fundamental and
requires further
developments.

Several studies have
been published
about gait analysis,
many specific
papers are available
in literature, and a lot
of conferences,
symposiums and
congresses have
been dedicated to

consciousness of
gait analysis s
effective utility both
in the research
finding and in clinical
decision making has
made it
indispensable in the
present context. Our
attempt, through this
volume is to present
an overview. Since
we have worked up
