The Easier English Basic Dictionary" is designed especially for elementary and pre-intermediate students of English. It includes the basic vocabulary needed to understand and study written English at this level, and is particularly useful for students taking the Preliminary English Test the Key English Test (KET) exams. Clear notes on grammar, irregular verbs and easily confused as well as pronunciations for all entries make this a valuable aid to students of English." This book is a timely guide for Small and Medium Enterprise (SME) researchers, policy makers strategists. SMEs are the most important sources of job creation and local development especially knowledge-based economies. As turbulence in the globalized economies expands SMEs will have to learn to sustain competitiveness by developing their 'dynamic capabilities'. Based on the findings of a 4-year European and Latin American research project, this book provides a theoretical framework and practical instruments and cases on how SMEs in diverse economic, social and cultural contexts can develop crisis resilience, increase agility, innovate and thus successfully compete in turbulent markets. Written for students taking courses in building and surveying, 'Estimating for Builders and Surveyors' describes and explains the method used by the estimator to build up prices or rates for items in the SMM7 format. Each chapter is a self-contained unit related to a particular element in the building. Worked examples throughout reflect both traditional and up-to-date technology. Written by an author team of academics and professional surveyors, this book continues to be an invaluable introduction to the subject of estimating.

Making and Taking in the Global Economy

English, Italian, French and German

Known as the bible of biomedical engineering, The Biomedical Engineering Handbook, Fourth Edition, sets the standard against which all other references of this nature are measured. As such, it has served as a major resource for both skilled professionals and novices to biomedical engineering. Biomedical Engineering Fundamentals, the first volume of the handbook, presents material from respected scientists with diverse backgrounds in physiological systems, biomechanics, biomaterials, bioelectric phenomena, and neuroengineering. More than three dozen specific topics are examined, including cardiac biomechanics, the mechanics of blood vessels, cochlear mechanics, biodegradable biomaterials, soft tissue replacements, cellular biomechanics, neural engineering, electrical stimulation for paraplegia, and visual prostheses. The material is presented in a systematic manner and has been updated to reflect the latest applications and research findings.

West meets East Although Maya has done her best to avoid it, she is spending part of her summer in Chennai, India, with her mother, who is trying to sell her grandfather's old house. Soon Maya is drawn into a complicated friendship with eccentric Kamala Mami, who has been a housekeeper and cook for years in Maya's extended family. At the same time, Maya is thrust into an ocean of memories, all coming at her too quickly for her to understand. In particular, she is forced to examine the history of her parents' divorce -- all the more painful because she believes the trouble began with the choosing of her name. For years the tension has simmered in a cauldron of anxiety, secrets, and misunderstandings. It is only with the help of Kamala Mami and Maya's cousin Sumati that Maya is able to see what happened to her parents. In this compelling first novel, a young Indian American girl finally learns that she can choose which memories to keep and which

to let go.

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible.

Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. How to Eliminate Bureaucratic Red Tape, Bad Excuses, and Corporate Bullshit

"This document builds on the brief paper presented at the 7th Meeting of the UN-REDD Programme Policy Board, held in Berlin, October 2011 (UNREDD/PB7/2011/13), which lays out ways to consider the REDD+ monitoring and information provision needs in the broader context of national development and environmental strategies, at the implementation level. The purpose of this document is to describe the elements in National Forest Monitoring Systems (NFMSs) as they relate to REDD+ under the United Nations Framework Convention on Climate Change (UNFCCC) and to describe the UN-REDD Programme approach to Monitoring and Measurement, Reporting and Verification (M & MRV) requirements."--Page v.

This book provides a bridge between the introductory research methods books and the discipline-specific, higher level texts. Its unique feature is the coverage of the detailed process of research rather than the findings of research projects. Chapter authors have been carefully selected by their expertise, discipline and location to give an eclectic range of perspectives. Particular care has been

taken to balance positivist with interpretivist approaches throughout. The authors focus is on the practical consequences of research philosophies, strategies and techniques by using their own research and by evaluating the work of others. *Advanced Research Methods in the Built Environment* addresses common topics raised by postgraduate level researchers rather than dealing with all aspects of the research process. Issues covered range from the practicalities of producing a journal article to the role of theory in research. The material brought together here provides a valuable resource for the training and development of doctoral and young researchers and will contribute to a new sense of shared methodological understanding across built environment research.

This is a short book of experimental poetry by Maria Morisot, also known as Moan Lisa.

