Principles, Methods and Applications

Completing Christ's Afflictions

Introduction to Philosophical Hermeneutics

Nowadays, distributed software development has become more common. In a distributed project setting, managing experience is even more crucial than in a co-located project. Problems like ineffective communication, lack of awareness and trust and restrictive information flow

policies impede experience exchange and raise the overall effort for software engineers to collaborate. Moreover, sharing experiences is usually not part of the development process and considered additional effort. This often leads to failure of the experience management initiative due to a lack of participation. This thesis proposes a framework for qualitative and quantitative assessment of light-weight experience collection. Light-weight methods primarily aim at lowering the perceived effort and return a reasonable benefit to the experience bearers. This thesis proposes characterizing criteria of light-weight experience collection and a measurement system to measure gradations of expected effort and benefit of an experience collection method. To support knowledge managers in choosing the appropriate collection method, this thesis provides a catalogue of strategies from different categories and areas of application in distributed development projects. The text presents synoptic history of philosophical hermeneutics from his oldest classical history proceed with medieval hermeneutics, hermeneutics of Protestantism, modern times, Romanticism and Historicism to 20th century hermeneutic thinking presented by Husserl, Heidegger, Gadamer, Habermas, Ricoeur, Derrida and Ingarden.

The text is structured in chronological and ideological order and presents nine basic types of the classical perception of the problem of knowledge through an analysis of the atomistic theory of perception, Platonism, Aristotle's doctrine, scepticism, rationalism, sensualism, Kant's theory, phenomenological-xistential, pragmatic, and (post) analytical perceptions. The proposed work aspires to be an introduction (not a complete presentation, neither in the number of types, nor in a full interpretation) and a basis for the reader's interpretations which is reflected in the structure of the text.

This volume investigates Proclus' own thought and his wide-ranging influence within late Neoplatonic, Alexandrine and Byzantinian philosophy and theology. It further explores how Procline metaphysics and doctrines of causality influence and transition into Arabic and Islamic thought, up until Richard Hooker in England, Spinoza in Holland and Pico in Italy. John Dillon provides a helpful overview of Proclus' thought, Harold Tarrant discusses Proclus' influence within Alexandrian philosophy and Tzvi Langermann presents ground breaking work on the Jewish reception of Proclus, focusing on the work of Joseph Solomon Delmedigo (1591-1655), while Stephen Gersh presents a comprehensive synopsis of Proclus' reception throughout Christendom. The volume also presents works from notable scholars like Helen Lang, Sarah Wear and Crystal Addey and has a considerable strength in its presentation of Pseudo-Dionysius, Proclus' transmission and development in Arabic philosophy and the problem of the eternity of the world. It will be important for anyone interested in the development and transition of ideas from the late ancient world onwards.

David Baldacci delivers a moving, family drama about learning to love again after terrible heartbreak and loss in this classic New York Times bestseller—soon to be a Hallmark original movie. It's almost Christmas,

but there is no joy in the house of terminally ill Jack and his family. With only a short time left to live, he spends his last days preparing to say goodbye to his devoted wife, Lizzie, and their three children. Then, unthinkably, tragedy strikes again: Lizzie is killed in a car accident. With no one able to care for them, the children are separated from each other and sent to live with family members around the country. Just when all seems lost, Jack begins to recover in a miraculous turn of events. He rises from what should have been his deathbed, determined to bring his fractured family back together. Struggling to rebuild their lives after Lizzie's death, he reunites everyone at Lizzie's childhood home on the oceanfront in South Carolina. And there, over one unforgettable summer, Jack will begin to learn to love again, and he and his children will learn how to become a family once more.

Both women and men were leaders since ancient times; however, few female leaders are reported. Deborah is one of the powerful female leaders during the ancient Israel. This work explored the feminist expositions of the Old Testament in Africa, with focus on the context of the offices held by Deborah as narrated in the book of Judges Chapter 4 and 5. The exegetical part shed light onto the role played by the female leaders among the Israelites. The feminist paradigms in Judges 4 and 5 demonstrate how female characters in these chapters construct a way to disagree with what seems to oppress women and deny their leadership capability. The findings of this study determine that gender should not be perceived as having an effect on leadership in general.

