*In the years that followed World War II, both the United States and the newly formed West German republic had an opportunity to remake their economies. Since then, much has been made of a supposed "Americanization" of European consumer societies—in Germany and elsewhere. Arguing against these foggy notions, Jan L. Logemann takes a comparative look at the development of postwar mass consumption in West Germany and the United States and the emergence of discrete consumer modernities. In *Trams or Tailfins?*, Logemann explains how the decisions made at this crucial time helped to define both of these economic superpowers in the second half of the twentieth century. While Americans splurged on private cars and bought goods on credit in suburban shopping malls, Germans rebuilt public transit and developed pedestrian shopping streets in their city centers—choices that continue to shape the quality and character of life decades later. Outlining the abundant differences in the structures of consumer society, consumer habits, and the role of public consumption in these countries, Logemann reveals the many subtle ways that the spheres of government, society, and physical space define how we live.*

*For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. *A Patriot's History of the United States* corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.*

Embrace your inner Jane and find a new way of life in thrift! Jane Austen knew that wealth and grandeur had little to do with happiness, and that fashionable new dresses and reticules to impress Mr. Darcy simply were not the path to fulfillment—especially when one accrues debt in the process. It's as true today as it was then . . . Whether you have a fortune or not, you're well advised to make the most of your income—and save for your future. Now, using the timeless wisdom and example of Jane Austen's memorable heroines, this book offers everything the modern lady needs to know about: \*Clever investing \*Keeping up appearances on a budget \*Giving and receiving graciously \*Finding treasures at flea markets and church rummage sales \*Planning a party that only looks extravagant \*And more Jane Austen's Guide to Thrift shows how to make your circumstances significantly less reduced, and how to live a life of elegant economy and joyful generosity—whether you've as much as Emma Woodhouse or as little as Miss Bates.

This is a guide to help brand strategists consider what people really want in order to enhance their lives, and think about the role of their brand in responding to these desires. It offers a new framework for understanding desire, based on some of the things that are really important to us: our family, friends and community; the desire to explore, learn and grow; how we experience the world through our senses; our appetite to live life to the full; and what we set out to achieve. Brand strategists are the link between a commercial proposition and the lives it means to touch. They can talk to the people the company wants to reach, and - more importantly - listen to them. A brand which both enhances people's lives, and nurtures the resources on which they depend, will prove more resilient, win trust and achieve better results.

Through the centuries, women have used textiles to express their ideas and political opinions, creating items of utility that also function as works of art. Beginning with medieval European embroideries and tapestries such as the Bayeux Tapestry, this book examines the ways in which women around the world have recorded the impact of war on their lives using traditional fabric art forms of knitting, sewing, quilting, embroidery, weaving, basketry and rug making. Works from the United States, Canada, Latin America, Asia, the Middle and Near East, and Oceania are analyzed in terms of content and utility, and cultural and economic implications for the women who created them are discussed.

Traditional women's work served to document the upheaval in their lives and supplemented their family income. By creating textiles that responded to the chaos of war, women developed new textile traditions, modified old traditions and created a vehicle to express their feelings.
