

Royal Enfield Service Manual

The firm of Royal Enfield was one of the best-known names of the British motorcycle industry, but curiously its products have never received the adulation bestowed on the products of Triumph, BSA and others. In this complete history, top motorcycle authority Mick Walker shows that there was, in fact, much for the Redditch-based firm to be proud of, in the shape of good-looking, innovative machines that inspired a generation. And what other company can boast a model still in popular production sixty years after its launch? Topics covered include: , Complete history of Royal Enfield, including Enfield India, Numerous specifications, Royal Enfields in competition
About the Author: Mick Walker started his own business, Mick Walker Motorcycles, in 1969 and was a leading race sponsor during the 1970s. In 1994 he formed Mick Walker Racing, following the death of his son Gary at Brands Hatch that year. The team has achieved no fewer than five British Championship wins.

A faithful reproduction of the 1967 Floyd Clymer publication of the official factory Norton Workshop Twin Cylinder Manual for both the Lightweight and Heavyweight Twins. Models covered are the 250cc Jubilee (introduced in 1958) the 350cc Navigator (1960) and 400cc Electra (1963). Model 77, 88, 88SS, 99, 99SS, Sports Special, Manxman, Mercury, Atlas, G15, P11, N15, Ranger (P11A), which makes this manual appropriate for all Norton models that utilized this series of 500, 600, 650 and 750cc engines through the 1970 model year. // As expected from a factory publication this manual includes complete technical data, service and maintenance information and comprehensive detailed instructions for the repair and overhaul of all major and minor mechanical and electrical components, making it an invaluable resource for collectors and restorers of these classic Norton motorcycles. // There are separate sections that deal with the repair and overhaul procedures for the engine, transmission, wheels and brakes, front forks, frame and carburetor, plus an exhaustive Lucas electrical service section that includes test procedures for all the electronic components. With 74 illustrations to help explain the procedures this is a must have reference for any Norton enthusiast and would certainly assist in helping any potential purchaser better understand the inner workings prior to making a purchase of one of these classic motorcycles. // Out-of-print and unavailable for many years, this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all Norton enthusiasts worldwide.

The Red Baron's Ultimate Ducati Desmo Manual

60 pages, 57 illustrations, size 8.25 x 11 inches. A faithful reproduction of the Factory Workshop Manual originally published by Floyd Clymer in 1967. This fully illustrated manual covers the 736cc Interceptor MK I, MK IA, MK II and the Enfield Indian Chief from 1963 through 1970. As expected from a factory publication this manual includes complete technical data and comprehensive detailed instructions for the repair and overhaul of all major and minor mechanical and electrical components, making it an invaluable resource for collectors and restorers of these classic Royal Enfield motorcycles. It contains comprehensive Technical Specifications and includes detailed repair and rebuild data for the Engine, Clutch, Transmission, Forks, Rear Suspension, Wheels, Brakes and more. It also includes comprehensive information on the Electrical and Ignition Equipment plus Wiring Diagrams. There is adequate detailed text and illustrations to assist in major refurbishing such as an engine rebuild or even a complete mechanical renovation. An essential addition to any Royal Enfield enthusiasts library, this book has been out-of-print and unavailable for many years and is becoming increasingly more difficult to find on the secondary market. This is a - must have - reference for this series of Royal Enfield motorcycles and we are pleased to be able to offer this reproduction as a service to all Interceptor owners worldwide.

You are probably reading this bit because you ride a bike and you want to know how it works. Or maybe you wish to learn a thing or two about motorcycle maintenance. Better still, you probably wish to attempt servicing and maintaining your bike, all by yourself (the DIY way). This is the book for you then. To most of us, motorcycle maintenance is cleaning the bike and taking it for a service frequently. But there is actually much more to it than cleaning and oiling. It involves performing a specific set of tasks that need to be carried according to a specific schedule. But any of this information is not readily available and is too technical for the regular bike owner. This book aims to provide all that necessary information in the most straightforward simple fashion. It has been written specifically to serve an absolute beginner to motorcycle maintenance and the whole Do It Yourself (DIY) ethic. This book tries not just to show how easy

motorcycle maintenance is but also to show how much fun it actually can be.

