Little did Kathleen, Chief Architect at ArchiSurance, know, as she walked into a meeting with the CIO, just how much her job was going to change. Her intention had been to get approval for some new ideas she'd had to strengthen their Enterprise Architecture, after having slowly lost a grip on it during the merger. During the meeting, however, it becomes apparent that the transformation of the organization to become more digital has caused chaos, and not only for her team. It is clear, despite all good intentions, that the transformation is failing. By the end of the meeting, she has agreed to help turn the situation around. After leading the initial reset of the Digital Transformation, Kathleen is suddenly the owner of the implementation. What follows is a journey of the typical problems faced by companies as they make decisions to deploy digital technologies. Kathleen proceeds to solve one problem after the other using guidance from the open digital standards of The Open Group to lay the foundation for deploying quality digital technology solutions at a faster pace.

Global Standards and Publications

Jamgön Kongtrul's ten-volume Treasury of Knowledge is a unique encyclopedic masterpiece embodying the entire range of Buddhist teachings as they were preserved in Tibet. Tibetan Buddhist teachers expected their students to study Buddhist philosophical texts as well as practice reflection and meditation; present-day students have also realized that awakening has its source in study as well as in reflection and practice. Foundations of Buddhist Study and Practice comprises Book Seven and Book Eight, Parts One and Two of the Treasury of Knowledge. Book Seven elucidates the various keys needed to correctly interpret, understand, and contemplate Buddhist teachings, including the secret teachings of the Vajrayana. Parts One and Two of Book Eight explain how the teachings are to be integrated into one's life through the practice of meditation, which unites a state of one-pointed attention with profound insight into emptiness. Jamgön Kongtrul's evenhanded, elegant, and authoritative statement of such controversial doctrines as unqualified emptiness ("self-empty") and qualified emptiness ("other-empty"), provisional and definitive meaning, and conventional and ultimate truth as presented in the various schools of Tibetan Buddhism will appeal to both serious Dharma practitioners and advanced students and scholars.
