*Bill Bryson goes to Kenya at the invitation of CARE International, the charity dedicated to working with local communities to eradicate poverty around the world. Kenya, generally regarded as the cradle of humankind, is a land of stunning landscapes, famous game reserves, and a vibrant culture, but it also has many serious problems, including refugees, AIDS, drought and grinding poverty. It also provides plenty to worry a nervous traveller like Bill Bryson: hair-raising rides in light aircraft, tropical diseases, snakes, insects and large predators. Bryson casts his inimitable eye on a continent new to him, and the resultant diary, though short in length, contains all his trademark laugh-out-loud wit, wry observation and curious insight. All the author's royalties from this book, as well as all profits, will go to CARE International.*

*Are we aware of the values of craft? In this edited volume, cultural economists, researchers and professionals provide an interdisciplinary discussion of the relevance and contribution of the craft sector to the economy, as well as to society at large. Mignosa and Kotipalli bring together contributors to compare the craft sector across countries, analysing the role of institutions, educational bodies, organisations and market structure in its evolution and perception. The Western approach to craft and its subordinate position to the arts is contrasted with the prestige of craftsmanship in Eastern countries, while the differing ways that craft has attracted the attention of policy agencies, museums, designers and private institutions across regions is also analysed. This volume is vital reading to those interested in the economic features of craft and craftsmanship around the world, as well as for those interested in the importance of policy in bringing about effective sustainable development.*

*Cure your kids of the entitlement epidemic so they develop happier, more productive attitudes that will carry them into a successful adulthood. Whenever Amy McCready mentions the "entitlement epidemic" to a group of parents, she is inevitably met with eye rolls, nodding heads, and loaded comments about affected children. It seems everywhere one looks, there are preschoolers who only behave in the grocery store for a treat, narcissistic teenagers posting selfies across all forms of social media, and adult children living off their parents. Parenting expert McCready reveals in this book that the solution is to help kids develop healthy attitudes in life. By setting up limits with consequences and training them in responsible behavior and decision making, parents can rid their homes of the entitlement epidemic and raise confident, resilient, and successful children. Whether parents are starting from scratch with a young toddler or navigating the teen years, they will find in this book proven strategies to effectively quell entitled attitudes in their children.*

*In this, the only up-to-date critical work on still life painting in any language, Norman Bryson analyzes the origins, history and logic of still life. One of the most enduring forms of Western painting. The first essay is devoted to Roman wall-painting while in the second the author surveys a major segment in the history of still life, from seventeenth-century Spanish painting to Cubism. The third essay tackles the controversial field of seventeenth-century Dutch still life. Bryson concludes in the final essay that the persisting tendency to downgrade the genre of still life is profoundly rooted in the historical oppression of women. In Looking at the Overlooked, Norman Bryson is at his most brilliant. These superbly written essays will stimulate us to look at the entire tradition of still life with new and critical eyes.*

*This early work by Henry James was originally published in 1909 and we are now republishing it with a brand new introductory biography. Henry James was born in New York City in 1843. One of thirteen children, James had an unorthodox early education, switching between schools, private tutors and private reading... James published his first story, 'A Tragedy of Error', in the Continental Monthly in 1864, when he was twenty years old. In 1876, he emigrated to London, where he remained for the vast majority of the rest of his life, becoming a British citizen in 1915. From this point on, he was a hugely prolific author, eventually producing twenty novels and more than a hundred short stories and novellas, as well as literary criticism, plays and travelogues. Amongst James's most famous works are The Europeans (1878), Daisy Miller (1878), Washington Square (1880), The Bostonians (1886), and one of the most famous ghost stories of all time, The Turn of the Screw (1898). We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.*

