Meet Edward Rollins, scion of one of Boston's more notable families. A diligent but uninspired employee at one of the city's finest investment houses, he is a man of means -- and of secrets. Each night, armed with a hand-held tape recorder, he randomly picks a car and follows it to a destination, cataloging the habits and peculiarities of its driver. A harmless obsession. But one night

changes everything. Trailing a car to a remote suburb, Rollins follows it to a house that, he eerily realizes, was once frequented by his murdered cousin. Drawn into a mystery to which he unwittingly holds the key, he must unlock the secrets of his past to find the truth -- a search that could free him from his own dark house of despair. A harrowing, tension-riddled literary thriller that echoes the

The Cygnus Constellation holds the key to proving that life originated in the heavens—and will ultimately return there. Best-selling author Andrew Collins has uncovered an astronomy that is about 17,000 years old, with standing stones, temples, and monuments across the globe oriented towards Cygnus's stars. He also

found that the use of deep caves by Palaeolithic man led to the rise of religious thought and the belief in life's stellar origins. Now modern-day technology has confirmed that high-energy particles come from a binary star known as Cygnus X3. Ancient people knew what science is finally verifying: that the DNA of life came originally from deep space.

The supernatural story of Jesus is not the history of a miraculous Messiah but a carefully crafted spiritual allegory designed to guide initiates on a journey of mystical discovery. A little more than a century ago, most people believed that the strange story of Adam and Eve was history; today it is understood to be a myth. Within

beauty and intelligence, who served as messengers of gods, fell from grace through pride. These angels, also known as Watchers, are spoken of in the Bible and other religious texts as lusting after human women, who lay with them and gave birth to giant offspring called the Nephilim. These religious sources also record how these beings revealed forbidden arts and sciences to humanity--transgressions that led to their destruction in the Great Flood. Andrew Collins reveals that these angels, demons, and fallen angels were flesh-and-blood members of a race predating our own. Here they lived in isolation before gradually establishing contact with the developing human societies of the Mesopotamian plains below. Humanity regarded these angels--described as tall, white-haired beings with viperlike faces and burning eyes--as gods and their realm the paradise wherein grew the tree of knowledge. A spellbinding blend of history and science, scholarship and speculation, this landmark work presents startling new evidence that traces archaeology's most enduring mysteries back to the lost civilization of Atlantis.... these megaliths nonetheless continue to attract pilgrims, scholars, and adventurers drawn by the possibility that their true spiritual and technological secrets remain hidden. Who could have built these elaborate monuments? How did they do it? And what were their incomprehensible efforts and sacrifices designed to accomplish? Now comes a revolutionary theory that connects these mysteries to reveal a hidden global pattern -- the ancient work of an advanced civilization whose warnings of planetary cataclysm now reverberate

across one hundred millennia. International bestselling author Colin Wilson and Canadian researcher Rand Flem-Ath join forces to share startling evidence of a fiercely intelligent society dating back as much as 100,000 years -- one that sailed the oceans of the world, building monuments to preserve and communicate its remarkable wisdom. The Atlantis Blueprint is their term for a sophisticated network of connections between these sacred sites that they trace to Atlantis: a sophisticated maritime

society that charted the globe from its home base in Antarctica ... until it was obliterated by the devastating global changes it anticipated but could not escape. Here is adventure to realms beyond our imaginings ... to shifting poles, changing latitudes ... into the world of ancient mariners who recharted the globe ... to astonishing discoveries about our ancestors. Here are the great mysteries ... the incredibly complex geography of the Temple of Luxor ... the startling sophistication of Egyptian science and math ...

and tantalizing similarities among the Hebrew, Greek, and Mayan alphabets to the Chinese lunar zodiac. The Atlantis Blueprint opens up a Pandora's box of ancient mysteries, lost worlds, and millennial riddles. It is a story as controversial, fascinating, dangerous -- and inspiring -- as any ever told.

