

Telkom Learnerships For 2015

La 4e de couv. indique : "Learning to read and write for meaning and pleasure are arguably the two most important competences that children acquire in primary school. Yet, in 2019 more than one half of children worldwide do not reach this first rung on the literacy ladder. Improving Early Literacy Outcomes aims to address this head-on, by foregrounding the work of more than 40 researchers, most of them living in, and working on, developing countries. Through probing analyses of research, policy, and practice, the book highlights the common experiences of high aspirations repeatedly confronting harsh realities. Sixteen interconnected chapters cast an ever-vigilant and deflationary eye on the temptation to take an unrealistic approach to early literacy, and also caution against lumping all languages, contexts, and policy-challenges into a single heap."

This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling: from financing and policy reform to in-depth discussions of literacy, numeracy, teacher development and curriculum change. The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with: Are there different and preferential equilibria we have not yet thought of or explored, and if so what are they? In practical terms, how does one get to a more equitable distribution of teachers, resources and learning outcomes? While decidedly local, these questions resonate throughout the developing world. South Africa today is the most unequal country in the world. The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth. This is the largest 90-10 gap in the world, and one that is reflected in the schooling system. Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard-work and determination, but instead by the colour of their skin, the province of their birth, and the wealth of their parents. Looking back on almost three decades of democracy in South Africa, it is this stubbornness of inequality and its patterns of persistence that demands explanation, justification and analysis. "This is a landmark book on basic education in South Africa, an essential volume for those interested in learning outcomes and their inequality in South Africa. The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race, class, and place. The book brings together the wealth of decades of research output from top quality researchers to explore what has improved, what has not, and why." Prof Lant Pritchett, Harvard University "There is much wisdom in this collection from many of the best education analysts in South Africa. No surprise that they conclude that without a large and sustained expansion in well-trained teachers, early childhood education, and adequate school resources, South Africa will continue to sacrifice its people's future to maintaining the privileges of the few." Prof Martin Carnoy, Stanford University "Altogether, one can derive from this very valuable volume, if not an exact blueprint for the future, then certainly at least a crucial and evidence-based itinerary for the next few steps." Dr Luis Crouch, RTI

Rebels and Rage

Adam Habib, the most prominent and outspoken university official through the recent student protests, takes a characteristically frank view of the past three years on South Africa's campuses in this new book. Habib charts the progress of the student protests that erupted on Wits University campus in late 2015 and raged for the better part of three years, drawing on his own intimate involvement and negotiation with the students, and also records university management and government responses to the events. He critically examines the student movement and individual student leaders who emerged under the banners #feesmustfall and #Rhodesmustfall, and debates how to achieve truly progressive social change in South Africa, on our campuses and off. This book is both an attempt at a historical account and a thoughtful reflection on the issues the protests kicked up, from the perspective not only of a high-ranking member of university management, but also Habib as political scientist with a background as an activist during the struggle against apartheid. Habib moves between reflecting on the events of the last three years on university campuses, and reimagining the future of South African higher education. Adam Habib, the most prominent and outspoken university official through the recent student protests, takes a characteristically frank view of the past three years on South Africa's campuses in this new book. Habib moves between reflecting on the events of the last three years on university campuses, and reimagining the future of South African higher education.

South Africa: Past, Present, and Future generates discussion and interest in a country that is rich in both material and cultural resources. The anthology provides a well-rounded look at South Africa from diverse perspectives, and places South Africans at the center of their history. The three sections of the book detail the history of South Africa including its historical and cultural roots as a great country within the family of nations, apartheid and its collapse, and the country after apartheid as South Africans struggle to reconcile and reconstruct a democratic "Rainbow Nation." The selected readings address a variety of topics including the land reform crisis, the fight for justice for women, the role of capitalism, and South Africa's political parties. Each selection is framed by an original introduction to contextualize the readings, post-reading commentary, and review questions. South Africa: Past, Present, and Future offers readers in-depth, accurate information. The anthology is designed for courses that study the history and politics of the country and the region. It is also an excellent text for courses that examine the relationship between the United States and South Africa.

A Study of the Present Situation and Future Possibilities

Integrating information and communication technologies (ICTs) into governance processes can greatly enhance the delivery of public services to all citizens. ICT integration will not only improve the performance of governance systems, it will also transform relationships amongst stakeholders, thereby influencing policymaking processes and regulatory frameworks. In the developing world, however, the potential of ICTs for effective governance remains largely unexplored and unexploited. This book presents the context, theory, and current thinking on the interaction between ICTs and local governance, particularly in Africa. It discusses the shift from OC governmentOCCO to OC e-governance, OCCO describes the role of local-level authorities, and presents the benefits and limitations of introducing ICTs in government operations. Case studies from Ghana, Senegal, South Africa, and Uganda describe local governanceICTs projects executed by civil society organizations, academic institutions, and government authorities. Drawing from the findings in these case studies and from the introductory research and original conceptual framework, the book presents a series of conclusions and recommendation on the future of effective ICTs use for better governance and improved economic development at the local level. This book will be of interest to professionals, practitioners, and policy advisors at local and national government levels in developing countries (particularly in Africa); international organizations staff, bilateral aid agencies, international financial institutions, civil society organizations, and private sector; researchers, academics, students, and professors of public administration and governance in Africa and throughout the world."

