

## Under The Ocean Pop Up Book

The magnificent prints of Ernst Haeckel, who captured the amazing forms of the natural world, spring to life in this exciting pop-up book that reveals the vibrant intricacy of his work. The book Art Forms in Nature is a collection of prints, made by the scientist Ernst Haeckel, of an enormous variety of flora and fauna from the sea-including microscopic Radiolaria, starfish, and jelly fish. Since Prestel published it in 1998, the book has been a favorite with artists, designers, illustrators, and anyone who enjoys the wondrous forms of the natural world. Now paper engineer Maike Biederstaedt has transformed Haeckel's transcendent work into a three-dimensional book that allows readers to appreciate Haeckel's vivid colors, exceptional precision, and fascination with patterns and geometry. This stunning book features seven pop-ups that allow readers to see nature's brilliance the way that Haeckel did--as marvelous, mathematically based creations that support his theory of the unity of all living things. Certain to appeal to his huge variety of fans, this pop-up version of a timeless classic will be treasured for years to come.

The Ocean is so big, and lots ofwonderful creatures live there.Ocean creatures have the eyes, ears, noseand tails that are perfect just for them.

This delightful and ingenious pop-up book traces a caterpillar's evolution from lowly cocoon to magnificent winged butterfly. Along the way we find cunning insects hidden in the grass, inchworms munching their way through a jungle of leaves, and a floral paradise where the newly hatched butterfly makes its home. Intricately constructed with the dazzling color and delicate details that have become UG's trademark, this book also tells young readers one of nature's most basic stories.

As Oceano, a red sailboat, adventures around the world, readers are introduced to the diversity and extent of life that thrives in the ocean.