What is the relationship between the preeminent, cosmos-reconciling 'Christ' of Col 1:15-20 and the imprisoned 'Paul' of 1:24-29, who enigmatically 'completes' the former's afflictions as he declares to 'every person' the mystery, long concealed but only now revealed by Israel's God to his holy ones? After finding solid exegetical ground through an unprecedented and exhaustive study of the rare verb antanapleroo (in 1.24), Bruce Clark tackles this most intriguing, if challenging question. He argues that Col 1, in accord with 2 Cor 5:18-6:4, presents Paul as the utterly unique diakonos ('minister') of the universal ekklesia and, therefore, as one whose afflictions uniquely complete Christ's own, so that together, revealing the righteousness of God, they initiate the divine reconciliation of 'all things.'

This textbook offers a brief overview of the main philosophical schools of ancient India and China. It acquaints readers with concepts like holistic or ceremonial approach to reality, openness to transcendence, pluralism of opinions, behaviour leading by a sense of harmony.

The time of Nazi dictatorship in Germany (1933-45) consistently stimulates more interest than any other period of human history, as witnessed by the countless books and other media on Adolf Hitler and his leading henchmen. What is the basis for this enduring fascination? And, does the abundance of available material help us truly to understand the phenomenon? In this clear-sighted study, Tautz concludes that there is an existential need for the human psyche to come to terms with the forces of destruction that broke out during the era of National Socialism. In an attempt to get to the essence of the phenomenon, he employs the method of 'historical symtomatology', as developed by the philosopher and scientist Rudolf Steiner. Through these means, '... the historical process is perceived as the physiognomic expression of spiritual forces'. By viewing events as symptoms, the outer facts become transparent to the hidden influences that lie behind them, and occult aspects are revealed. Tautz focuses on the degenerate elements that inspired National Socialism – their meaning, nature and methods – and examines their manifestation in earthly events. He reveals the spiritual context in which these adversary, opposing forces erupted and attacked humanity – at a time when human consciousness had stepped over a new threshold. The Nazi functionaries and their spectral leader, whom he refers to as 'the Medium', willingly served these powers, whilst the bedazzled masses were largely passive. If we are serious about developing an egalitarian society today that corresponds to the present level of human evolution, he argues, we need to understand this period of tyranny in Germany at the deepest levels. In addition to Tautz's classic text, a new Appendix by Andreas Bracher brings the reader up to date with a survey of relevant literature on the theme as well as an insightful review of the Nazis' attitude to Rudolf Steiner and the anthroposophical movement he founded. Contemporary extracts from the Völkische Beobachter (the Nazi's house journal) indicate the viciousness and hatred directed towards Steiner and anthroposophy by the National Socialists.

To date, the relation between multilingualism and the Semantic Web has not yet received enough attention in the research community. One major challenge for the Semantic Web community is to develop architectures, frameworks and systems that can help in overcoming national and language barriers, facilitating equal access to information produced in different cultures and languages. As such, this volume aims at documenting the state-of-the-art with regard to the vision of a Multilingual Semantic Web, in which semantic information will be accessible in and across multiple languages. The Multilingual Semantic Web as envisioned in this volume will support the following functionalities: (1) responding to information needs in any language with regard to semantically structured data available on the Semantic Web and Linked Open Data (LOD) cloud, (2) verbalizing and accessing semantically structured data, ontologies or other conceptualizations in multiple languages, (3) harmonizing, integrating, aggregating, comparing and repurposing semantically structured data across languages and (4) aligning and reconciling ontologies or other conceptualizations across languages. The volume is divided into three main sections: Principles, Methods and Applications. The section on "Principles" discusses models, architectures and methodologies that enrich the current Semantic Web architecture with features necessary to handle multiple languages. The section on "Methods" describes algorithms and approaches for solving key issues related to the construction of the Multilingual Semantic Web. The section on "Applications" describes the use of Multilingual Semantic Web based approaches in the context of several application domains. This volume is essential reading for all academic and industrial researchers who want to embark on this new research field at the intersection of various research topics, including the Semantic Web, Linked Data, natural language processing, computational linguistics, terminology and information retrieval. It will also be of great interest to practitioners who are interested in re-examining their existing infrastructure and methodologies for handling multiple languages in Web applications or information retrieval systems.
