David Bourbon faces challenges as a kid growing in the 1960s. He learns about life and death at age five, and again as a teenager. David grows up like other baby boomers in an era of change—The Cuban Missile Crisis, school integration, Sputnik, The Beatles, The Pill, and an emerging war in Vietnam. Childhood experiences forge his views on a range of issues from nature to war. He feels the pain of a traumatic event that forever changes how he treats other people. His grandparents and WWII parents provide an anchor for life's challenges. On the first day of football practice in August 1962, a line of black football player's faces stare at a row of white faces. David and his teammates are standing in the line of white faces. An all-black Dunbar High School is integrating with an all-white Hopewell High School. We wonder how this experiment will work out. Who will start and who will quit? Are we stronger as one team or separate? Can we win the state high school football championship? And how will we get along off the football field? At sixteen, David's life changes when his dad drives home in a new 1963 Rambler. This event triggers several high school romances—1960s style. David's romances include a few fumbles along the way as he tries to reconcile life forces like love, sex, and luck. The Rambler becomes a high school legend with the help of a beautiful auburn hair young woman named Anna. An Ann Margret lookalike, Anna propels David to manhood. The quest to win a state high school football championship endures several twists of fate. David confronts the randomness of life on and off the football field. He tries to cope with several heartbreaking events that define people's lack of control. Meanwhile, national and international events seem to intrude on his small town and its people. David enters his senior year with one last chance to fulfill his quest for a state football championship. At an after-Prom party, classmates reflect on their young lives and futures. David's family and classmates were the only ones who really knew him. What it was like to grow up in Hopewell amidst the upheavals of the 1950s and hostile 1960s. These experiences bound the Class of 1965 together for life. We are protected by unyielding time and space constraints. Like so many high school graduates, we were happy and sad at the same time. Graduation was a marker in life, and a ceremony that simultaneously defined an end and a beginning. Even at a young age, David knew that life is about renewal, and he sort of had a premonition that he would go through many renewals. The Class of 1965 had come of age, and David was a very proud part of it. David's story begins and ends with the embrace of his mom. Possible Target Market(s): USA baby boomers who would read the book and reminisce about their high school days. Baby boomer children might want to read what their parents experienced in the 1960s. Also, romance novels, adventure novels, and coming of age novels fit this book. Keywords: adult, baby boomers, romance, sex, adventure, coming of age, 1960s, and American high school football

This book provides unique and detailed perspectives on different aspects of dissent, protest and disputes and how these have, in turn, continued to pose challenges in Africa. The contributors argue that, dissent, protest and most forms of disputes in Africa are the result of daily challenges that its people have faced and continue to encounter to this day. These challenges include, amongst others, demands for transparency, good governance and accountability; waves of instability that have created insecurity in most parts of the continent, an unsustainable level of youth unemployment, rapid population growth, a continent-wide healthcare and poverty crises and numerous environmental challenges. The chapters elevate the debates on dissent, protest and disputes/conflict in Africa by adding new ideas and introducing new and useful interpretations. The book's strength lies in the contributors' ability to conflate colonial and postcolonial tendencies to show how challenges of the past are not so different from those of today, while also presenting important historical issues from various scholarly perspectives. Dissent, Protest and Dispute in Africa will be of interest for students and scholars of African history, politics, and culture as well as those interested in social movements and civil society.

Using a performance studies lens, this book is a study of performance in the post-9/11 context of the so-called war on terror. It analyzes conventional theatre, political protest, performance art and other sites of performance to unpack the ways in which meaning has been made in the contemporary global sociopolitical environment.

Art is a free gift to man, used to express himself and to release the treasures hidden within his beautiful heart. Art is a clue to our precious history and a revelation of the secrets to our future. If every artist reveals his or her creativity, perhaps we shall discover that the road map to divine treasures is not hidden in some faraway place but right here within us. Tobi is a young man embarking on an inspiring journey of self-discovery. Through a mysterious work of art, he enlightens those he encounters. After several failed attempts by the art to grasp the attention of the people walking past, all hope is virtually lost. The art's persistent voice becomes audible to Tobi, the only one with a good heart and clear conscience. The art overflows with joy when it realizes that it has finally made it to the heart of one man, but the fate of mankind is shadowed by a looming danger. If humanity does not recognize the truth dancing before its eyes, the world could be drowned in heart wrenching sorrow. Tobi's is a bumpy ride, but he might have the ability to bring us back safely—but as different people.

