From start to finish, dullness never enters into the book, Tricks and Traps flow as the strays strive to survive to walk the stage. Unknown assistants play a small part, but in a major way. Kara knew she could reach the summit of Mt. Kilimanjaro. She had done it once before. That's why, when she failed in a second attempt, it brought her so low. As she struggled with food addiction and looked for ways to cope with feelings of failure and shame, Kara's weight shot to more than 300 pounds. Deep in her personal gorge, Kara realized the only way out was up. She resolved to climb

the mountain again—and this time, she would reach the summit without waiting for her plus-sized status to disappear.

Gorge: My Journey Up

Kilimanjaro at 300 Pounds is the raw story of Kara's ascent from the depths of self-doubt to the top of the world. Her difficult but inspiring trek speaks to every woman who has struggled with her self-image or felt that food was controlling her life. Honest and unforgettable, Kara's journey is one of intense passion, endurance, and self-acceptance. In Gorge, Kara shows that big women can do big things.

How English Class Can Teach Teens to Improve Their Relationships, Friendships, and Communities

The Nine Rules of Wealth You Should Have Learned in School

When children experience upheaval and trauma, adults often view them as either vulnerable and helpless or as resilient and able to easily “bounce back.” But the reality is far more complex for the children and youth whose lives are suddenly upended by disaster.

How are children actually affected by catastrophic events and how do they cope with the damage and disruption? Children of Katrina offers one of the only long-term, multiyear studies of young people following disaster. Sociologists Alice Fothergill and Lori Peek spent seven years after Hurricane Katrina interviewing and observing several hundred children and their family members, friends, neighbors, teachers, and other caregivers. In this book, they focus intimately on seven children between the ages of three and eighteen, selected because they exemplify the

varied experiences of the larger group. They find that children followed three different post-disaster trajectories—declining, finding equilibrium, and fluctuating—as they tried to regain stability. The children’s moving stories illuminate how a devastating disaster affects individual health and well-being, family situations, housing and neighborhood contexts, schooling, peer relationships, and extracurricular activities. This work also demonstrates how outcomes were often worse for children who were vulnerable and living in crisis before the storm. Fothergill and Peek clarify