The Global Investment Competitiveness Report 2019-2020 provides novel analytical insights, empirical evidence, and actionable recommendations for governments seeking to enhance investor confidence in times of uncertainty. The report's findings and policy recommendations are organized around "3 ICs" - they provide guidance to governments on how to increase investments' contributions to their country's development, enhance investor confidence, and foster their economies' investment competitiveness. The report presents results of a new survey of more than 2,400 business executives representing FDI in 10 large developing countries: Brazil, China, India, Indonesia, Malaysia, Mexico, Nigeria, Thailand, Turkey, and Vietnam. The results show that over half of surveyed foreign businesses have already been adversely affected by policy uncertainty, experiencing a decrease in employment, firm productivity, or investment. Foreign investors report that supporting political environments, stable macroeconomic conditions, and conducive regulatory regimes are their top three investment decision factors. Moreover, the report's new global database of regulatory risk shows that predictability and transparency increase investor confidence and FDI flows. The report also assesses the impact of FDI on poverty, inequality, employment, and firm performance using evidence from various countries. It shows that FDI in developing countries yields benefits to their firms and citizens-including

more and better-paid jobs-but governments need to be vigilant about possible adverse consequences on income distribution. The report is organized in 5 chapters: Chapter 1 presents the results of the foreign investor survey. Chapter 2 explores the differential performance and development impact of greenfield FDI, local firms acquired by multinational corporations (i.e. brownfield FDI), and domestically-owned firms using evidence from six countries. Chapter 3 assesses the impact of FDI on poverty, inequality, employment and wages, using case study evidence from Ethiopia, Turkey and Vietnam. Chapter 4 presents a new framework to measure FDI regulatory risk that is linked to specific legal and regulatory measures. Chapter 5 focuses on factors for increasing the effectiveness of investment promotion agencies.

The papers in this text cover both the military and commercial aspects of GSE in order that the full potential of all aircraft development is achieved.

Oxford Textbook of Palliative Care for Children

"I had the privilege of going to Standing Rock twice. The strength and power that came from the women there inspired this book. To be a woman is to be a life giver and water protector. Even if you never have children, you have that sense, and the duty to honour and protect the water is within you," writes Traverse.

This summary of UNEP's activities in 2008 provides an overview of the organization's contribution to the fight against climate change in a year in which unequivocal evidence established that global warming is the defining challenge of our era. The report also looks at the broad range of other activities carried out by UNEP as it follows its mandate to provide environmental leadership and promote sustainable development.

A concise and practical guide to caring for children with life-limiting conditions, Paediatric Palliative Care covers the common symptoms and challenging issues healthcare professionals are likely to encounter, and includes a detailed drug formulary for quick reference.

Project Evaluation and Development

Monitoring and Measurement, Reporting and Verification (M & MRV) in the Context of REDD+ Activities

Comprehensive in scope, exhaustive in detail, and definitive in authority, this third edition has been thoroughly updated to cover new practices, current epidemiological data, and the evolving models that support the delivery of palliative medicine to children. This book is an essential resource for anyone who works with children worldwide.

This CIGRE Green Book provides the entire know-how about switches in a high voltage system.

The switching equipment includes circuit breakers, vacuum interrupters, disconnecting switches, and earthing switches used in AC & DC transmission and distribution systems. The Green book describes different switching equipments and their roles in the power systems. It explains the fundamental switching behaviors in power systems targeted for practitioners and students and joining electrical industries. The Green book also covers fundamental specific subjects including DC circuit breakers, controlled switching, fault current limiting devices and future technologies. Like all Green books, this book covers the cumulative understanding of numerous experts in the CIGRE study committee. It offers the approved and outstanding practical knowledge of CIGRE Study committee A3 and was collected by Dr. Hiroki Ito.

It is important for all those involved in development work to be fully aware of the total environment in which projects are conceived and executed. Here, for students and practitioners of building, building surveying, quantity surveying and related professions is an outline of the factors affecting the conception, design, construction and use of buildings.

Where's the common sense? During the COVID-19 pandemic, the TSA is allowing passengers to board planes with unlimited amounts of hand sanitizer, while maintaining its 3.4-ounce limit on all other liquids. You need a chainsaw to pry open your new pair of headphones from their package. Your eighth Zoom meeting of the day keeps freezing, and if you hear "No, wait; no, you go first" again, you will implode. But first you have to sit through an endless PowerPoint presentation that everyone claims they've read - no one has - that could have been summarized in one page. What has happened to common sense? And how can we get it back? Companies, it seems, have become so entangled in their own internal issues and beset by reams of invisible red tape (and frozen screens) that they've lost sight of their purpose and culture. Inevitably, we pay the price. New York Times best-selling author Martin Lindstrom combines numerous real-life examples of corporate common sense gone wrong with his own ingenious plan for restoring logic - and sanity - to the companies and people who need it most. A must-read for today's executives, managers, and office workers, *The Ministry of Common Sense* is funny, entertaining, and immensely practical. 'Essential reading for all of us who feel bogged down in workplace bureaucracy and wish to improve our quality of life at work.' - Arianna Huffington, Founder & CEO, Thrive Global 'Anyone who has ever worked in a big corporate structure will be nodding along and underlining every page in this book...Martin Lindstrom...offers a plan for eradicating internal nonsense - the sorts of risk-averse protocols and admin tasks that show a company has lost all sight of common sense. There are lots of good examples and farcical anecdotes here.' - Financial Times Business Book of the Month

