles and BMSs. Introduces recent developments in actuarial science and exploits the generalised linear model and generalised linear mixed model to achieve risk classification. Presents credibility mechanisms as refinements of commercial BMSs. Provides practical applications with real data sets processed with SAS software.

Actuarial Modelling of Claim Counts is essential reading for students in actuarial science, as well as practicing and academic actuaries. It is also ideally suited for professionals involved in the insurance industry, applied mathematicians, quantitative economists, financial engineers and statisticians.

This book is basic starting point for students and practitioners of law and anyone else who wishes to learn more about the elaborate system of international norms and accompanying mechanisms that have been developed to protect individuals' human rights. It is written so as to benefit the seasoned professional as well as the casual lay reader.

The social lives of the peoples of the Balkans have long stimulated the imaginations of their northern European neighbors. These peoples and places have anthropological traditions of their own, shaped initially by nationalist movements and, later, by socialism and other political constraints. From an anthropological perspective, this book explores the region between Greece and Slovenia, when political pressures were strongest in the era of the Cold War. Yet, the environments were by no means uniformly repressive. The study provides indispensable insights for new generations pursuing innovative research agendas in this region in the new century. It raises deeper issues about the boundaries and substance of the anthropological endeavor. (Series: Halle Studies in the Anthropology of Eurasia - Vol. 29)

Rape Cultures and Survivors: An International Perspective [2 volumes]

In essays covering everything from art and common sense to charisma and constructions of the self, the eminent cultural anthropologist and author of The Interpretation of Cultures deepens our understanding of human societies through the intimacies of "local knowledge." A companion volume to The Interpretation of Cultures, this book continues Geertz's exploration of the meaning of culture and the importance of shared cultural symbolism. With a new introduction by the author.

It is one of the more surprising facts about Old England that one can still find families living in the same houses their ancestors built centuries before and on land that has belonged to them since before the Norman Conquest. The Groves of Grope Hall are one such family.... The Groves are an old English family based in Northumberland, separated from the rest of society and as eccentric as they come. It is a line dominated by strong-willed and oversexed women, determined to produce more female heirs regardless of whether their desired partners are willing ... At the dawn of the new millennium, timid and gormless teenager Esmond is abducted and lured to Grope Hall by a descendant of the Groves. Young Esmond is powerless to escape, and his kidnap sets in motion a stream of farcical events that will have readers laughing out loud. Tom Sharpe's trademark humour abounds in this new novel, marking him out once again as an outstanding and unique British storyteller.

The architecture of the human language faculty has been one of the main foci of the linguistic research of the last half century. This branch of linguistics, broadly known as Generative Grammar, is concerned with the formulation of explanatory formal accounts of linguistic phenomena with the ulterior goal of gaining insight into the properties of the 'language organ'. The series comprises high quality monographs and collected volumes that address such issues. The topics in this series range from phonology to semantics, from syntax to information structure, from mathematical linguistics to studies of the lexicon.

When it was first published in the author's native country, THE PALACE OF DREAMS was immediately banned. The novel revolves around a secret ministry whose task is not just to spy on its citizens, but to collect and interpret their dreams. An entire nation's unconscious is thus tapped and meticulously laid bare in the form of images and symbols of the dreaming mind.

Bulgaria and Serbia during socialism are outlined from many different points of view in this volume. Beyond local and personal trajectories the authors illuminate more general and comparative questions. Was there anything like a "socialist anthropology", common to all three countries? Did Soviet and/or Marxist influences, in the discipline and in society in general, penetrate so deeply as to form an unavoidable common denominator of anthropological practice? The answers turn out to be complex and subtle. While unifying ideological forces were very strong in the 1950s, diversity increased thereafter. Anthropology was entangled with national ideology in all three countries, but the evidence nonetheless calls for "polyphonic" interpretations.