America's ancient Mound Builders left behind thousands of pyramid-shaped and conical burial mounds, complex geometric earthworks, effigy mounds, and incredible artifacts depicting mysterious

symbols. When the first European explorers began reporting their discovery of these enigmatic structures (over 400 years ago) no one knew who built them. No one seemed to know the meaning of the symbols, and the ritualistic purposes of the complex geometric earthen shapes were a complete mystery. That forgotten knowledge is explained by the decimation of Native American populations by explorers and gold-seeking Spanish conquistadores. Within a generation after the Spanish entered America,

Native American populations decreased by over 90 percent from disease and war. It is now known that many ancient earthworks were used to assist souls of the dead in their journey to the sky world and the mysterious symbols were used in rituals by an elite ruling class of priests and chiefs. Souls journeyed to the west where they made a leap of faith to the sky. The souls then made a journey along the Milky Way until they reached the most important spot on the path. This was at the Great Rift of the Milky Way, where they

encountered an enigmatic Adversary located at the Constellation of Cygnus. Path of Souls details this amazing death journey and how it was revealed in recent times by archaeologists. It is also thought that the newly revealed Native American death journey explains much about ancient Egyptian ideas of death. Where did these ideas about the death journey come from and when did they arrive in America? Who were the elite rulers of the Mound Builders? Hundreds of newspaper articles from the 1800s and early 1900s

reported giant skeletons found in large stone tombs buried deep inside burial mounds. Were these tall leaders the elite? Today the Smithsonian asserts that there were no giants in the ancient world but in their actual published mound excavation reports, they detailed the discovery of many skeletons at least seven feet tall. *Path of Souls* explores all of these issues and is lavishly illustrated with over 150 maps, photos, and illustrations.

documents found in the tomb, Tutankhamun questions the historical wisdom and biblical evidence of the Exodus, investigating the issues of land ownership and occupation which are still so typical in the Middle East today. In 1924, Howard Carter - the discoverer of the tomb - threatened to reveal the contents of the papyri discovered therein, but was dissuaded. An earlier attempt to use the documents for personal gain may have involved the Earl of Carnarvon - Carter's aristocratic patron - who died

under mysterious circumstances in 1923. This account reveals the events surrounding his death, as well as the fate of the missing papyri, the origins of Zionist aspirations in Palestine and the origin of the infamous curse of Tutankhamun. The papyri are thought to contain a version of the Exodus story completely at odds with that of the Bible. They allege that those seen as Israelites under the command of Moses were in fact made up of a band of expelled priests: followers of the herectic king Akhenaten's fallen monotheistic religion

Enoch and the Anunnaki gods of Sumerian tradition who created it • Reveals the location of the remains of the Garden of Eden in the same region Built at the end of the last ice age, the mysterious stone temple complex of Göbekli Tepe in Turkey is one of the greatest challenges to 21st century archaeology. As much as 7,000 years older than the Great Pyramid and Stonehenge, its strange buildings and rings of T-shaped monoliths--built with stones weighing from 10 to 15 tons--show a level of sophistication and artistic

achievement unmatched until the rise of the great civilizations of the ancient world, Sumer, Egypt, and Babylon. Chronicling his travels to Göbekli Tepe and surrounding sites, Andrew Collins details the layout, architecture, and exquisite relief carvings of ice age animals and human forms found at this 12,000-year-old megalithic complex, now recognized as the oldest stone architecture in the world. He explores how it was built as a reaction to a global cataclysm--the Great Flood in the Bible--and

explains how it served as a gateway and map to the sky-world, the place of first creation, reached via a bright star in the constellation of Cygnus. He reveals those behind its construction as the Watchers of the Book of Enoch and the Anunnaki gods of Sumerian tradition. Unveiling Göbekli Tepe ' s foundational role in the rise of civilization, Collins shows how it is connected to humanity ' s creation in the Garden of Eden and the secrets Adam passed to his son Seth, the founder of an angelic race called the

Sethites. In his search for Adam ' s legendary Cave of Treasures, the author discovers the Garden of Eden and the remains of the Tree of Life--in the same sacred region where G ö bekli Tepe is being uncovered today.

Remarkably, the three main pyramids at Giza in Egypt, including the Great Pyramid, align with the same three stars. But where did this ancient veneration of Cygnus come from? *portal to the sky-world, Andrew Collins reveals how, at both sites, the attention toward this star group is linked with sound acoustics and the use of musical intervals “discovered” thousands of years later by the Greek mathematician Pythagoras. Collins traces these ideas as well as early advances in human technology and cosmology back to the Altai-Baikal region of Russian Siberia, where the cult of the swan flourished as much as 20,000 years ago. He shows how these concepts, including a complex numeric system based on long-term eclipse cycles, are*

Not only were they of exceptional size--the ancient giants of myth--but archaeological discoveries show that this previously unrecognized human population achieved an advanced level of culture, including the use of high-speed drilling techniques and the creation of musical instruments. Water is crucial to our survival - life depends on it - but it was also fundamental in the origins of life on Earth. The millions of gallons of water which make up our rivers, lakes and oceans, originated in outer space. How it arrived here and how those molecules of water were formed, is a story which takes us back to the beginning of the universe.