The everchanging and renewing life concept and lifestyle of people bring about more and more requirements for the overall qualities of houses and the demands for residences have marched towards the psychological dimension and cultural sphere. Consequently, there arise new design trend and new requirements for environment, material selection and design concept. The design projects in this book lead readers to perceive the comfort and cosiness of the natural space. The designers of these projects have created more natural, and convenient living

spaces in the most natural and purest design languages, giving them a comprehensive and vivid explanation of the architecture design concept that buildings are born for human.

ICT PEP 2020 conference is a platform for policymakers from government, researchers from national & international energy research institutes, academicians from university as well as managers and engineers from the industry to share ideas and research results that related to these issues. Specific discussion on application of IR 4.0 technologies including artificial intelligence and cyber security will also be conducted during this conference.

Enhancing Board Effectiveness seeks to examine the conceptualization and role of the board in a variety of contexts and articulate solutions for improving the effectiveness of the board, especially in developing and emerging markets. Enhancing Board Effectiveness will therefore address the following central questions: To what extent is the concept and role of the board evolving? What rights, powers, responsibilities and other contemporary and historical experiences can enhance the effectiveness of the board, especially in the particular contexts of developing and emerging markets? What socio-economic, political, regulatory and institutional factors/actors influence the effectiveness of the board and how can the policies and practices of such actors exert such influences? In what ways can a reconstructed concept of the board serve as a tool for theoretical, analytical, regulatory and pragmatic assessment of its effectiveness? In examining these issues, Enhancing Board Effectiveness will investigate theoretical, socio-economic, historical, empirical, regulatory, comparative and inter-disciplinary approaches. Academics in the relevant fields of accounting, behavioural psychology/economics, development studies, financial regulation, law and management/organizational studies, political economy and, public administration will find this book of high interest.

Learn about elephants' bodies, habitat, behaviors, and more through engaging text and beautiful full-color photography in All About Elephants. This book is part of our Read Together series, a collection of books designed to be enjoyed by a young reader paired with a more experienced reader, such as a parent, grandparent, or older sibling. Take turns reading out loud together. The pages on the left are meant for the younger reader and use short, simple sentences and large print. The pages on the right are for the older reader. They contain paragraphs with longer sentences and more complex vocabulary. Build confidence and make learning fun as you find out all about elephants when you Read Together!

On the seventy-fifth anniversary of the United Nations, the world has faced its biggest shared challenge since the Second World War in the coronavirus disease (COVID-19) pandemic. Yet while our welfare, and indeed the permanence of human life, depend on us working together, international cooperation has never been harder to achieve. This report answers a call from UN Member States to provide recommendations to advance our common agenda and to respond to current and future challenges. Its proposals are grounded in a renewal of the social contract, adapted to the challenges of this century, taking into account younger and future generations, complemented by a new global deal to better protect the global commons and deliver global public goods. Through deepening of solidarity—at the national level, between generations, and in the multilateral system—Our Common Agenda provides a path forward to a greener, safer and better future.

WINNER OF THE 2019 MADAME DE STAËL PRIZE AND THE 2018 LEONTIEF

PRIZE FOR ADVANCING THE FRONTIERS OF ECONOMIC THOUGHT

SHORTLISTED FOR THE FT & MCKINSEY BUSINESS BOOK OF THE YEAR 2018

Who really creates wealth in our world? And how do we decide the value of what they do? At the heart of today's financial and economic crisis is a problem hiding in plain sight. In modern capitalism, value-extraction is rewarded more highly than value-creation: the productive process that drives a healthy economy and society. From companies driven solely to maximize shareholder value to astronomically high prices of medicines justified through big pharma's 'value pricing', we misidentify taking with making, and have lost sight of what value really means. Once a central plank of economic thought, this concept of value - what it is, why it matters to us - is simply no longer discussed. Yet, argues Mariana Mazzucato in this penetrating and passionate new book, if we are to reform capitalism - radically to transform an increasingly sick system rather than continue feeding it - we urgently need to rethink where wealth comes from. Which activities create it, which extract it, which destroy it? Answers to these questions are key if we want to replace the current parasitic system with a type of capitalism that is more sustainable, more symbiotic - that works for us all. The Value of Everything reignites a long-needed debate about the kind of world we really want to live in.
