The role of trade in promoting international development is becoming increasingly important in our globalised world, and the global trading system has the potential to help the world's poor if trading inequities can be remedied. This publication examines the key trade issues relevant to the ongoing multilateral trade negotiations and the evolution of the world trading system as a means to address barriers to growth in developing countries, focusing on the Doha Round. Issues discussed include: potential gains from trade liberalisation for developed and developing countries; reforming trade in agriculture as a key to the success of the Doha Round; markets for manufacturing and services; trade facilitation, TRIPs and the regulatory agenda; the role of regional trade agreements; and issues of aid for trade, in order to help low-income countries develop the infrastructure needed to participate in the global economy and benefit from new market opportunities.

The purpose of this book is to examine the experience of a number of countries in grappling with the problems of reconciling the two fields of competition policy and intellectual property rights. The first part of the book indicates the variation in legislative models as well as a wide variety of judicial and administrative doctrines that have been used. The jurisdictions selected for study are the three major trading blocks with the longest experience of competition law (the EU, the USA and Japan) and three less populous countries with open economies (Australia, Ireland and Singapore). In the second part of the book we look at a number of issues closely related to the interface between competition law and intellectual property. Separate chapters analyse the issue of parallel trading and exhaustion of IPRs, the issue of technology transfer, and the economics of the interface between intellectual property and competition law.

Prenuptial agreements have exploded over the past 20 years, not only among celebrities, but also for all types of people who desire to protect, manage, or enhance their personal, family, or business assets against foreseen and unforeseen circumstances. Attorneys have been assigned the task of cutting through a morass of issues to create agreements that achieve the goals of their clients while meeting complex, and often subtle, legal requirements.

Drafting Prenuptial Agreements is the first guidebook ever to cover this growing area of family law. Written by Gary N. Skoloff and Richard H. Singer, Jr., Skoloff and Wolfe, Livingston NJ, and Ronald L. Brown, Editor, American Journal of Family Law, Aspen Publishers, Drafting

Prenuptial Agreements presents a pragmatic approach to preparing successful agreements quickly and effectively in any situation by grouping together and identifying the common areas that need to be addressed. The authors guide you through planning the agreement and the types of issues to discuss with different clients. This thoughtful organization gives you easy access to the tools you need to clearly present the range of choices to be addressed in each type of agreement and situation. Five sample agreements create broad groupings of issues which let you quickly zero in on the concerns parties at specific stages of life and affluence are most likely to want covered by their prenuptial agreement: YOUNG-YOUNG, EQUAL

ASSETS and—For young people in the early stages of promising careers, where each has some assets and wants to protect these, as well as their careers, as separate property.

YOUNG-YOUNG, DISPROPORTIONATE ASSETS and—For people of middle age or younger, where one already has, or is likely to acquire, substantial assets, and wants to protect these assets as separate property, while reasonably providing for the needs of the marriage, as well as the spouse and any children upon divorce. YOUNG-OLD, DISPROPORTIONATE

ASSETS—For a couple with a large age disparity, where the older party has substantial wealth which he or she wants to preserve for his or her estate, and also wants to provide for disability or incapacity. **OLD-OLD, DISPROPORTIONATE ASSETS**—For an elderly couple, where one party has substantially fewer assets than the other, yet is comfortable, and where both want to protect their separate property, provide for a comfortable lifestyle during the marriage and reasonably provide for the spouse with fewer assets upon death or divorce. **OLD-OLD, EQUAL ASSETS**—For older parties with similar assets who want to protect their property as separate, yet provide an arrangement by which they can live commensurate with their resources. **Drafting Prenuptial Agreements includes a CD-ROM with sample agreements and hundreds of time-saving clauses!**

Unlike other areas of fund-raising, planned giving brings fund-raising professionals into contact with lawyers, accountants, financial planners, consultants, and wealthy donors. They need to be able to speak the same language as the donors and their advisors while still keeping their own organization's goals in mind. This book can help them address these and other vital issues related to starting, marketing, administering, and expanding a planned giving program. This book is supplemented annually.

Imagine sending a magazine article to 10 friends—making photocopies, putting them in envelopes, adding postage, and mailing them. Now consider how much easier it is to send that article to those 10 friends as an attachment to e-mail. Or to post the article on your own site on the World Wide Web. The ease of modifying or copying digitized material and the proliferation of computer networking have raised fundamental questions about copyright and patent—intellectual property protections rooted in the U.S. Constitution. Hailed for quick and convenient access to a world of material, the Internet also poses serious economic issues for those who create and market that material. If people can so easily send music on the Internet for free, for example, who will pay for music? This book presents the multiple facets of digitized intellectual property, defining terms, identifying key issues, and exploring alternatives. It follows the complex threads of law, business, incentives to creators, the American tradition of access to information, the international context, and the nature of human behavior. Technology is explored for its ability to transfer

This latest monograph by Professor Korah on the recent group exemption consists of a detailed and critical commentary on the technology transfer block exemption and guidelines of 2004, and of the case law of the ECJ and Commission on licensing and refusals to license, together with annotated copies of the regulation and guidelines. There is a substantial chapter on refusal to supply or license in the light of the recent case law under Article 82. It embraces many of the competition issues that may affect intellectual property rights. After a brief introduction, the work starts with short chapters on the free movement of goods and services, the status of the Commission's guidelines and the historically hostile attitude of the Commission under Article 81 towards licensing. It then launches into a detailed analysis of the regulation and the probable treatment of licences that do not fall within it. Throughout the book the author provides extensive analysis of policy and economics as well as comparison with US practice.

This reference text addresses the basic knowledge of research administration and anagement, and includes everything from a review of research administration and the infrastructure that is necessary to support research, to project development and post-project plans. Examples of concepts, case studies, a glossary of terms and acronyms, and references to books, journal articles, monographs, and federal regulations are also included.
