This book, by a scientist, is not a textbook on English grammar: nor is it just one more book on how to write a technical report, or a thesis, or a paper for publication. It is about all the ways in which writing is important to scientists and engineers in helping them to remember to observe, to think, to plan, to organize and to communicate.

This landmark work challenges the separatist doctrines which have come to dominate our understanding of the world.

Appiah revives the ancient philosophy of Cosmopolitanism, which dates back to the Cynics of the 4th century, as a means of understanding the complex world of today. Arguing that we concentrate too much on what makes us different rather than recognising our common humanity, Appiah explores how we can act ethically in a globalised world.

Masterful in its simplicity, Chronicle in Stone is a touching coming-of-age story and a testament to the perseverance of the human spirit. Surrounded by the magic of beautiful women and literature, a boy must endure the deprivations of war as he suffers the hardships of growing up. His sleepy country has just thrown off centuries of tyranny, but new waves of domination inundate his city. Through the boy's eyes, we see the terrors of World War II as he witnesses fascist invasions, allied bombings, partisan

infighting, and the many faces of human cruelty—as well as the simple pleasures of life. Evacuating to the countryside, he expects to find an ideal world full of extraordinary things, but discovers instead an archaic backwater where a severed arm becomes a talisman and deflowered girls mysteriously vanish. Woven between the chapters of the boy's story are tantalizing fragments of the city's history. As the devastation mounts, the fragments lose coherence, and we perceive firsthand how the violence of war destroys more than just buildings and bridges.

German Émigrés and American Political Thought After World War II

Rev. ed. of: Cultivating successful software development. c1997.

How can schools and the school curriculum contribute to building democratic citizens? This is a major question posed by governments, educational systems, schools, teachers and researchers around the world. One important way is to identify the competences needed for preparing democratic citizens and incorporate these within both the formal and informal school curriculum. Another question

must then be posed- what competences do young citizens need to be considered as active and engaged in modern democracies? In 2011 an invited research symposium of leading civic and political educators, and social scientists from across Europe met in Hannover, Germany to consider this key concern facing Europe today. In examining the above questions the symposium addressed two significant issues: 1. Identify key competencies required for active citizenship of young people in Europe of the future. 2. Translate those competencies to school-based activities in the form of curricular and pedagogical strategies. The

publication Civic Education and Competences for Engaging Citizens in Democracies addressed the first issue and this volume addresses the second issue. Through discussion in the invited symposium, previously prepared papers, and participation in a modified Delphi Technique the participants have prepared chapters for this book. The chapters of this book represent the contribution of the participants before, during and after the symposium with opportunities for review and reflection about competences for democratic citizenship and the role of schools and the curriculum. Murray Print and Dirk Lange are professors from the University of Sydney

and Leibniz University of Hannover respectively and are national leaders in civics and citizenship education in their respective countries. They have brought together a group of leading European civic and citizenship educators from different academic fields to explore the key issue and to identify the competences for young people to become active and engaged European citizens.

With Writing without Teachers (OUP 1975) and Writing with Power (OUP 1995) Peter Elbow revolutionized the teaching of writing. His process method--and its now commonplace "free writing" techniques--liberated generations of students and teachers from the emphasis on formal principles of grammar that had dominated composition pedagogy. This new collection of

essays brings together the best of Elbow's writing since the publication of Embracing Contraries in 1987. The volume includes sections on voice, the experience of writing, teaching, and evaluation. Implicit throughout is Elbow's commitment to humanizing the profession, and his continued emphasis on the importance of binary thinking and nonadversarial argument. The result is a compendium of a master teacher's thought on the relation between good pedagogy and good writing; it is sure to be of interest to all professional teachers of writing, and will be a

valuable book for use in composition courses at all levels.

gender, sexuality: in the past couple of decades, a great deal of attention has been paid to such collective identities. They clamor for recognition and respect, sometimes at the expense of other things we value. But to what extent do "identities" constrain our freedom, our ability to make an individual life, and to what extent do they enable our individuality? In this beautifully written work, renowned philosopher and African Studies scholar Kwame Anthony Appiah draws on thinkers through the ages and across the globe to explore such questions. The Ethics of Identity takes seriously both the claims

of individuality--the task of making a life---and the claims of identity, these large and often abstract social categories through which we define ourselves. What sort of life one should lead is a subject that has preoccupied moral and political thinkers from Aristotle to Mill. Here, Appiah develops an account of ethics, in just this venerable sense--but an account that connects moral obligations with collective allegiances, our individuality with our identities. As he observes, the question who we are has always been linked to the question what we are. Adopting a broadly interdisciplinary

perspective, Appiah takes aim at the clichés and received ideas amid which talk of identity so often founders. Is "culture" a good? For that matter, does the concept of culture really explain anything? Is diversity of value in itself? Are moral obligations the only kind there are? Has the rhetoric of "human rights" been overstretched? In the end, Appiah's arguments make it harder to think of the world as divided between the West and the Rest; between locals and cosmopolitans; between Us and Them. The result is a new vision of liberal humanism--one that can accommodate the

A classic handbook for anyone who needs to write, *Writing With Power* speaks to everyone who has wrestled with words while seeking to gain power with them. Here, Peter Elbow emphasizes that the essential activities underlying good writing and the essential exercises promoting it are really not difficult at all. Employing a cookbook approach, Elbow provides the reader (and writer) with various recipes: for getting words down on paper, for revising, for dealing with an audience, for getting feedback on a piece of writing, and still other recipes for approaching the mystery of power in writing. In a new introduction, he offers his reflections on the

original edition, discusses the responses from people who have followed his techniques, how his methods may differ from other processes, and how his original topics are still pertinent to today's writer. By taking risks and embracing mistakes, Elbow hopes the writer may somehow find a hold on the creative process and be able to heighten two mentalities--the production of writing and the revision of it. From students and teachers to novelists and poets, *Writing with Power* reminds us that we can celebrate the uses of mystery, chaos, nonplanning, and magic, while achieving analysis, conscious control, explicitness, and care in whatever it is we set down on paper.
