

Three Little Pigs Maths Activities

Three bears decide to go out for a walk in the park while their porridge cools. Meanwhile a little girl has lost her mum and lost her way and is walking the streets alone, until she happens upon a house... The bears arrive home and discover several things are amiss... What will they find upstairs?

This resource book will help teachers with providing activities, practice and worksheets for students.

Lift-the-flap illustrations show the big, bad wolf in pursuit of three little pigs who have left home to seek their fortunes.

StoryPlay Books is the smart way to read and play together! StoryPlay Books offer fun ways to engage with little ones during story time and playtime with prompts and activities everyone will love! Each quality story will delight readers while building early literacy skills for ages 3-5 by helping them develop: problem-solving abilities, reading comprehension, social development, pre-reading skills, memory strength and more! Each book includes story-related games and crafts to extend the reading experience. Teachers agree that StoryPlay Books are perfect for parents looking to stimulate and engage their kids at home while having fun together! Each book also shines a spotlight on important topics for this age. The Three Little Pigs and the Somewhat Bad Wolf -- a funny twist on the classic tale -- focuses on character building. Are you ready to start reading the StoryPlay way? Ready. Set. Smart!

Literacy Strategies for Early Childhood Teachers

Ourselves

Creating Lifelong Math & Science Learners

The Big Bad Wolf has escaped and our new superheroes, the Three Little Superpigs, must save Fairyland before it is too late. After defeating the Big Bad Wolf, the Three Little Superpigs spend their days fighting crime and enjoying their newfound fame. But one day, the Big Bad Wolf escapes from prison and plunges Fairyland into fear. Our curly-tailed friends soon discover that bricks are missing all over town. The Superpigs return to their homes to solve the mystery when they realize it has all been a trap! Join our new superheroes as they escape from the evil clutches of the Big Bad Wolf and save Fairyland in this first Superpigs adventure. Readers will huff and puff and laugh and laugh.

MATH AND SCIENCE FOR YOUNG CHILDREN, Eighth Edition, introduces readers to engaging math and science experiences for early childhood and early elementary education programs, and provides an organized, sequential approach to creating a developmentally appropriate math and science curriculum. The content aligns with key guidelines and standards: The National Association for the Education of Young Children's (NAEYC) Professional Preparation Standards (2010); Developmentally Appropriate Practice (DAP) guidelines; Common Core Mathematics Standards; and Next Generation Science Standards (NGSS). The book also addresses STEM/STEAM and the essential domains of child growth and development during the crucial birth-through-eight age range. A valuable resource for the student/future teacher, working professional, or involved parent, MATH AND SCIENCE FOR YOUNG CHILDREN emphasizes the interrelatedness of math and science and how they can be integrated into all other curriculum areas. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This eBook has been optimised for viewing on colour devices. A perfect introduction to the traditional fairy tale 'The Three Little Pigs'. Join the three little pigs as they set off to see the world, build their houses and encounter the big, bad wolf. Part of the Ladybird 'First Favourite Tales' series, this story contains amusing pictures and lots of funny rhythm and rhyme to delight young children. Ideal for reading aloud and sharing with 2-4 year olds.

From the first edition to the latest, Language Arts: Process, Product and Assessment for Diverse Classrooms has presented sound language arts theory and methodology in a nonthreatening, straightforward manner at a reasonable price. Coverage focuses on the 2017 Standards for Literacy Professionals. Each chapter identifies and addresses the standards applicable to that chapter's topics. Farris and Werderich infuse their foundational guidelines with the latest research, teaching practices, and assessment and evaluation techniques. Ideas for lesson plans, use of technological applications, internet resources, and comprehensive, up-to-date listings of children's, young adult, and multicultural fiction and nonfiction titles are among the text's outstanding features. Other features geared expressly for pre- and inservice teachers include:

- Engaging, real-life classroom anecdotes
- Instructional activities for reading, writing, listening, speaking, viewing, and visually representing
- Boxes containing teaching hints and mini lessons
- Section on Response to Intervention (RTI) with the various tiers of intervention
- Theories, instruction, and teaching activities for English language learners (ELLs)
- Guidelines to meet the needs of special needs learners
- Suggestions for literacy-based interdisciplinary instruction (including STEM and STEAM)
- Examples of children's work to help readers understand what to expect from different ages and ability levels
- Questions and assignments to strengthen readers' aptitude, awareness, and application of topics to real life

