power-packed information on 246 projects from 66 sectors of the Indian economy. In this issue we have covered 43 projects in Conceptual/Planning Stage, 48 Contract Awards, 42 Projects Under Implementation, 104 Tenders, and 9 other projects. The project information is provided along with nearest contacts as available in the public domain to facilitate B2B exchange. Each issue of ProjectX India series provides you with information on new projects & ongoing projects from India, Contract Awards, Project Updates, Commissioned Projects and Tenders. This e-book serves to all those who are interested to know and tap the project opportunities in the Construction, Infrastructure, and Industrial segment. The aim is to serve you with the right information on upcoming and ongoing projects, contracts, and tenders from India. The business opportunities are coming to the fore each day, and we, at ProjectX India, are eager to grab and provide the information which can make a difference to your business. Identify the right project through ProjectX India and accelerate your business. Thank You and

Criteria for Prestressed Concrete Bridges

Identity and Gender in India, South Africa, the USA and the UK

Economic and Political Weekly

Using data from the World Values Survey, this book sheds light on the link between happiness and the social group to which one belongs. The work is based on a rigorous statistical analysis of differences in the probability of happiness and life satisfaction between the predominant social group and subordinate groups. The cases of India and South Africa receive deep attention in dedicated chapters on cast and race, with other chapters considering issues such as cultural bias, religion, patriarchy, and gender. An additional chapter offers a global perspective. On top of this, the longitudinal nature of the data facilitates an examination of how world happiness has evolved between 1994 and 2014. This book will be a valuable reference for advanced students, scholars and policymakers

involved in development economics, well-being, development geography, and sociology.

First published in 1982. The sharp increase in the price of imported oil in the early 1970s generated much interest in the economic impact of large oil price hikes and related energy price increases. The main focus is on oil, and Dr. Feldman's monograph is a needed contribution, revealing the quantitative price impacts of recent oil price shocks in great detail.

OIL & GAS JOURNAL

Proceedings of the 6th European Lean Educator Conference

Retail ventures become successful due to a variety of reasons but major dilemma for retail entrepreneurs is the secret formula for continued success. The book provides the entire gamut of carefully crafted success themes which covers the retail business in its entirety. Competition gives the benefit of large product range, brands and competitive prices To The buyers. Retail management is similar To The comprehensive management of a luxury liner that calls for round the clock operations. Retail operations

starting from vendor and retailer selections through which the business gets its full impact when the customer gets the product/brand he wants, where he wants and when he wants. Virtual determinants of retail success have been thoroughly covered in the book besides the regular retail business areas the book describe retail entrepreneurs selection of dealers, their motivation for selling their products in preference to competitive brands. Sales calls made on retailers by the principles, including call objective, call planning, call closure and feedback are highlighted For The benefit of the readers.

This book gathers selected peer-reviewed papers presented at the 6th European Lean Educator Conference (ELEC), held in Milan, Italy, on November 11-13, 2019. The conference topics include the following: lean trainings in university and industry collaborations; lean product and process development; lean and people empowerment; emerging contexts for lean applications; measuring lean performance; lean, green and circular; continuous improvement initiatives; lean thinking in practice; organizational culture in lean journeys; and innovative training approaches to teaching lean management. The contributions explore the latest academic and industrial findings on and advances in lean education, and identify innovative methods that allow lean thinking benefits to be achieved

in practice. As such, the book presents the outcomes of a fruitful exchange between academia and industry designed to help train the next generation of lean educators.

Guidance on Good Practice

A Queen's Story

Petroleum is a substance that occurs naturally in a yellowish-black form. It is found in a liquid form in the geological formations underneath the Earth's surface. It includes all solid, liquid and gaseous hydrocarbons as well as crude oil. Under surface temperature and pressure, pentane and other heavier hydrocarbons exist in solid and liquid forms. Under the same conditions the lighter hydrocarbons such as methane, propane, ethane and butane exist in gaseous forms. Petroleum is a fossil fuel that is obtained from the ancient fossilized

organic materials such as zooplankton and algae. Petroleum formation is the result of the hydrocarbon pyrolysis at high temperature and pressure in a number of endothermic reactions. Alkenes, asphalt, lubricants, aromatic petrochemicals and paraffin wax are a few of the useful products derived from the mixture of hydrocarbon and non-hydrocarbons. The excessive use of petroleum as a fuel is a threat to the environment. It is a major cause of global warming and ocean acidification. This book contains some path-breaking studies in the field of petroleum science and technology. Most of the topics introduced herein cover new techniques and the applications of this field. It will help the readers in keeping pace with the rapid changes in this area.

Internet of Things with 8051 and ESP8266 provides a platform to get started with the Internet of Things (IoT) with 8051. This book describes programming basics and how devices interface within designed systems. It presents a unique combination of 8051 with ESP8266 and I/O devices for IoT applications supported by case studies to provide the solutions to real-time problems. The programs and circuits have been tested on real hardware and

explore different areas in IoT applications. Divided into four sections, it explains the customized boards for IoT applications followed by the means by which 8051 and ESP8266 interface with I/O devices. It spans levels from basic to advanced interfacing with special devices, server design, and data logging with different platforms. Features: Covers how I/O devices interface with 8051 and ESP8266 Explains the basic concepts of interfacing complexity using applications with examples Provides hands-on practice exercises with 8051 and ESP8266 for IoT applications Discusses both case studies and programming tests on real hardware during industrial and student projects Reviews the integration of smart devices with IoT Internet of Things with 8051 and ESP8266 is intended for senior undergraduate and graduate students in electrical and electronics engineering, but anyone with an interest in the professional curriculum of electrical and electronics engineering will find this book a welcome addition to their collection.

The Geopolitics of Gas

Transportation of Liquefied Natural Gas

This book shares the latest market developments and advances in natural gas demand, supply, transmission, distribution, and consumption, with a special emphasis on the Indian context. Chapters are written by researchers and industry professionals working in the field of natural gas and energy to provide deeper insights into natural gas market structure, market development, business opportunities and market growth. Topics covered include, natural gas demand-supply, exploration and production policy, downstream regulatory developments, city gas distribution, pipeline, pricing, and taxation policies impacting natural gas market developments in India. The book will be useful to researchers, professionals, and policy makers working in the area of natural gas and related fields. Helps you to make a risk assessment on whether you need a R0SOV and details the steps for implementation. This title is suitable for operators and managers of installations which handle, store or process hazardous substances, as well as plant supervisors, design, process and maintenance engineers and safety professionals.
