In the middle of the night, a woman awakens to find a stranger in her bedroom. Though she cannot determine who he is--or, indeed, whether he is even real at all and not just an extension of her dreams or her writing--she is drawn into a conversation... The comparative investigation of the acquisition of gender in Spanish by early and late bilinguals of different language combinations is highly debated and crucial as the phenomenon of gender involves grammatical features that differ in all three languages under investigation. Against this background, both early and late bilinguals face an arduous learning task which differs in complexity. Couched within a generative framework, the empirical study focuses on 257 participants with different levels of proficiency in Spanish ranging from low to advanced, and through a series of tests aims to discover which extra-linguistic and intra-linguistic factors act as triggers for non-native outcomes in adult heritage speakers and L2 learners. The observed morphological variability is argued not to stem from a representational (i.e. syntactic) deficit, but rather from a mapping problem in L2 learners and heritage speakers. Successful attainment in terms of gender is possible but dependent on the interplay between various extralinguistic and linguistic factors. Analyzes the diverse roles and pervasive presence of disability in Latin American literature and film. Libre Acceso stages an innovative encounter between disciplines that have remained quite separate: Latin American literary, film, and cultural studies and disability studies. It offers a much-needed framework to engage the representation, construction, embodiment, and contestation of human differences, and provides tools for the urgent resignification of a robust and diverse Latin American literary and filmic tradition. The contributors discuss such topics as impairment, trauma, illness and the body, performance, queer theory, subaltern studies, and human rights, while analyzing literature and film from Argentina, Brazil, Chile, Colombia, Cuba, Mexico, and Peru. They explore these issues through the work of canonical figures Jorge Luis Borges, Gabriel García Márquez, João Guimarães Rosa, and others, as well as less well-known figures, including Mario Bellatin and Miriam Alves.

Have you always wanted to learn how to speak Spanish but simply didn't have the time? Well if so, then, look no further. You can hold in your hands one of the most advanced and revolutionary method that was ever designed for quickly becoming conversational in a language. In creating this time-saving program, master linguist Yatir Nitzany spent years examining the twenty-seven most common languages in the world and distilling from them the three hundred and fifty words that are most likely to be used in real conversations. These three hundred and fifty words were chosen in such a way that they were structurally interrelated and, when combined, form sentences. Through various other discoveries about how real conversations work—discoveries that are detailed further in this book—Nitzany created the necessary tools for linking these words together in a specific way so that you may become rapidly and almost effortlessly conversant—now. If you want to learn complicated grammar rules, or to speak perfectly proper and precise Spanish, this book is not for you. However, if you need to actually hold a conversation while on a trip to a Spanish-speaking country, to impress that certain someone, or to be able to speak with your grandfather or grandmother as soon as possible, then the Nitzany Method is what you have been looking for. This method is designed for fluency in a foreign language, while communicating in the present tense. Nitzany believes that what's most important is actually being able to understand and be understood by another human being right away. This is one of the several, in a series of instructional language guides, the Nitzany Method's revolutionary approach is the only one in the world that uses its unique language technology to actually enable you to speak and understand native speakers in the shortest amount of time possible. Humor and Evil proposes a new approach to invective and comic poetry in Italy during the thirteenth and fourteenth centuries and opens the way for an innovative understanding of Dante’s masterpiece. The Middle Ages in Italy offer a wealth of vernacular poetic invectives–polemical verses aimed at blaming specific wrongdoings of an individual, group, city or institution– that are both understudied and rarely juxtaposed. Modern criticism has generally viewed these poems as disengaged from concrete issues, and as a marginal form of recreation with little ethical value. Also, no study has yet provided a scholarly examination of the connection between this medieval invective tradition, and its elements of humor, derision, and reprehension in Dante’s *Comedy*. This book argues that these comic texts are rooted in and actively engaged with the social, political, and religious conflicts of their time. Political invective has a dynamic ethical orientation that is mediated by a humor that disarms excessive hostility against its individual targets, providing an opening for dialogue. While exploring medieval comic poems by Rustico Filippi (from Florence), Cecco Angiolieri (from Siena), and Folgore da San Gimignano, this study unveils new biographical data about these poets retrieved from Italian state archives (most of these data are published here in English for the very first time), and ultimately shows what the medieval invective tradition can add to our understanding of Dante’s *Comedy*.

Using an innovative framework, this book provides the rationale, strategies, and tools to create optimal blended language learning courses.

Students of Introductory Spanish learn best when they are connecting—with authentic culture, with each other as a community, and with the language as used in real-world settings. Conéctate sparks the curiosity that builds these connections as students drive toward communicative and cultural confidence and proficiency.

