THERE existed from very early times a collection of Norse proverbs and wise counsels, which were attributed to Odin (Othin) just as the Biblical proverbs were to Solomon. This collection was known as "The High One's Words," and forms the basis of the present poem. Few gnostic collections in the world's literary history present sounder wisdom more tersely expressed than the Havamal. Like the Book of Proverbs it occasionally rises to lofty heights of poetry. If it presents the worldly wisdom of a violent race, it also shows noble ideals of loyalty, truth, and unflinching courage. Over time other poems were added to the original content dealing with wisdom which seemed, by their nature, to imply that the speaker was Odin. Thus a catalogue of runes, or charms, was tacked on, and also a set of proverbs. Here and there bits of verse crept in; and of course the loose structure of the poem made it easy for any reciter to insert new stanzas almost at will. This curious miscellany is what we now have as the Havamal Five separate elements are pretty clearly recognizable: (1) the Havamal proper (stanzas 1-80), a collection of proverbs and counsels for the conduct of life; (2) the Loddfafnismol (stanzas 111-138), a collection somewhat similar to the first, but specifically addressed to a certain Loddfafnir; (3) the Ljothatal (stanzas 147-165), a collection of charms; (4) the lovestory of Odin and Billing's daughter (stanzas 96-102); (5) the story of how Odin got the mead of poetry from the maiden Gunnloth (stanzas 103-110). There is also a brief passage (stanzas 139-146) telling how Odin won the runes, this passage being a natural introduction to the Ljothatal, and doubtless brought into the poem for that reason. 33% of the net profit from the sale of this book will be donated to charities.

Sound machinery of government is at the core of a well-functioning state. Written by an author with wide experience in public administration globally, this book addresses both the commonalities and the diversity of administrative practice around the world. Exploring developed countries as well as developing and transitional economies, it combines a strong conceptual foundation with thorough coverage of the main topics in public administration, supported by current data and a wealth of concrete illustrations from a variety of countries. The book is organized around three important themes: the interaction of governance, politics and administration, the role of institutions in determining administrative outcomes, and the importance of country context. A concluding chapter summarizes the lessons of international experience and offers guidance to improve the management of the public sector in sustainable ways. Running the Government will serve as a core text for courses in public administration and as a supplement for undergraduate and graduate courses in political science, public economics, and international affairs. It may also serve as an accessible and complete reference for civil service training courses around the globe.

"The long and illustrious career of Edouard Vuillard spans the fin-de-siecle and the first four decades of the twentieth century, during which time the French painter, printmaker, and photographer created an extraordinary body of work. This is the first volume to explore Vuillard's rich and varied career in its totality, presenting nearly 350 works that demonstrate the full range of his subject matter and reveal both the public and private sides of this quintessentially Parisian artist."
"In a series of illustrated essays and catalogue entries, the authors explore Vuillard's complex and diverse artistic development, beginning with his academic training in Paris in the late 1880s and the innovative Nabi paintings of the 1890s for which he is best known, including his provocative, disquieting middle-class interiors and his work associated with the avant-garde theatre. The authors also examine Vuillard's splendid but lesser known large-scale decorations, his luminous landscapes, and the elegant portraits from the last decades of his career. In addition to paintings, the volume includes a substantial selection of drawings and graphics, together with a large group of striking photographs by the artist, many of which are published here for the first time."
"This illustrated catalogue accompanies the most comprehensive exhibition ever devoted to the work of Edouard Vuillard (1868-1940). The exhibition opens at the National Gallery of Art in Washington and travels to the Montreal Museum of Fine Arts, the Galeries nationales du Grand Palais in Paris, and the Royal Academy of Arts, London."

'Supple, intricate and uncompromising, full of delicate observation and insight, Amit Chaudhuri's Finding the Raga immerses us in the rigorous beauty and cosmology of Indian classical music. It is also a loving memoir about relationships and places, dedication and vocation.' Geoff Dyer By turns essay, memoir and cultural study, Finding the Raga is Amit Chaudhuri's singular account of his discovery of, and enduring passion for, North Indian music: an ancient, evolving tradition whose principles and practices will alter the reader's notion of what music might - and can - be. Tracing the music's development, Finding the Raga dwells on its most distinctive and mysterious characteristics: its extraordinary approach to time, language and silence; its embrace of confoundment, and its ethos of evocation over representation. The result is a strange gift of a book, for musicians and music lovers, and for any creative mind in search of diverse and transforming inspiration.

A decade ago, Tim Flannery's #1 international bestseller, The Weather Makers, was one of the first books to break the topic of climate change out into the general conversation. Today, Earth's climate system is fast approaching a crisis. Political leadership has not kept up, and public engagement with the issue of climate change has declined. Opinion is divided between technological optimists and pessimists who feel that catastrophe is inevitable. The publication of this new book is timed for the lead-up to the Climate Change Conference in Paris in December 2015, which aims to achieve a legally binding and universal agreement on climate from all the nations in the world. This book anticipates and will influence the debate. Time is running out, but catastrophe is not inevitable. Around the world people are now living with the consequences of an altered climate—with intensified and more frequent storms, wildfires, droughts and floods. For some it's already a question of survival. Drawing on the latest science, Flannery gives a snapshot of the trouble we are in and more crucially, proposes a new way forward, including rapidly progressing clean technologies and a “third way” of soft geo-engineering. Tim Flannery, with his inimitable style, makes this urgent issue compelling and accessible. This is a must-read for anyone interested in our global future.

Spirit tech products are rapidly improving in sophistication and power, and ordinary people need a trustworthy guide. Through their own research and insiders' access to the top innovators and early adopters, Wesley J. Wildman and Kate J. Stockly take you deep inside an evolving world: - Find out how increasingly popular “wearables” work on your brain, promising a shortcut to transformative meditative states. - Meet the inventor of the “God Helmet” who developed a tool to increase psychic skills, and overcome fear, sadness, and anger. - Visit churches that use ayahuasca as their sacrament and explore the booming industry of psychedelic tourism. - Journey to a mansion in the heart of Silicon Valley where a group of scientists and entrepreneurs are working feverishly to bring brain-based spirit tech applications to the masses. - Discover a research team who achieved brain-to-brain communication between individuals thousands of miles apart, harnessing neurofeedback techniques to sync and share emotions among group members. Spirit Tech offers readers a compelling glimpse into the future and is the definitive guide to the fascinating world of new innovations for personal transformation, spiritual growth, and pushing the boundaries of human nature.

It is an age of hurry and worry. Fortunes are quickly made and freely spent. Nearly all busy, hard-worked Americans have an intuitive sense of the need that exists for at least one period of rest and relaxation during each year, and all—or nearly all—are willing to pay liberally, too liberally in fact, for anything that conduces to rest, recreation and sport. I am sorry to say that we mostly get swindled. To the man of millions it makes little difference. I do not write for him, and can do him little good. But there are hundreds of thousands of practical, useful men, many of them far from being rich: mechanics, artists, writers, merchants, clerks, business men—workers, so to speak—who sorely need and well deserve a season of rest and relaxation at least once a year. To these, and for these, I write. (George Washington Sears, Chapter 1)