*International Relations scholars have traditionally expressed little direct interest in addressing time and temporality. Yet, assumptions about temporality are at the core of many theories of world politics and time is a crucial component of the human condition and our social reality. Today, a small but emerging strand of literature has emerged to meet questions concerning time and temporality and its relationship to International Relations head on. This volume provides a platform to continue this work. The chapters in this book address subjects such as identity, terrorism, war, gender relations, global ethics and governance in order to demonstrate how focusing on the temporal aspects of such phenomena can enhance our understanding of the world. Contributors: Andrew Hom, Christopher McIntosh, Liam Stockdale, Alasdair McKay, Shahzad Bashir, Kevin K. Birth, Valerie Bryson, Kathryn Marie Fisher, Robert Hassan, Kimberly Hutchings, Tim Luecke, Tom Lundborg, Tim Stevens and Ty Solomon.*

*This book offers an informed and revealing account of NASA's involvement in the scientific understanding of the Earth's atmosphere. Since the nineteenth century, scientists have attempted to understand the complex processes of the Earth's atmosphere and the weather created within it. This effort has evolved with the development of new technologies -- from the first instrument-equipped weather balloons to multibillion-dollar meteorological satellite and planetary science programs. Erik M. Conway chronicles the history of atmospheric science at NASA, tracing the story from its beginnings in 1958, the International Geophysical Year, through to the present, focusing on NASA's programs and research in meteorology, stratospheric ozone depletion, and planetary climates and global warming. But the story is not only a scientific one. NASA's researchers operated within an often politically contentious environment. Although environmental issues garnered strong public and political support in the 1970s, the following decades saw increased opposition to environmentalism as a threat to free market capitalism. Atmospheric Science at NASA critically examines this politically controversial science, dissecting the often convoluted roles, motives, and relationships of the various institutional actors involved -- among them NASA, congressional appropriation committees, government weather and climate bureaus, and the military. -- Kristine C. Harper*

*This book makes the case for an inclusive form of socialist feminism that puts women with multiple disadvantages at its heart. It moves feminism beyond contemporary disputes, including those between some feminists and some trans women. Combining academic rigour with accessibility, the book demystifies some key feminist terms, including patriarchy and intersectionality, and shows their relevance to feminist politics today. It argues that the analysis of gender cannot be isolated from that of class or race, and that the needs of most women will not be met in an economy based on the pursuit of profit. Throughout, the book asserts the social, economic and human importance of the unpaid caring and domestic work that has been traditionally done by women. It concludes that there are some grounds for optimism about a future that could be both more feminist and more socialist.*

*The Trek tells the story of David Schachne's adventure in November, 2004, attempting to summit Kala Patthar, a mountain which towers above Everest Base Camp in the Himalayas. At 18,192 feet above sea level, the summit of Kala Patthar offers successful climbers one of the most amazing views of Mount Everest (29,035 feet) without having to put your life at risk by entering the Khumbu Icefall, or by climbing Mount Lhotse or Mount Nuptse. Raised in Brooklyn, NY, Schachne loved sitting the great outdoors as a teenager, going camping and hiking in the Catskills and Adirondacks. Throughout his early adult life, he had a burning desire to go trekking in the Himalayas. He believed going there would make his life more fulfilled. Schachne certainly didn't expect his trek to be a "walk in the park", but he was ill-prepared for what was in store for him. Climbing for hours and hours each day while mentally and physically exhausted; confronting sub-freezing temperatures; dealing with illness, high altitude sickness, piercing headaches, wretched odors, utter filth, bacterial infections, dysentery and more, he endured two weeks of pure, nightmarish misery. In this riveting account of his gut-wrenching trek over fourteen sleepless days and nights, while malnourished, Schachne takes you along on each and every step of his journey. You'll experience the ups and downs of the hills and valleys, and the highs and lows of his personal triumphs and chaotic travails. He flies from Kathmandu in Nepal to the most dangerous airport in the world (Tenzing Hillary Airport), in a town called Lukla, then hikes to Phadking and Namche Bazaar, a virtual flea market at 11,000 feet, then Thyangboche Monastery and then Dingboche, Dzugla, Lobuche and Gorak Shep, before finally attempting the summit. Schachne reveals what originally led him to fall in love with nature, why he was so determined to go to the Himalayas, and why he persevered despite the brutal bodily punishment he experienced. Join Schachne for the most entertaining adventure of your life, as he takes you along on this thrilling, harrowing and laugh and cry-out-loud journey.*