The Conéctate program’s distinctive approach is built around the following principles. Focused approach: Conéctate concentrates on what Introductory Spanish students can reasonably be expected to learn, allowing for sustained engagement with the material that respects the natural process of language acquisition. An intentional focus, first on meaning and then on form, puts in action the best practices of second language pedagogy. Plus, Conéctate’s reduced grammar scope leaves more time for the systematic review and recycling of vocabulary and grammar required for students to achieve mastery of first-year skills. Fortifying this process at every turn is LearnSmart™, a powerful, super-adaptive learning program that guides students on an individualized path toward mastery of all the vocabulary and grammar in Conéctate. Active learning: Conéctate gives students the opportunity to explore language and culture through interactive activities that keep them focused and engaged. Vocabulary and grammar in Conéctate are taught using an active learning approach, nudging students to discover new vocabulary and language rules through a carefully balanced mix of inductive and explicit presentations and hands-on learning. Students are similarly asked to take an active role in an immersive online game, Practice Spanish: Study Abroad, designed around a study abroad experience in which they leverage their language and cultural skills to accomplish tasks and solve problems in various real-world scenarios. Integration of culture: Building on the active learning theme, students develop and apply critical thinking skills as they draw personal conclusions about the rich culture presented throughout Conéctate. Culture is embedded within the language activities themselves, included in notes that expand on the activity at hand, and seen through the integrated video that forms the basis for many activities in each chapter of the text. This authentic, unscripted video introduces students to useful chunks of language, real-world Spanish, and a wide range of topics related to cultural themes. Conéctate’s stunning video was shot in Spain, Panama, Miami, Argentina, Costa Rica, and Mexico, and exposes students to a wide variety of people in each country who discuss topics that are familiar and engaging to students. Mobile Tools for Digital Success: The digital tools available in the Connect Spanish platform with Conéctate also successfully promote student progress by providing extensive opportunities to practice and hone their developing skills. Rutas, Student Edition: Intermediate Spanish

The new essays in this collection, on such diverse writers as Eugene O'Neill, Susan Glaspell, Thornton Wilder, Arthur Miller, Maurine Dallas Watkins, Sophie Treadwell, and Washington Irving, fill an important conceptual gap. The essayists offer numerous approaches to intertextuality: the influence of the poetry of romanticism and Shakespeare and of histories and novels, ideological and political discourses on American playwrights, unlikely connections between such writers as Miller and Wilder, the problems of intertexts in translation, the evolution in historical and performance contexts of the same tale, and the relationships among feminism, the drama of the courtroom, and the drama of the stage. Intertextuality has been an under-explored area in studies of dramatic and performance texts. The innovative findings of these scholars testify to the continuing vitality of research in American drama and performance.

How can a song help the hungry and persecuted to survive? Stephanie Sieburth's Survival Songs explores how a genre of Spanish popular music, the copla, as sung by legendary performer Conchita Piquer, helped Republican sympathizers to survive the Franco regime's dehumanizing treatment following the Spanish Civil War (1936-39). Piquer's coplas were sad, bitter stories of fallen women, but they offered a way for the defeated to cope with chronic terror, grief, and trauma in the years known as the "time of silence." Drawing on the observations of clinical psychotherapy, Sieburth explores the way in which listening to Piquer's coplas enabled persecuted, ostracized citizens to subconsciously use music, role-play, ritual, and narrative to mourn safely and without fear of repercussion from the repressive state. An interdisciplinary study that includes close readings of six of Piquer's most famous coplas, Survival Songs will be of interest to specialists in modern Spanish studies and to clinical psychologists, musicologists, and those with an interest in issues of trauma, memory, and human rights.

This book focusses on new technologies and multi-method research designs in the field of modern archaeology, which increasingly crosses academic boundaries to investigate past human-environmental relationships and to reconstruct palaeolandscapes. It aims at establishing the concept of Digital Geoarcheology as a novel approach of interdisciplinary collaboration situated at the scientific interface between classical studies, geosciences and computer sciences. Among others, the book includes topics such as geographic information systems, spatiotemporal analysis, remote sensing applications, laser scanning, digital elevation models, geophysical prospecting, data fusion and 3D visualisation, categorized in four major sections. Each section is introduced by a general thematic overview and followed by case studies, which vividly illustrate the broad spectrum of potential applications and new research designs. Mutual fields of work and common technologies are identified and discussed from different scholarly perspectives. By stimulating knowledge transfer and fostering interdisciplinary collaboration, Digital Geoarchaeology helps generate valuable synergies and contributes to a better understanding of ancient landscapes along with their forming processes. Chapters 1, 2, 6, 8 and 14 are published open access under a CC BY 4.0 license at link.springer.com.

The two volumes examine a fascinating set of memoirs and autobiographies written by a variety of authors. It includes famous persons such as Hellen Keller and Temple Grandin, as well as others likely unknown beyond the world of disability studies, such as John M. Hull (who relates his experience of going blind) and Kay Redfield (who relates her experience with bipolar disorder). Each of 200 entries examines a particular author and literary work (e.g., Christy Brown, My Left Foot). The entry provides biographical, historical, and literary context around the author/work and elucidates the role the text has played within disability memoir. The works selected bear most directly on disability studies proper but also provide rich topics of study for sociology and anthropology courses, minority and gender studies, and English literature studies. Additionally, this publication offers physicians, nurses, and teachers a unique tool in their professional developments to gain insights into the lives of those whom they serve. G. Thomas Couser (Founding Director of the Disability Studies Program, Hofstra University and a leading expert in disability memoir) has joined Susannah Mintz (Professor of English and Disability Studies, Chair of English Department, Skidmore College) to determine the contents and provide peer review on this work. A comprehensive, annotated list of disability memoir is included in an appendix.