Using cultural anthropology to analyze debates that reverberate throughout the human sciences, George E. Marcus and Michael M. J. Fischer look closely

at cultural anthropology's past accomplishments, its current predicaments, its future direction, and the insights it has to offer other fields of study. The result is a provocative work that is important for scholars interested in a critical approach to social science, art, literature, and history, as well as anthropology. This second edition considers new challenges to the field which have arisen since the book's original publication.

Father Goriot is one of French novelist Honore de Balzac's most important pieces of writing. Three lives intertwine in Paris: an old man, a criminal and a law student. The novel evokes an unstable period in France, when many were desperate to climb the social ladder into the upper classes, and it questions social institutions such as marriage. The city is an important presence in this work. Balzac was both praised and censured for his realistic portrayal of city life.

This strategic report is Europol's flagship product providing information to Europe's law enforcement community and decision-makers about the threat of serious and organised crime to the EU. The SOCTA is the cornerstone of the multiannual policy cycle established by the EU in 2010. This cycle ensures effective cooperation between national law enforcement agencies, EU institutions, EU agencies and other relevant partners in the fight against serious and organised crime. Building on the work of successive EU organised crime threat assessments (OCTA), produced between 2006 and 2011, and in line with a new methodology developed in 2011 and 2012, this is the inaugural edition of the SOCTA.

Digital citizenship competences define how we act and interact online. They comprise the values, attitudes, skills and knowledge and critical understanding necessary to responsibly navigate the constantly evolving digital world, and to shape technology to meet our own needs rather than to be shaped by it. The Digital citizenship education handbook offers information, tools and good practice to support the development of these competences in keeping with the Council of Europe's vocation to empower and protect children, enabling them to live together as equals in today's culturally diverse democratic societies, both on- and offline. The Digital citizenship education handbook is intended for teachers and parents, education decision makers and platform providers alike. It describes in depth the multiple dimensions that make up each of 10 digital citizenship domains, and includes a fact sheet on each domain providing ideas, good practice and further references to support educators in building the competences that will stand children in good stead when they are confronted with the challenges of tomorrow's digital world. The Digital citizenship education handbook is consistent with the Council of Europe's Reference Framework of Competences for Democratic Culture and compatible for use with the Internet literacy handbook. (Box of 25 sheets)

Democracy and the Organization of Political Parties, originally published in 1902, represented the first serious attempt to analyze the consequences of democratic suffrage by a comparative analysis of political systems. As such, Ostrogorski's two-volume study of the party system in Britain and the United States exerted profound influence on the subsequent writings of Max Weber and Robert Michels. A descriptive analyst of the party system in these two countries, Ostrogorski developed concepts and methods that anticipated by nearly half a century those later used by American and British political scientists. The core of Ostrogorski's analysis is a detailed history of the rise of and changes within the party system in Britain and the United States, the first nations to introduce mass suffrage. While the emphasis of Democracy and the Organization of Political Parties is on the similar trends in the political parties of both countries, Ostrogorski also showed concern with the sources of differences between them. Seeking to explain these variations, he suggested a number of fundamental hypotheses about these two societies that continue to be of relevance today. Lipset's substantial introduction places Ostrogorski's work within its historical context and assesses Ostrogorski's impact and influence on both his contemporaries and on later political scientists.

The digital world, its advertising machinery and the popular media are pushing women back into traditional roles and once again creating a "superior" hypermacho expert male. Women must look critically at who is in charge of the new technology and challenge the gender codes that can work against them. In this path-breaking book, Melanie Stewart Millar explores power relations in the digital world and asks us to question what is really going on. How is technology shaping our future? What is the role of women within digital culture? What is the corporate agenda? How is it influencing women's work? Provocative and incisive, Cracking the Gender Code questions how the gains women have made through feminism over the last decades are being eroded. It looks specifically at how the articles and images of Wired, the magazine of the digital generation, are detrimental to women -- a discourse that may be establishing the underlying ideology of a far-reaching communications industry. Stewart Millar argues that simply being computer literate or knowing how to use the Net is not good enough. Women need to demystify the technology and crack the gender code to participate equally in the cyber world of the future.

