Europe's Atlantic façade has long been treated as marginal to the formation of the European Bronze Age and the puzzle of the origin and early spread of the Indo-European languages. Until recently the idea that Atlantic Europe was a wholly pre-Indo-European

world throughout the Bronze Age remained plausible. Rapidly expanding evidence for the later prehistory and the pre-Roman languages of the West increasingly exclude that possibility. It is therefore time to refocus on a narrowing list of 'suspects' as possible archaeological proxies for the arrival of this great language family and emergence of its Celtic branch. This reconsideration inevitably throws penetrating new light on the formation of later prehistoric Atlantic Europe and the implications of new evidence for inter-regional connections. This Celtic Atlantic hypothesis represents a major departure from the long-established, but increasingly problematical scenario in which the Ancient Celtic languages and peoples called Keltoi (Celts) are closely bound up with the archaeology of the Hallstatt and La Tène cultures of Iron Age west-central Europe.

More wide ranging, both geographically and chronologically, than any previous study, this well-illustrated book offers a new definition of Celtic art. Tempering the much-adopted art-historical approach, D.W. Harding argues for a broader definition of Celtic art.

and views it within a much wider archaeological context. He re-asserts ancient Celtic identity after a decade of deconstruction in English-language archaeology. Hardin argues that there were communities in Iron Age Europe that were identified historically as Celts, regarded themselves as Celtic, or who spoke Celtic languages, and that the art of these communities may reasonably be regarded as Celtic art. This study will be indispensable for those people wanting to take a fresh and innovative perspective on Celtic Art.
