Classical civilisation, Martin Bernal argues, has deep roots in Afro-Asiatic cultures. But these Afro-Asiatic influences have been systematically ignored, denied, or suppressed since the eighteenth century - chiefly for racist reasons. The popular view is that Greek civilisation was the result of the conquest of a sophisticated but weak native population by vigorous Indo-European speakers--or Aryans--from the North. But the Classical Greeks, Bernal argues, knew nothing of this "Aryan model." They did not see their political institutions, science, philosophy, or religion as original, but rather as derived from the East in general, and Egypt in particular. Black Athena is a three-volume work. Volume 1 concentrates on the crucial period between 1785 and 1850, which saw the Romantic and racist reaction to the Enlightenment and the French Revolution, and the consolidation of Northern expansion into other continents. In an unprecedented tour de force, Bernal makes meaningful links between a wide range of areas and disciplines--drama poetry, myth, theological controversy, esoteric religion, philosophy, biography, language, historical narrative, and the emergence of "modern scholarship."

"DAZZLING." --Time "[THEROUX'S] WORK IS DISTINGUISHED BY A SPLENDID EYE FOR DETAIL AND THE TELLING GESTURE; a storyteller's sense of pacing and gift for granting closure to the most subtle progression of events; and the graceful use of language. . . . We are delighted, along with Theroux, by the politeness of the Turks, amazed by the mountainous highlands in Syria, touched by the gesture of an Albanian waitress who will not let him pay for his modest meal. . . . The Pillars of Hercules [is] engrossing and enlightening from start (a damning account of tourists annoying the apes of Gibraltar) to finish (an utterly captivating visit with Paul Bowles in Tangier, worth the price of the book all by itself)." --Chicago Tribune "ENTERTAINING READING . . . WHEN YOU READ THEROUX, YOU'RE TRULY ON A TRIP." --The Boston Sunday Globe "HIS PICARESQUE NARRATIVE IS STUDDED WITH SCENES THAT STICK IN THE MIND. He looks at strangers with a novelist's eye, and his portraits are pleasantly tinged with malice." --The Washington Post Book World "THEROUX AT HIS BEST . . . An armchair trip with Theroux is sometimes dark, but always a delight." --Playboy "AS SATISFYING AS A GLASS OF COOL WINE ON A DUSTY CALABRIAN AFTERNOON . . . With his effortless writing style, observant eye, and take-no-prisoners approach, Theroux is in top form chronicling this 18-month circuit of the Mediterranean." --Kirkus Reviews (starred review)

Guide to the Tuba Repertoire is the most comprehensive investigation ever undertaken into the literature and discography of any single musical instrument. Under the direction of R. Winston Morris and Daniel Perantoni, this publication represents more than 40 years of research by dozens of leading professionals throughout the world. The guide defines the current status of the tuba and documents its growth since its inception in 1835. Contributors are Ron Davis, Jeffrey Funderburk, David Graves, Skip Gray, Charles A. McAdams, R. Winston Morris, Mark A. Nelson, Timothy J. Northcut, Daniel Perantoni, Philip Sinder, Joseph Skillen, Kenyon Wilson, and Jerry A. Young.

Giacomo Meyerbeer, one of the most important and influential opera composers of the nineteenth century, enjoyed a fame during his lifetime unrivalled by any of his contemporaries. This eleven volume set provides in one collection all the operatic texts set by Meyerbeer in his career. The texts are offered in the most complete versions ever made available. Each libretto is translated into modern English by Richard Arsenty; and each work is introduced by Robert Letellier. In this comprehensive edition of Meyerbeer's libretti, the original text and its translation are placed on facing pages for ease of use. The fourth volume presents Meyerbeer's fifth and sixth Italian operas, written towards the end of his decisive sojourn in Italy, where for eight years (1816-24) he made the operatic traditions of bel canto his own, while constantly expanding his own powerful dramatic instincts. His Italian operas divide themselves into three pairs of two. In the third pair, L'Esule di Granata (Milan, 1822) and Il Crociato in Egitto (Venice, 1824), the impulse to dismantle and reconstruct the traditions of bel canto was carried even further than before. Development of the introduzione, a fluent handling and modification of structure, an imaginative expansion of forces, showed awareness of both the French traditions of grandeur and Rossini's experiments in the opera seria in Naples. All Meyerbeer's Italian operas are concerned with situations of exile and imposture, search and restitution, confusion and fulfilment, and none more so than Il Crociato. This recurrent theme certainly reflected a subliminal thematic treatment of issues at work in the composer's life: his view of himself as a searching artist, an alien Jew, an outsider living away from his Prussian home and seeking his true metier. The success of the Crociato enabled Meyerbeer to effect a move to Paris, the operatic capital of the world, where his career would find its true artistic home.

An in-depth exploration of natural fiber-reinforced composites and their applications In Natural Fiber-Reinforced Composites: Thermal Properties and Applications, a team of distinguished researchers delivers a comprehensive overview of the thermal properties of natural fiber-reinforced polymer composites ideal for readers seeking to make an informed decision regarding materials selection for the development of automotive and aerospace products. The book brings together information currently dispersed throughout the scientific literature and offers viable and environmentally friendly alternatives to conventional composites. It also reviews the potential for using natural fiber-reinforced composites in the automotive, mechanical, and civil engineering sectors. Included case studies highlight and illustrate the applications of natural fiber-reinforced composites, and the included mathematical models predict the improvement of relevant properties of the materials. This book also provides: A thorough overview of the thermal characterization of natural fiber-based hybrid composites Comprehensive explorations of the thermal properties of hybrid natural fiber reinforced thermoplastic composites Practical discussions of the thermal properties of sugar palm fiber and sisal fiber-based hybrid composites In-depth examinations of the thermal properties of flax fiber, pineapple leaf fiber, and grass and cane fiber hybrid composites Natural Fiber-Reinforced Composites: Thermal Properties and Applications is a must-read for materials scientists and polymer chemists, as well as chemists and engineering scientists working in industry.