It has been 80 years since the subject of bacterial adhesion to surfaces was first brought forth, but only in the last two decades has the importance of this subject been recognized by medical microbiologists. The fact that bacterial attachment to the host tissue is a prerequisite for infection understandably led to the hope that infections could be prevented by blocking the adhesion of pathogenic bacteria. Progress in this field has been so rapid that it has become difficult to keep up with recent developments. This book contains the proceedings of the symposium on the Molecular Mechanisms of Microbial Adhesion, May 6-8, 1988. Both the symposium and this book were intended as an up-to-date review of the most recent findings concerning the adhesion of medically important bacteria. In addition, this book contains critical and provocative overviews of the past, present and future of this field.

This second edition expands the first chapters, which focus on the approach to risk management issues discussed in the first edition, to offer readers a better understanding of the risk management process and the relevant quantitative phases. In the following chapters the book examines life insurance, non-life insurance and pension plans, presenting the technical and financial aspects of risk transfers and insurance without the use of complex mathematical tools. The book is written in a comprehensible style making it easily accessible to advanced undergraduate and graduate students in Economics, Business and Finance, as well as undergraduate students in Mathematics who intend starting on an actuarial qualification path. With the systematic inclusion of practical topics, professionals will find this text useful when working in insurance and pension related areas, where investments, risk analysis and financial reporting play a major role.

In the mid-1930s, two Irish Americans travel to the Albanian highlands with an early model of a marvelous invention, the tape recorder. Their mission? To discover how Homer could have composed works as brilliant and as long as The Iliad and The Odyssey without ever putting pen to

paper. The answer, they believe, can be found only in Albania, the last remaining habitat of the oral epic. But immediately upon their arrival, the scholars' seemingly arcane research excites suspicion and puts them at the center of ethnic strife in the Balkans. Mistaken for foreign spies, they are placed under surveillance and are dogged by gossip and intrigue. It isn't until a fierce-eyed monk from the Serbian side of the mountains makes his appearance that the scholars glimpse the full political import of their search for the key to the Homeric question.

Language Awareness in the Classroom addresses the central educational question of the impact that explicit language knowledge has on learning and language learning. A substantial Introduction defines the issues and key concepts and relates them to contemporary educational policy and practice in Europe and internationally. The papers are organised into four thematic sections: the extent and nature of language awareness in teacher education; school-based language awareness programmes; tertiary education initiatives and modes of evaluation of language awareness programmes.

From Ismail Kadare, winner of the inaugural Man Booker International Prize – a novelist in the class of Coetzee, Pamuk, Márquez, and Rushdie – the stunning new translation of one of his major works. In the early fifteenth century, as winter falls away, the people of Albania know that their fate is sealed. They have refused to negotiate with the Ottoman Empire, and war is now inevitable. Soon enough, dust kicked up by Turkish horses is spotted from a citadel. Brightly coloured banners, hastily constructed minarets, and tens of thousands of men fill the plain below. From this moment on, the world is waiting to hear that the fortress has fallen. The Siege tells the enthralling story of the weeks and months that follow – of the exhilaration and despair of the battlefield, the constantly shifting strategies of war, and those whose lives are held in the balance, from the Pasha himself to the artillerymen, astrologer, blind poet, and harem of women who accompany him. "Believe me," the general said. "I've taken part in many sieges but this," he waved towards the castle walls, "is where the most fearful carnage of our times will take place. And you surely know as well as I do that great massacres always give birth to great books. You really do have an opportunity to write a thundering chronicle redolent with pitch and blood, and it will be utterly different from the graceful whines composed at the fireside by squealers who never went to war." Brilliantly vivid, as insightful as it is compelling, The Siege is an unforgettable account of the clash of two great civilisations, and a portrait of war that will resonate across the centuries.
