O português como língua policêntrica com uma forte variação diatópica não se exclui deste discurso. Além da questão clássica Que português ensinar e aprender? referindo-se às duas variedades padrão de Portugal e do Brasil, novas perspectivas enfocam o conjunto global das variedades lusófonas e as outras dimensões de variação linguística. Neste volume reúnem-se contributos que abordam a temática em contextos de ensino secundário e superior na Alemanha, em Portugal, na Galiza e em Timor-Leste. This book offers a critical Arabic edition, annotated English translation, introductory study, and two-way glossaries of the famous dispensary composed around the middle of the 12th century CE by the Nestorian physician Ibn at-Tilm . The dispensary, recognized as a masterpiece already by mediaeval contemporaries, soon after its appearance became the pharmacological standard work in the hospitals and apothecs of Baghdad and the wider Arab East, replacing, after almost 300 years, the vademecum of S?b?r ibn Sahl. The dispensary of Ibn at-Tilmi? marks the

apogee and the conclusion of centuries of medico-pharmacological development in the Arab world, and it is therefore absolutely essential for a critical understanding of mediaeval Arabic medicine and pharmacy in particular, and premodern science in general.

This landmark volume offers an introduction to the field of teaching Arabic as a foreign or second language. Recent growth in student numbers and the demand for new and more diverse Arabic language programs of instruction have created a need that has outpaced the ability of teacher preparation programs to provide sufficient numbers of well-qualified professional teachers at the level of skill required. Arabic language program administrators anticipate that the increases in enrollment will continue into the next decades. More resources and more varied materials are seriously needed in Arabic teacher education and training. The goal of this Handbook is to address that need. The most significant feature of this volume is its pioneer role in approaching the field of Arabic language teaching from many different

perspectives. It offers readers the opportunity to consider the role, status, and content of Arabic language teaching in the world today. The Handbook is intended as a resource to be used in building Arabic language and teacher education programs and in guiding future academic research. Thirty-four chapters authored by leaders in the field are organized around nine themes: *Background of Arabic Language Teaching; *Contexts of Arabic Language Teaching; *Communicative Competence in Arabic; *The Learners; *Assessment; *Technology Applications; *Curriculum Development, Design, and Models; *Arabic Language Program Administration and Management; and *Planning for the Future of Arabic Language Learning and Teaching. The Handbook for Arabic Language Teaching Professionals in the 21st Century will benefit and be welcomed by Arabic language teacher educators and trainers, administrators, graduate students, and scholars around the world. It is intended to create dialogue among scholars and professionals in the field and in related fields--dialogue that will contribute to creating new models for curriculum and course design, materials and assessment tools, and ultimately, better instructional effectiveness for all Arabic learners everywhere, in both Arabic-speaking and non-Arabic speaking countries.

Teaching Arabic as a Foreign Language concentrates on the origins, developments and current directions of the discipline Teaching Arabic as a Foreign Language (TAFL) within the Arab world and partially outside of it during the last 60 years, namely between 1958 and 2018. Considered in this volume are the most influential scholars, authors, educators and those significant works that have contributed to the development of the discipline. In addition, special attention is paid to the TAFL institutes, regarded as epicenters of TAFL activities and important meetings, that allow scholars to gather around the same table and discuss approaches, trends and methods used in the field. All of these aspects converge in one comprehensive study which is enriched by a narration of the main sociopolitical changes that have affected the Middle East in latter-day history.

Coursebook for Communicative Language Competences

A bookstore can be a wonderful, welcoming place of both commerce and curiosity. That's the goal for Woody, an American recently transferred to England to run a branch of Texts. He wants a clean, orderly store and lots of sales to show his bosses when they arrive from the States for a pre-Christmas inspection. Not easy given the shop's location in a foggy strip mall. And things keep going wrong. No matter how often the shelves are put in order before the doors are locked at night, when the staff returns in the morning, books are lying all over the floor, many damp and damaged beyond repair. The store's computers keep acting up--errors appear in brochures and ads and orders disappear completely. And even when the machines are turned off, they seem to glow with a spectral gray light. The

hit-and-run death of an employee in the store's parking lot marks a turning point. One employee accuses another of making sexual advances and they come to blows. Between one sentence and the next, one loses his ability to read. The security monitors display half-seen things crawling between the stacks that vanish before anyone can find them.

Desperate, Woody musters his staff for an overnight inventory. When the last customers reluctantly depart, leaving almost-visible trails of slime shining behind them, the doors are locked, sealing Woody and the others inside for a final orgy of shelving. The damp, grey, silent things that have been lurking in the basement and hiding in the fog may move slowly, but they are inexorable. This bookstore is no haven. It is the doorway to a hell unlike any other. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Arabic has been taught as a foreign language throughout the world. Yet, no book has been available for teachers and students that illustrates to them the stylistic mechanism of Arabic. This shows the urgent

need for a reference book on Arabic stylistics that can develop the student's stylistic competence as well as enhance his/her writing and communication skills needed for this vital modern language. Arabic Stylistics: A Coursebook aims to help the learner to acquire sound awareness of the recurrent structural patterns of modern standard Arabic and develop his/her analytical stylistic skills. This coursebook is also of great value to the teachers of Arabic as a foreign language who need this particular book to assist them in developing their students' practical ability and understanding of Arabic. This coursebook is written in a smooth language and is supported by generous examples with their translation in English. Arabic Stylistics: A Coursebook is highly beneficial for both teachers and learners of Arabic as a foreign language.

An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as "beauty"? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize-winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a "sexual selection" distinct from natural selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.
