

## Pyongyang 1071

*Entre humour et cynisme, Jacky Schwartzmann nous fait le récit de son immersion en Corée du Nord lors de sa participation à l'improbable marathon de Pyongyang. Rien n'était gagné. Il fallut franchir l'étape de la sélection, affronter les réactions - de l'éclat de rire à la quasi-hostilité -, puis se préparer à passer les frontières de la dernière dictature communiste à l'œuvre... pour courir 42 kilomètres. Numéro de dossard : 1071. Dans son style imparable, alternant humour et cynisme, Jacky Schwartzmann cherche à comprendre ce qui pousse des individus venus du monde entier (les Américains mis à part) à participer à l'événement sportif le plus abracadabrant de la planète : le marathon de Pyongyang. Entre rêve fou, défi sportif et envie irraisonnée, il raconte un voyage durant lequel il fut aussi bien désorienté qu'émerveillé ou exaspéré, mais constamment surveillé, et allie émotion et curiosité pour nous proposer une immersion dans un pays fermé qui lui a ouvert ses portes...*

In *Unbound in War?*, Sean Richmond examines the influence and

interpretation of international law in the use of force by two important but understudied countries, Canada and Britain, during two of the most

significant conflicts since 1945, namely the Korean War and the Afghanistan Conflict. Through innovative application of sociological theories in International Relations (IR) and International Law (IL), and rigorous qualitative analysis of declassified documents and original interviews, the book advances a two-pronged argument. First, contrary to what some dominant IR perspectives might predict, international law can play four underappreciated roles when states use force. It helps constitute identity, regulate behaviour, legitimate certain actions, and structure the development of new rules. However, contrary to what many IL approaches might predict, it is unclear whether these effects are ultimately attributable to an obligatory quality in law. This ground-breaking argument promises to advance interdisciplinary debates and policy discussions in both IR and IL.

Hailed as "the world's preacher," Billy Graham has enjoyed a career that has spanned more than six decades and his ministry of

faith has touched the hearts and souls of millions. In *Just As I Am* Graham reveals his life story in what the Chicago Tribune calls "a disarmingly honest autobiography." Now, in this revised and updated edition we hear from this "lion in winter" (Time) on his role over the past ten years as America's pastor during our national crisis of the Oklahoma bombing and 9/11; his knighthood; his passing of the torch to his son, Franklin, to head the organization that bears his name; and his commitment to do the Lord's work in the years of his and his wife Ruth's physical decline.

The Military Balance 2013 is the annual assessment of the military capabilities and defence economics of 171 countries world-wide. New features of the 2013 edition include; reorganised and expanded analytical essays. New sections on trends in contemporary armed conflicts in Afghanistan and Syria, as well as trends in defence capability areas, with a focus on equipment, technological or doctrinal developments. There is also an essay on trends in defence economics and procurement, one on European defence industries, and another on anti-access/area denial, detailed analysis of regional and national defence policy and economic issues for selected states, updated graphics feature on comparative defence statistics, with focus on defence economics, and major land, sea and, air capability concerns, tables, graphics and analysis of defence economics issues, additional national capability summaries, additional data on, land forces: combat support and combat service support, new graphics and maps on defence capability issues and additional data on cyber capabilities.

*Since the end of World War II, the small country of North Korea has occupied a disproportionate amount of the world's diplomatic and military attention. Its defiance of the international community has mystified and frustrated generations of leaders, both in Asia and throughout the world. With its closed borders and xenophobic leadership, little is known about North Korea's government or its intentions, leaving us to examine the words of the country's leaders and international statesmen, analysts, and journalists for a balanced, critical assessment of North Korea and its relationship to the world.*

Subduction dynamics has been actively studied through seismology, mineral physics, and laboratory and numerical experiments. Understanding the dynamics of the subducting slab is critical to a better understanding of the primary societally relevant natural hazards emerging from our planetary interior, the megathrust earthquakes and consequent tsunamis. Subduction Dynamics is the result of a meeting that was held between August 19 and 22, 2012 on Jeju island, South Korea, where about fifty researchers from East Asia, North America and Europe met. Chapters treat diverse topics ranging from the response of the ionosphere to earthquake and tsunamis, to the origin of mid-continental volcanism thousands kilometers distant from the subduction zone, from the mysterious deep earthquakes triggered in the interior of the descending slabs, to the detailed pattern of accretionary wedges in convergent zones, from the induced mantle flow in the deep mantle, to the nature of the paradigms of earthquake occurrence, showing that all of them ultimately are due to the subduction process. Volume highlights include: Multidisciplinary research involving geology, mineral physics, geophysics and geodynamics Extremely large-scale numerical models with state-of-the art high performance computing facilities

Overview of exceptional three-dimensional dynamic representation of the evolution of the Earth interiors and of the earthquake and subsequent tsunami dynamics Global risk assessment strategies in predicting natural disasters This volume is a valuable contribution in earth and environmental sciences that will assist with understanding the mechanisms behind plate tectonics and predicting and mitigating future natural hazards like earthquakes, volcanoes and tsunamis.

The cinema of Japan predates that of Russia, China, and India, and it has been able to sustain itself without outside assistance for over a century. Japanese cinema's long history of production and considerable output has seen films made in a variety of genres, including melodramas, romances, gangster movies, samurai movies, musicals, horror films, and monster films. It has also produced some of the most famous names in the history of cinema: Akira Kurosawa, Hayao Miyazaki, Beat Takeshi, Toshiro Mifune, Godzilla, The Ring, Akira, Rashomon, and Seven Samurai. The Historical Dictionary of Japanese Cinema is an introduction to and overview of the long history of Japanese cinema. It aims to provide an entry point for those with little or no familiarity with the subject, while it is organized so that scholars in the field will also be able to use it to find specific information. This is done through a detailed chronology, an introductory essay, and appendixes of films, film studios, directors, and performers. The cross-referenced dictionary entries cover key films, genres, studios, directors, performers, and other individuals. This book is an excellent access point for students, researchers, and anyone wanting to know more

about Japanese cinema.
