The Languages and Linguistics of the New Guinea Area

A Comprehensive Guide

Where does Japanese come from? The linguistic origin of the Japanese language is among the most disputed questions of language history. One current hypothesis is that Japanese is an Altaic language, sharing a common ancestor with Korean, Tungusic, Mongolic and Turkic. But, the opinions are strongly polarized. Especially the inclusion of Japanese into this classification model is very much under debate. Given the lack of consensus in the field, this book presents a state of the art for the etymological evidence relating Japanese to Korean, Tungusic, Mongolic and Turkic. The different Altaic etymologies proposed in the scholarly literature are gathered in an etymological index of Japanese appended to this book. An item-by-item sifting of the evidence helps to hold down borrowings, universal similarities and coincidental look-alikes to a small percentage. When the remaining core-evidence is screened in terms of phonological regularity, the answer to the intriguing question is beginning to take shape.

The Languages and Linguistics of the New Guinea Area: A Comprehensive Guide is part of the multi-volume reference work on the languages and linguistics of all major

regions of the world. The island of New Guinea and its offshore islands is arguably the most diverse and least documented linguistic hotspot in the world - home to over 1300 languages, almost one fifth of all living languages, in more than 40 separate families, along with numerous isolates. Traditionally one of the least understood linguistic regions, ongoing research allows for the first time a comprehensive guide. Given the vastness of the region and limited previous overviews, this volume focuses on an account of the families and major languages of each area within the region, including brief grammatical descriptions of many of the languages. The volume also includes a typological overview of Papuan languages, and a chapter on Austronesian-Papuan contact. It will make accessible current knowledge on this complex region, and will be the standard reference on the region. It is aimed at typologists, endangered language specialists, graduate and advanced undergraduate students, and all those interested in linguistic diversity and understanding this least known linguistic region.

Mohamad Tavakoli-Targhi offers a corrective to recent works on Orientalism that focus solely on European scholarly productions without exploring the significance of native scholars and vernacular scholarship to the making of Oriental studies. He brings to light a wealth of eighteenth- and nineteenth-century Indo-Persian texts, made 'homeless' by subsequent nationalist histories and shows how they relate to Indo-Iranian modernity. In doing so, he argues for a radical rewriting of Iranian history with profound implications for Islamic debates on gender. Griots at War Conflict, Conciliation, and Caste in Mande Barbara G. Hoffman An extraordinary account of conflict and peacemaking among griots. "... a compelling study of how social identities and relationships are constructed and reconstructed through action, specifically through speech.... The book succeeds marvelously in conveying the voice of the people who are, in every sense of the word, its subject." -- Robert Launay In 1985, while she was an apprentice griot or jelimuso, Barbara G. Hoffman saw and recorded a remarkable event in the small town of Kita, Mali. For four days, thousands of griots from all parts of the Mande world gathered to talk, sing, and make music in celebration of the opening of the new Hall of Griots and the installation of the recently named Head Griot. This unprecedented assembly also marked the end of a deadly two-year conflict fought with griot weapons -- words, reputations, and sorcery. Hoffman captures griots making speeches, singing songs of praise, and dancing in honor of their restored unity. Her discerning interpretations of the speeches not only explore the art of griot oratory but show how the use of history, metaphor, religion, proverbs, and praise can mend a community torn apart by war. The speeches, often marked by a keen edge, also reveal what it means to be a griot in a caste society and to demand that other castes recognize and respect this unique identity. The griot's formidable linguistic abilities come to the fore as they negotiate, reestablish, and assert their cultural power. This exceptional book, including generous extracts from the griots' speeches in Mande and in translation, offers surprising and important insights into the multiple meanings of Mande culture, caste, and identity. Barbara G. Hoffman is Assistant Professor of Anthropology at Cleveland State University. She is author of many essays on Mande culture and producer of ethnographic videos on East and West African cultures. She is known to the Mande griot community as Jeli Jeneba Jabate. This is a moving story of the rise to fame from humble beginnings of one of South Africa's most popular rugby stars, written specifically for young readers. Early on in his life, Siya discovered that rugby could be his route out of the grinding poverty in which he had grown up in the Eastern Cape. He worked hard, made sure he was noticed and managed to secure a scholarship to the prestigious Grey College. But he had to adapt quickly to a world he had never encountered, while keeping his roots in the community that he knew and loved. His hard work and natural ability saw him moving to Cape Town to join the Stormers, trying to break into the Springbok team, and learning to adjust to life at the top of the game that is a national obsession. Siya Kolisi is part of the Road to Glory series, which covers some of South Africa's sporting legends as they set out on their journeys to becoming national and international stars.