New Third Edition

736cc Interceptor and Enfield Indian Chief

WALNECK'S CLASSIC CYCLE TRADER, DECEMBER 1993

WALNECK'S CLASSIC CYCLE TRADER, NOVEMBER 1988

Royal Enfield's famous motor - 'made like a gun' - hints at the factory's origins, but few appreciate that it is the oldest motorcycle manufacturer in existence that can boast of continuous production. In addition, its famous Bullet can claim the longest motorcycle production run of all time. Greg Pullen charts the rise, fall and rise again of Royal Enfield, from the company's pre-motorcycle beginnings in Redditch, through the impact of two World Wars, the importance of exports to India and subsequent establishment of factories there, to changes in ownership, recently launched models and new concept bikes for the future. With 190 colour photographs, this book includes: the V-twins, from the 1930s K and KX range to a glimpse of the concept V-twin shown in 2018; the singles, from 2-strokes to side-valve 4-strokes, and the ohv version that first used the Bullet name, through to the new singles built in India. The British Bullet: its arrival in 1948 and production in the UK, the original orders from India and subsequent setting up of production there are discussed. The 250s, (1958-68), including the Turbo Twins, and the big twins, from the 1948 500 Town to the final interceptor in 1970, including the 800cc prototype and the Clymer Indians are covered. The new twins: the 650cc Royal Enfield interceptor and Continental GT twins and the Bobber concept bike are discussed. Competition success is covered, with notable ISDT achievements, star rider Johnny Brittain and racing the big twins, and Geoff Duke in the GP5. Finally, the British factories and the new opportunities with the Indian factories are remembered.

Sometimes living under the shadow of the flashier, high-profile Triumph Twins, the equivalent BSAs were just as numerous and were exported all over the world. BSA was often seen as a less glamorous marque than Triumph or Norton, associated more with commuting and sidecars than coffee bar cowboys, but that doesn't detract from the collectibility of its models today, as the bikes have become highly usable, enjoyable classics. Unlike the many marque histories available, this book is a practical guide to buying one of these bikes. It covers the complete range, from the very first 1946 500cc A7 to the final 1973 650cc A65s. Chapters include what to look for (10min and 30min evaluations); spares prices; guides to auctions and paperwork; lists of useful contacts in the BSA community; and just as important, consideration of whether it's the right bike for you. One hundred colour photos, useful appendices and expert advice mean this book could save you thousands.

WALNECK'S CLASSIC CYCLE TRADER, DECEMBER/JANUARY 1986-87

Book of the Royal Enfield 1946-1962

Honda MSX125 (GROM) '13 to '18

This book includes the definitive development history of the most famous Velocette motorcycles, based on the author's earlier work, and the most comprehensive appendices ever published on this historic marque.

164 pages, 92 black & white illustrations, size 5.5 x 8.5 inches. Originally published under the title The Book of the Royal Enfield by W.C. Haycraft, this book is one of The Motorcyclist's Library series published in the USA by Floyd Clymer by arrangement with the original publishers Pitman Ltd. of London, England. It includes complete technical data, service and maintenance information and detailed instructions for the repair and overhaul of the major mechanical and electrical components for all Royal Enfield 250cc, 350cc and 500cc single cylinder G, J, J2, Bullet and Clipper models manufactured from 1946 through 1962. There is adequate detailed text and diagrams to assist in major refurbishing such as an engine rebuild or even a complete renovation. Please note that the 1957-1962 unit-construction "Crusader" type models are not covered in this publication.

Information for that series of motorcycles is included in the "Second Book of the Royal Enfield" also available from www.VelocePress.com. This publication has been Out-of-print and unavailable for many years and is becoming increasingly more difficult to find on the secondary market and we are pleased to be able to offer this

reproduction as a service to all Royal Enfield motorcycle enthusiasts worldwide.