NEW YORK TIMES BESTSELLER • The story of how the NFL, over a period of nearly two decades, denied and sought to cover up mounting evidence of the connection between football and brain damage “League of Denial may turn out to be the most influential sports-related book of our time.”—The Boston Globe “Professional football players do not sustain frequent repetitive blows to the brain on a regular basis.” So concluded the National Football League in a December 2005 scientific paper on concussions in America’s most popular sport. That judgment, implausible even to a casual fan, also contradicted the opinion of a growing cadre of neuroscientists who worked in vain to convince the NFL that it was facing a deadly new scourge: a chronic brain disease that was driving an alarming number of players—including some of the all-time greats—to madness. In League of Denial, award-winning ESPN investigative reporters Mark Fainaru-Wada and Steve Fainaru tell the story of a public health crisis that emerged from the playing fields of our twenty-first-century pastime. Everyone knows that football is violent and dangerous. But what the players who built the NFL into a \$10 billion industry didn’t know—and what the league sought to shield from them—is that no amount of padding could protect the human brain from the force generated by modern football, that the very essence of the game could be exposing these players to brain damage. In a fast-paced narrative that moves between the NFL trenches, America’s research labs, and the boardrooms where the NFL went to war against science, League of Denial examines how the league used its power and resources to attack independent scientists and elevate its own flawed research—a campaign with echoes of Big Tobacco’s fight to deny the connection between smoking and lung cancer. It chronicles the tragic fates of players like Hall of Fame Pittsburgh Steelers center Mike Webster, who was so disturbed at the time of his death he fantasized about shooting NFL executives, and former San Diego Chargers great Junior Seau, whose diseased brain became the target of an unseemly scientific battle between researchers and the NFL. Based on exclusive interviews, previously undisclosed documents, and private emails, this is the story of what the NFL knew and when it knew it—questions at the heart of a crisis that threatens football, from the highest levels all the way down to Pop Warner.

"e;The media dominates our lives. Sport dominates the media. Football dominates the sports media."e; If we're not watching the beautiful game on television, then we're listening to it on the radio. If we're not reading about it, then we're tweeting about it. If we're not betting in-play, then we're pretending to be football managers. We can access goals from every corner of the globe whenever and wherever we want, yet by comparison few of us watch a match live. From the Back Page to the Front Room explains how football and the media have become indistinguishable, fundamentally altering fans' relationship with the game in the process. Starting in the days of folk football, Roger Domenechetti traces the sport's journey through early newspapers, radio, newsreels, the growth of televised football and on into the internet age. Along the way he explores the impact this powerful partnership has had on our culture and society. Based on exhaustive research and exclusive interviews with key figures including Greg Dyke, Henry Winter, Jacqui Oatley, Jonathan Wilson and Hope Powell, From the Back Page to the Front Room is

a fascinating account of how football and the media helped each other dominate modern life. It is also a window into a world where we can now watch on our phones what once barely merited a few lines in the Press.

Why do so many conservative Christians continue to support Donald Trump despite his many overt moral failings? Why do many Americans advocate so vehemently for xenophobic policies, such as a border wall with Mexico? Why do many Americans seem so unwilling to acknowledge the injustices that ethnic and racial minorities experience in the United States? Why do a sizeable proportion of Americans continue to oppose women's equality in the workplace and in the home? To answer these questions, Taking America Back for God points to the phenomenon of "Christian nationalism," the belief that the United States is-and should be-a Christian nation. A Christian ideals and symbols have long played an important role in American public life, but Christian nationalism is about far more than whether the phrase "under God" belongs in the pledge of allegiance. At its heart, Christian nationalism demands that we must preserve a particular kind of social order, an order in which everyone--Christians and non-Christians, native-born and immigrants, whites and minorities, men and women?recognizes their "proper" place in society. The first comprehensive empirical analysis of Christian nationalism in the United States, Taking America Back for God illustrates the influence of Christian nationalism on today's most contentious social and political issues. Drawing on multiple sources of national survey data as well as in-depth interviews, Andrew Whitehead and Samuel Perry document how Christian nationalism shapes what Americans think about who they are as a people, what their future should look like, and how they should get there. Americans' stance toward Christian nationalism provides powerful insight into what they think about immigration, Islam, gun control, police shootings, atheists, gender roles, and many other political issues-very much including who they want in the White House. Taking America Back for God is a guide to one of the most important-and least understood-forces shaping American politics.

