Symposium 97 was the fourteenth international symposium on methodological issues sponsored by Statistics Canada. Each year, the symposium focuses on a particular theme. This year's theme was on new directions in surveys and censuses. The 1997 symposium attracted over 500 people who met over three days at the Palais des Congrès in Hull to listen to over 70 presentations by experts from various statistical and other government agencies, universities and the private sector. Aside from translation and Aormatting, the papers submitted by the presenters have been reproduced in these proceedings.

It's no surprise that Friends pioneered on race and gender issues, it is less well known that most trustees at early Johns Hopkins were Friends or more women ministers came from a Quaker school at the turn of the 20th century than any other institution. This book overthrows stereotypes about religion in education with data about interactions between Friends, Holiness, liberalism, and other currents. Azusa Pacific, Barclay, Bryn Mawr, Cornell, Earlham, Friends, George Fox, Guilford, Haverford, Johns Hopkins, Malone, Swarthmore, Whittier, William Penn, and Wilmington cover the gamut in academia. Founded by Friends explains why Quakers founded 15 colleges and universities and how and why these changed over time. It notes how these schools are informed by, and in most cases shaped by, a Quaker heritage. For students of race, gender, and peace studies in higher education, this book, funded by Azusa Pacific, Bryn Mawr, Cornell, Earlham, Guilford, Haverford, Johns Hopkins, and Swarthmore, will be a centerpiece for your collection.

We Belong

The Classroom Management Book

It's the first day of school at Frederick Douglass Elementary and everyone's just a little bit nervous, especially the school itself. What will the children do once they come? Will they like the school? Will they be nice to him? The school has a rough start, but as the day goes on, he soon recovers when he sees that he's not the only one going through first-day jitters.

This is a solutions book that shows how to organize and structure a classroom to create a safe and positive environment for student learning and achievement to take place. It offers 50 procedures that can be applied, changed, adapted, and incorporated into any classroom management plan. Each procedure is presented with a consistent format that breaks it down and tells how to teach it and what the outcome of teaching it will be. While all of the work and preparation behind a well-managed classroom are rarely observed, the dividends are evident in a classroom that is less stressful for all and one that hums with learning.