What does it mean to be a performing arts leader? Leadership in the Performing Arts addresses and analyzes this question by presenting the wisdom and expertise of eleven men and women with experience leading nonprofit performing arts institutions in the United States. These successful leaders provide many real-world examples of business practices that may be generally applied by practitioners in our field, and throughout the nonprofit sector. The book examines: The leader's career path and professional growth The leader's vision Leadership styles and the importance of interpersonal skills Setting and executing organizational priorities Leading decision-making and communication processes Creating change and innovation Challenges faced in leading an institution Interviewees include: Kathy Brown, executive director of the New York City Ballet; Peter Gelb, general manager of the Metropolitan Opera; Heather Hitchens, president of the American Theatre Wing; Karen Brooks Hopkins, president and chief executive officer of the Brooklyn Academy of Music; Timothy J. McClimon, president of the American Express Foundation; Laura Penn, executive director of the Stage Directors and Choreographers Society; Arlene Shuler, president and chief executive officer of New York City Center; Paul Tetreault, director of Ford's Theatre; Nancy Umanoff, executive director of the Mark Morris Dance Group; Patrick Willingham, executive director of The Public Theater; and Harold Wolpert, managing director of the Roundabout Theatre Company. Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don't aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

Tools for Inventive Thinking presents exciting, innovative recipes from a well-known figure in the culinary world. Enjoy uniquely presented traditional African cuisine with international flair, all tied together by the common element of ingredients that are organic, natural and sustainable. Elegantly produced with full colour photographs throughout.

Collaboration is increasingly difficult and increasingly necessary. Often, to get something done that really matters to us, we need to work with people we don't agree with or like or trust. Adam Kahane has faced this challenge many times, working on big issues like democracy and jobs and climate change and on everyday issues in organizations and families. He has learned that our conventional understanding of collaboration—that it requires a harmonious team that agrees on where it's going, how it's going to get there, and who needs to do what—is wrong. Instead, we need a new approach to collaboration that embraces discord, experimentation, and genuine cocreation—which is exactly what Kahane provides in this groundbreaking and timely book.

A faith based 12 Step program... Directed toward those trapped in the labyrinth of eating disorders, their families, and their therapists, the text lays out in detail the steps taken, the tools used, the love that grew and the healing received. Illustrated with true-life experience and complete with a compilation of personal stories by individual members.

Twenty years after the introduction of BEE, Phinda Madi believes it's time to reflect on its success. Clear trends can now be discerned and there are numerous lessons to be learned. He contends there is an unfortunate narrative that is gaining traction in South Africa generally and in the corporate world in particular, that BEE has been nothing but a "csmoke-and-mirrors": initiative towards oligarchy, hence the chosen title: BEE 20 years later - The Baby and The Bathwater. As the title suggests, there is a tendency to want to 'throw the baby out with the bathwater'. His book argues that we need to make a clear distinction between the bouncing baby and the (at times) dirty bathwater. This book puts forward a very frank, clinical and balanced argument on how this distinction needs to be made, as well as why and how we should ensure the baby both survives and thrives going forward, whilst getting rid of the ugly side of BEE (the dirty bathwater). But more importantly, he examines how to restore the credibility of this process, so it truly and genuinely moves away from just being seen as the enrichment of the few and lives up to its true promise: The economic empowerment of the many. This is the book that will ignite the change in BEE in South Africa!

In theory foreign direct investment allows developing countries to integrate with international markets and develop their economies. However sometimes the benefits are less than expected and countries use performance requirements in an attempt to improve the situation. These requirements can be contentious, as developed countries often associate them with interventionist strategies whilst developing countries see them as tools previously used by the developed countries when they were industrialising. This book is a contribution to the debate based on four case studies (Chile, India, Malaysia, South Africa) and the experience of the developed world.

Global growth is in low gear, and the drivers of activity are changing. These dynamics raise new policy challenges. Advanced economies are growing again but must continue financial sector repair, pursue fiscal consolidation, and spur job growth. Emerging market economies face the dual challenges of slowing growth and tighter global financial conditions. This issue of the World Economic Outlook examines the potential spillovers from these transitions and the appropriate policy responses. Chapter 3 explores how output comovements are influenced by policy and financial shocks, growth surprises, and other linkages. Chapter 4 assesses why certain emerging market economies were able to avoid the classical boom-and-bust cycle in the face of volatile capital flows during the global financial crisis.

Study & master economic and management sciences grade 8 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in economic and management sciences.

The supply chain is at the heart of every successful business organization's decision-making process. This textbook explains how to create a winning supply chain management strategy by spotlighting how senior executives in European and US companies have turned their supply chains into strategic weapons designed to convert threats, risks and outside pressures into competitive advantages. Strategic Supply Chain Management contains twenty real-world cases, all of which have been field researched by a top author team and tested out in the classroom. Each case adopts an executive leadership perspective to illuminate the real dilemmas faced by managers. The authors draw on their extensive classroom and industry experience to ensure that the writing style is geared towards an executive education readership. This elite case package will provide a complete teaching resource and authentic learning experience for MBA and executive education classes in Supply Chain Management throughout the world.