Giacomo Meyerbeer, one of the most important and influential opera composers of the nineteenth century, enjoyed a fame during his lifetime hardly rivalled by any of his contemporaries. This ten volume set provides in one collection all the operatic texts set by Meyerbeer in his career. The texts offer the most complete versions available. Each libretto is translated into modern English by Richard Arsenty; and each work is introduced by Robert Letellier. In this comprehensive edition of Meyerbeer's libretti, the original text and its translation are placed on facing pages for ease of use. The first volume presents Meyerbeer's first three youthful operas, all of them German Singspiele: the grandiose Biblical drama of Jephthah and his fated daughter (Jephtas Gelubde, 1812), the colourful Arabian Nights tale of the man who becomes caliph for a day (Wirt und Gast, 1813), and a popular celebration of Prussian victory in the War of Liberation (Das Brandenburger Tor, 1814).

History's Place explores nostalgia as one of the defining aspects of the relationship between France and North Africa. Dr. Seth Graebner argues that France's most important colony developed a historical consciousness through literature, and that post-colonial writers revised it while retaining its dominant effect. The North African city became a privileged place in the relationship between literacy and historical discourses in the colony. Graebner analyzes the importance of architecture and urbanism as markers of historical development, as the urban fabric and descriptions of it became signs of difference between metropole and colony. Discussing writers as diverse as Bertrand, Randau, and Kateb, this book examines how the changing Algerian city has remained the locus of a debate colored by various sorts of nostalgia. Graebner demonstrates that nostalgia was symptomatic of historical anxiety generated by colonial conditions, but with literary consequences for mainland France as well. History's Place is a comprehensive and valuable addition to the study of French literature and cultural studies.

This first volume of William Heitland's masterpiece examines the origins of the Roman Republic from 509 BC until the conclusion of the Second Punic War.

Symbolic Space in the Novels of Flaubert

Hannibal must transport sixty war elephants from Carthage in North Africa, across the Middle Sea to Iberia. He has to train his people to accomplish this difficult task. The first part of this project is to load one elephant on a ship and sail to the east on the eighteen-day voyage. He has chosen his largest elephant, Obolus, to use in the training of his men. During the loading the animal onto a ship, Obolus killed his longtime handler. The girl, Liada, is the only other person who can control the temperamental elephant. After she succeeds in guiding Obolus up the ramp and onto the deck of the ship, Hannibal asks her to go with the elephant to Iberia. Liada is reluctant to leave her friends at Carthage, but she’s also concerned about Obolus’ safety on the long voyage. She decides to leave her friends and take care of Obolus. PUBLISHER: TEKTIME

The sixth volume presents Les Huguenots (1836), Meyerbeer's most popular opera, not only in France, but throughout the world during the 19th and early 20th centuries. By 1936 it had been performed 1126 times at the Paris Opera alone. The stirring scenario set during the French Wars of Religion conjures up a rich and complex Renaissance world and the tragedy of religious conflict, with the whole of society unraveling in hatred, murder and chaos. The only light is spiritual illumination which chooses self-sacrifice and love above hatred and vengeance-even to the point of death. Resolution comes in true enlightenment of mind and heart. George Sand, indeed, called this opera an evangel of love. The plot follows an inexorable course, intensified in terms of broadness, light, time, speed and compression, as leisured life, freedom of mind and action, are funneled into a vortex of constriction: action becomes narrower, darker, faster and inescapable in the realization of a fatal course of tragic events. Eventually the only authentic behaviour left is the freedom to die for the truth. In Les Huguenots Meyerbeer showed himself the master of narrative pacing and symbolic color. He emerges as the historical novelist of dramatic music, using sophisticated orchestral and choral mixtures, strong melody, splendid vocalism, and powerful characterization to unfold both relaxed and vibrant narration. The apprehension of historical detail, the bold confrontation of ideological and religious themes of profound importance to human self-determination and liberty, established Meyerbeer as a great composer of serious opera. The engagement of poet and composer transcended historical limitations to create a masterpiece of Romantic tragedy. For Verdi, Les Huguenots was true theater, and acts 2 and 4 especially, stupendo (magnificent).

Gustave Flaubert is probably the most famous novelist of nineteenth-century France, and his best known work, Madame Bovary, is read in numerous comparative literature and French courses. His fiction set the standard to which other authors turned to learn their craft, and his cult of art and his unrelenting search for stylistic perfection inspired many later writers. This reference is a convenient guide to his life and work. Included are hundreds of alphabetically arranged entries for individual works, major characters, historical persons, themes, critical approaches, and other topics. Each entry is written by an expert contributor and most close with a brief bibliography.

In Formal Revolution in the Work of Baudelaire and Flaubert, Kathryn Mills argues that despite the enduring celebrity of Baudelaire and Flaubert, their significance to modern art has been misunderstood. Mills places Le Spleen de Paris and Trois contes, their authors' relatively less well-known but last published works, in relationship with the times and artistic goals of Baudelaire and Flaubert, showing that these seminal authors literally sought to "come to terms with" the changes transforming the nineteenth-century into the modern age by forging a new form for literature.