Bedtime Math: A Fun Excuse to Stay Up Late

Huff & Puff

More Than 50 Great Activities that Reinforce Problem Solving and Essential Math Skills

The purpose of this volume is to "unseal" or reveal the mysteries in the prophecy of Daniel. The book of Daniel is the ONLY example in the entire bible of a prophecy that was "shut up"

and/or "sealed" in antiquity. This is a mysterious phrase and is the reason the book is NOT well understood to the present time. The "shutting up" or "sealing" of the book must mean that the full and complete MEANING of the prophecy would NOT be revealed to the understanding of men. That is, until the arrival of a time period called "the time of the end." (See Dan. 12:9)

This appears to be the exact case because there are things in the prophecy that clearly have NOT been correctly understood to this very day. Examples of these misunderstood things in the prophecy include: (1) The meaning of the phrase, "the time of the end." (2) The historical identity of the "willful king" of Dan. 11:36. (3) The true meaning of the word "indignation" in 8:19 & 11:36. (4) The historical connection between the "sale of the land" in 11:39 AND the "willful king" of 11:36. (5) The separation of the prophecy between ancient and modern. This approximate 1900 years time span is seen between 11:39 and 40. . The first mention of "sealing" is seen in 8:26, where the Archangel Gabriel instructs Daniel to "shut thou up the vision, for it shall be for many days." Gabriel is referring to Daniel's vision of chapter 8. It seems the "shutting up" of that vision contributes to the later "sealing" of the entire book. In 12: 4, the Archangel Gabriel instructed Daniel to "shut up the words and seal the, BOOK (even) to the time of the end." (KJV) Note: The word "even" is a supplied word as it does not appear in the original. The Septuagint (LXX) uses the word "to" instead of "even." Gabriel instructed Daniel to seal the book in 12:4, but he tells Daniel in 12:9 to-- : "Go thy way, Daniel: for the words are closed up and sealed till the time of the end." Gabriel must have assumed that Daniel had effectively "sealed" the book according to his previous instructions. The mysterious phrase "the time of the end" is mentioned 5 times in the prophecy. Some writers have said this is a short period of several decades time that will occur just before the end of human history on earth. However, one must assume from these verses that the TRUE MEANING of the prophecy would then be fully understood at or during the "time of the end." Most writers have assumed the existence of only ONE "time of the end" in the book. However, it is easily proved there are two such periods and they are parallels of each other. The first period occurred at the end of the Jewish "era." The second period will occur at the end of the Gentile "era." The present volume is a calculated attempt to "unseal" the prophecy. One reason for this idea is that the world now "lives" in the last "time of the end." After all, the prophecy states that it would be "sealed to the time of the end." The clear inference is that it would be "unsealed" at (or during(that time period. Because of a decades long, prayerful and diligent historical search, every mystery in the prophecy has now been revealed in the present volume. The prophecy can now be fully understood for the first time since the archangel Gabriel (and Daniel) "sealed" it over 2000 years ago.

This word puzzle packet is an exciting way to enrich students' vocabularies while giving them practice with counting, measuring, telling time, adding money, and more! The activities offer a challenging way to sharpen reasoning skills, stimulate vocabulary, and reinforce spelling skills. The variety of puzzle formats and subject matter provide engaging activities that complement core and extended curriculum materials. Codes, mazes, riddles, rhymes, rebuses, word searches, crossword puzzles, and matching activities are just a few of the formats presented.

Answer key is included.

Ideas for Working with Children Aged 11 to 14

When three little pigs leave home to seek their fortunes, they encounter a threatening wolf.

'All the ideas look easy to use and quick to prepare... This is a very interesting and thought provoking book - it manages to ask questions about how we teach able children but also provides some ideas and some materials to help' - The Association of Teachers of Mathematics Finding stimulating and challenging maths activities for able pupils in a mainstream classroom can be demanding for the busy teacher, especially if maths is not your specialism. Based on her experience as an Advanced Skills Teacher and LEA Consultant, Anne Price explains the issues and theories surrounding the education of able pupils and links these to practical, creative examples to be used in the classroom. Useful resources include: - Photocopiable materials, - Advice on different teaching styles, - Activities and tasks for individuals, groups or the whole class GATCOs, Numeracy Consultants, Learning Support Teachers and Student and class teachers looking for new and creative ways of teaching maths activities to able students will find this book invaluable.

