Clinical Decision Making: Case Studies in Medical-Surgical Nursing

*Reflecting the latest practices in the field, Clinical Decision Making: Case Studies in Medical-Surgical Nursing, 2nd edition bridges the gap between classroom knowledge and clinical application. Emphasizing holistic nursing care, this resource helps nursing students sharpen their critical thinking skills and gain experience applying what they have learned. The more than 40 medical-surgical case histories and related questions, and responses are based on real-life client situations. Every case contains an introductory blueprint of variables that must be considered while evaluating a particular scenario concerning the client, nursing protocol, and setting of care. Each blueprint and case is different, just as each clinical situation is unique. As learners simulate the actual decision-making process, they gain valuable experience making informed clinical judgments that will help them become successful nurses. Categorized by complexity, the book appeals to a broad range of learning levels and styles. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.*

*This book aims to provide an easily accessible quick reference guide for advanced nursing students preparing to undertake practical examinations to assess advanced clinical practice competence, and students preparing for practical examinations in non-medical prescribing assessment. These examinations are commonly known as objective structured clinical examinations (OSCEs). The book is a preparation and revision tool, designed to be read in conjunction with any recommended core clinical textbooks: however, along with giving students step-by-step instructions on performing well in OSCE scenarios, it also gives guidance to academic staff on preparing to teach and mark OSCEs. This book uses a case study approach to OSCEs in a coherent, consistent, and easily understandable style. Both authors are clinical academic nurse practitioners who regularly work in clinical practice in conjunction with teaching advanced nurse practitioner and non-medical prescribing students.*
