The Stamp Collectors' Annual ...

The author has combined his two greatest interests: Transport and Stamp Collecting and brought them together in this series of books looking at the way postage stamps have led him to increase his knowledge of our world via his interest in all forms of transport world-wide. Philately (the collecting of stamps) itself is a fascinating hobby looking at the development of postal services in all its forms, designs of stamps that have evolved the Victorian Penny-Black to today's creations, often artistic but dependant more and more on photography with greater or lesser degrees of digital manipulation. In his quest he has covered many unusual places that have only become more accessible with the advent of cheap air travel but has still found it necessary to use his own contacts, library of related books and more recently the internet to research his subject. Like all books in this series, they been laid out as global tour starting naturally in the UK and then travelling in an easterly direction through every continent – without, it should be added, crossing the International Date Line! Readers will not find every country included but a differing selection in each volume.

The first and definitive history of the finest stamp collection in the world, now in paperback with a new index and epilogue This elegant book is the definitive account of one of the world's most important and extensive stamp collections, and the monarchs and keepers who have contributed to it. Inaugurated by Queen Victoria, and enlarged by five successive British monarchs, the main body of the Collection came into being under George V, whose passionate and shrewd acquisition of many other private collections has ensured the unique and comprehensive character of his own. This is a story told through the stamps themselves, many of the most famous of which are produced here in full color, as well as through astonishing anecdotes featuring the kings, queens, and courtiers who brought them together. This informative, surprising, highly illustrated volume is written to appeal to the general reader with an interest in Royal history, as well as to the specialist enthusiast.

An inside look at the obsessive, secretive, and often bizarre world of high-profile stamp collecting, told through the journey of the world's most sought-after stamp. When it was issued in 1856, it cost a penny. In 2014, this tiny square of faded red paper sold at Sotheby's for nearly \$9.5 million, the largest amount ever paid for a postage stamp at auction. Through the stories of the eccentric characters who have bought, owned, and sold the one-cent magenta in the years in between, James Barron delivers a fascinating tale of global history and immense wealth, and of the human desire to collect. One-cent magentas were provisional stamps, printed quickly in what was then British Guiana when a shipment of official stamps from London did not arrive. They were intended for periodicals, and most were thrown out with the newspapers. But one stamp survived. The singular one-cent magenta has had only nine owners since a twelve-year-old boy discovered it in 1873 as he sorted through papers in his uncle's house. He soon sold it for what would be \$17 today. (That's been called the worst stamp deal in history.) Among later owners was a fabulously wealthy Frenchman who hid the stamp from almost everyone (even King George V of England couldn't get a peek); a businessman who traveled with the stamp in a briefcase he handcuffed to his wrist; and John E. du Pont, an heir to the chemical fortune, who died while serving a thirty-year sentence for the murder of Olympic wrestler Dave Schultz. Recommended for fans of Nicholas A. Basbanes, Susan Orlean, and Simon Winchester, The One-Cent Magenta explores the intersection of obsessive pursuits and great affluence and asks why we want most what is most rare.

When they grow up, the two boys take different paths--one becomes a prison guard, the other works in a factory--but their early childhood passions remain. When the country boy's stories of hope land him in prison, the letters and stamps sent to him from faraway places intrigue the prison guard and a unique friendship begins.

Winner of the University of Michigan Press / Humanities, Arts, Science, and Technology Alliance and Collaboratory (HASTAC) Prize for Notable Work in the Digital Humanities In the age of digital communications, it can be difficult to imagine a time when the meaning and imagery of stamps was politically volatile. While millions of Americans collected stamps from the 1880s to the 1940s, Stamping American Memory is the first scholarly examination of stamp collecting culture and how stamps enabled citizens to engage their federal government in conversations about national life in early-twentieth-century America. By examining the civic conversations that emerged around stamp subjects and imagery, this work brings to light the role that these under-examined historical artifacts have pla

in carrying political messages. Sheila A. Brennan crafts a fresh synthesis that explores how the US postal service shaped Americans' concepts of national belonging, citizenship, and race through its commemorative stamp program. Designed to be saved as souvenirs, commemoratives circulated widely and stood as miniature memorials to carefully selected snapshots from the American past that also served the political needs of small interest groups. Stamping American Memory brings together the histories of the US postal service and the federal government, collecting, and philately through the lenses of material culture and memory to make a significant contribution to our understanding of this period in American history.