Sport is a global phenomenon engaging billions of people and generating annual revenues of more than US\$ 145 billion. Problems in the governance of sports organisations, fixing of matches and staging of major sporting events have spurred action on many fronts. Yet attempts to stop corruption in sport are still at an early stage. The Global Corruption Report (GCR) on sport is the most comprehensive analysis of sports corruption to date. It consists of more than 60 contributions from leading experts in the fields of corruption and sport, from sports organisations, governments, multilateral institutions, sponsors, athletes, supporters, academia and the wider anti-corruption movement. This GCR provides essential analysis for understanding the corruption risks in sport, focusing on sports governance, the business of sport, planning of major events, and match-fixing. It highlights the significant work that has already been done and presents new approaches to strengthening integrity in sport. After one too many late night discussions, football journalist Paul Watson and his mate Matthew Conrad decide to find the world's worst national team, become naturalised citizens of that country and play for them - achieving their joint boyhood dream of playing international football and winning a 'cap'. They are thrilled when Wikipedia leads them to Pohnpei, a tiny, remote island in the Pacific whose long-defunct football team is

described as 'the weakest in the world'. They contact Pohnpei's Football Association and discover what it needs most urgently is leadership. So Paul and Matt travel thousands of miles, leaving behind jobs, families and girlfriends to train a rag-tag bunch of novice footballers who barely understand the rules of the game. Up Pohnpei tells the story of their quest to coach the team and eventually, organise an international fixture - Pohnpei's first since a 16-1 defeat many years ago. With no funding, a population whose obesity rate is 90 percent and toad-infested facilities in one of the world's wettest climates, their journey is beset by obstacles from the outset. Part travelogue, part quest, Up Pohnpei shows how the passion and determination of two young men can change the face of football - and the lives of total strangers - on the other side of the world.

In this book, linguist Edwin Battistella tells the story of Sherwin Cody and his famous English course, situating both the man and the course in early twentieth century cultural history. The author shows how Cody became a grammatical entrepreneur and mass-marketer whose ads proclaimed "Good Money in Good English" and asked "Is Good English Worth 25 Cents to You?" This study of the most widely-advertised English education program in history provides a unique window into popular views of language and culture and their connection to ideas of success.

Do You Make These Mistakes in English?

Taking America Back for God

The Parliamentary Debates (Hansard).

Is today's language at an all-time low? Are pronunciations like cawfee and chawklit bad English? Is slang like my bad or hook up improper? Is it incorrect to mix English and Spanish, as in Yo quiero Taco Bell? Can you write Who do you trust? rather than Whom do you trust? Linguist Edwin Battistella takes a hard look at traditional notions of bad language, arguing that they are often based in sterile conventionality. Examining grammar and style, cursing, slang, and political correctness, regional and ethnic dialects, and foreign accents and language mixing, Battistella discusses the strong feelings evoked by language variation, from objections to the pronunciation NU-cu-lar to complaints about bilingual education. He explains the natural desire for uniformity in writing and speaking and traces the association of mainstream norms to ideas about refinement, intelligence, education, character, national unity and political values. Battistella argues that none of these qualities is inherently connected to language. It is tempting but wrong, Battistella argues, to think of slang, dialects and nonstandard grammar as simply breaking the rules of good English. Instead, we should view language as made up of alternative forms of orderliness adopted by speakers depending on their purpose. Thus we can study the structure and context of nonstandard language in order to illuminate and enrich traditional forms of language, and make policy decisions based on an informed engagement. Re-examining longstanding and heated debates, Bad Language will appeal to a wide spectrum of readers engaged and interested in the debate over what constitutes proper language.

A part-time job as an undercover store detective at the Riverside Shopping Mall seems ideal for our mum-of-three whose kids are now at school. Used to not being noticed at home, she feels she has the perfect credentials. The invisible eye of the Mall, she witnesses the good, bad and ugly of suburban life and it's not long before things become more complicated than the job fist promised. There's the mystery of the posh schoolgirl, and why security is turning a blind eye. There's the question of dubious vote-casting in the bonny baby competition. There's Zero FM star Lindy May, and the case of her missing brother. And then, bizarrely, she finds herself cast as the reluctant sleuth in an abandoned baby case from many years back . . . where nothing is quite as it first seems. With home life in growing disarray, the pressure begins to mount, and it's not long before everything starts to get a little blurry around the edges. The Undercover Mother is a hilarious, unflinchingly honest tale of an unforgettable heroine who's trying hard not so much to have it all but to keep intact the bit that she does have.