Our mission: to make math a fun part of kids' everyday lives. We all know it's wonderful to read bedtime stories to kids, but what about doing math? Many generations of Americans are uncomfortable with math and numbers, and too often we hear the phrase, "I'm just not good at math!" For decades, this attitude has trickled down from parents to their kids, and we now have a culture that finds math dry, intimidating, and just not cool. Bedtime Math wants to change all that. Inside this book, families will find fun, mischief-making math problems to tackle—math that isn't just kid-friendly, but actually kid-appealing. With over 100 math riddles on topics from jalapeños and submarines to roller coasters and flamingos, this book bursts with math that looks nothing like school. And with three different levels of challenge (wee ones, little kids, and big kids), there's something for everyone. We can make numbers fun, and change the world, one Bedtime Math puzzle at a time.

This exciting topic-based series offers early years practitioners collections of activities based on familiar themes. The activities can be easily implemented and readily incorporated into curriculum planning through links made to the Foundation Stage curriculum. Each book includes: activities that can be used on their own or as part of a themed program ideas for enjoying an all round curriculum approach guidance on expanding existing ideas and resources linked ideas to be carried out at home. Ourselves looks at families and society and includes important topics such as friendship and identity.

Thinking it Through

The Three Little Pigs: Ladybird First Favourite Tales

The wolf gives his own outlandish version of what really happened when he tangled with the three little pigs.

Covers over 100 teacher-led activities that encourage young children to think mathematically by exploring, experimenting and being creative. Assessment is built into tasks, and each book includes a bank of photocopyable resource sheets linked to activities.

The author explains the issues and theories surrounding the education of able pupils and links these to practical, creative examples to be used in the classroom.

The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author" "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There i detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

Discover new, practical methods for teaching literacy skills in your early childhood classroom. Has teaching early literacy skills become a stumbling block to getting your preschool students kindergarten ready? Break out of the tired "letter of the week" routine and learn how to transform your lessons with fun and effective techniques. Teach Smarter: Literacy Strategies for Early Childhood Teachers will equip teachers to infuse every aspect of their teaching with exciting hands-on literacy teaching methods that engage students and help them build authentic connections with books, so that 100% of their students will have a strong literacy foundation and will be fully prepared for success in kindergarten and beyond. Respected author Vanessa Levin, veteran early childhood educator and author of the "Pre-K Pages" blog, breaks down the research and translates it into realistic, actionable steps you can take to improve your teaching. Features specific examples of teaching techniques and activities that engage students in hands-on, experiential learning during circle time, centers, and small groups. Offers a simple, four-step system for teaching literacy skills, based on the foundational principles of early literacy teaching Demonstrates how to build your confidence in your ability to get 100% of your students ready for kindergarten, long before the end of the school year Understand the problems with traditional literacy teaching and identify gaps in your current teaching practice with this valuable resource.

Teaching should be exciting and creative but an overcrowded curriculum can make this hard for teachers to achieve. Help is at hand with these literacy and numeracy lesson plans that also cover language development, thinking skills, and drama. Thinking it Through allows teachers to customize lesson plans to meet their own needs using the book's accompanying CD as well as assess pupils language ability with handy photocopiable assessment worksheets. The book will help each child reach their full potential regardless of ability using ideas for differentiation and extension and structure lessons according to national curriculum objectives.

Loosely based on the folktale about the three little pigs, these three pigs have a different surprise for the wolf who is trying to blow their houses down. The reader is asked to huff and puff into a die-cut hole in each page.

Inspiring Ideas to Support Early Maths and Literacy takes a play-based approach and draws on popular stories and rhymes to cover the key areas of mathematics and literacy. Full of practical, tried and tested ideas for developing understanding in mathematics and literacy, this book aims to help practitioners make these areas of learning exciting and meaningful for young children. Each chapter shows how learning can be reinforced and brought to life through resources made from everyday materials, providing children with an enjoyable and positive learning experience. Key features include: clear instructions and full colour photographs on how to make practical resources for indoor and outdoor environments vocabulary lists for inspiration and ideas for developing a new play space or overhauling an existing space key questions to consider when planning and designing an indoor or outdoor play space links to the Early Years Foundation Stage that will guide the development of a future playground and challenge providers to enhance their practice. This practical resource will be essential reading for primary teachers, early years practitioners, students and all those interested in developing young children's confidence in mathematics and literacy. .
