This fifth edition of International Law: A South African Perspective is now titled Dugard's International Law: A South African Perspective, in recognition of the fact that this work is a continuation of the earlier editions written by John Dugard. The substance of the work has undergone major changes to take account of new developments both on the international legal scene and in South Africa. Dugard's International Law: A South African Perspective presents a South African perspective of international law. The basic principles of international law are described and examined with reference to the principal sources of international law. This examination, however, takes place within the context of South African law. South African state practice, judicial decisions and legislation on international law receive equal treatment with international law as it is practised and taught abroad. The present work is designed to assist judicial officers and practitioners, educate students, and guide diplomats in the intricacies of international law both at home in South Africa and abroad.

Principles of Management Accounting 2nd edition is an accessible, entry-level management accounting textbook for university students aimed at second- and third-year students at universities and universities of technology, as well as those following MBA courses in accounting and finance. The book covers undergraduate-appropriate topics from the management accounting syllabus of the South African Institute of Chartered Accountants (SAICA). In doing so, most aspects of the relevant papers' syllabi of the Chartered Institute of Management Accountants (CIMA), as well as those of the Association of Chartered Certified Accountants (ACCA) are dealt with too. The contributors are from a range of South African tertiary institutions ensuring that the book is representative of the way management accounting is taught in this country and taking cognizance of the areas in which students have difficulty.

BPP Learning Media provides comprehensive materials that highlight the areas to focus on for your exams and complement the syllabus to increase your understanding.

Accounting 9th edition continues the strong reputation established by this leading Australian text as the most comprehensive book for students studying introductory accounting in undergraduate or postgraduate programs. The full-colour design and improved pedagogy provides students with a reader-friendly text to enhance their understanding of concepts and make their study more enjoyable. The text builds on the thorough and reliable explanation of the accounting process through the Business Knowledge chapter vignettes that apply the principles to practice. Previous editions were renowned for the number of exercises and problems, and the new edition builds on this superior teaching feature. The end-of-chapter activities are designed to encourage student confidence through the development of skills in decision making, critical thinking, ethical thinking, analysis and communication.

For courses in Introduction to Management Accounting. Get refreshed with Horngren/Sundem/Stratton's Introduction to Management Accounting, Twelfth Edition. This best-selling text offers a relevant, real-world decision-making approach to management accounting. Students develop a solid understanding of costs and cost behavior and the use of cost information for planning and control decisions, not just inventory valuation. An exceptionally strong pedagogy and supplements package and flexible structure provide instructors with great latitude in choosing various combinations of breadth and depth, theory and procedures, simplicity and complexity. The Twelfth Edition now includes student-oriented real-world company examples such as Nantucket Nectars and McDonalds; new "Cognitive Exercises" and "Business First" boxes, new on-line courses and tutorial software package resources, and a new CD-ROM series, "Mastering Accounting."

Financial accounting is the branch of accounting thought and practice concerned with preparing and providing information for external users of financial statements. This textbook helps students to understand the concepts that underpin the application of accounting theory to solve accounting problems. This international edition includes extracts from financial statements,

definitions of key terms and exam examples. Unlike other textbooks, the author provides analysis of why accountants do what they do, and not just how. With such a wealth of accounting models and diagrams intertwined with this analysis, this book guides the reader through all the practicalities and concepts of financial accounting. Additional online questions, exercises and problems provide an opportunity to put this new-found knowledge into practice along the way. This book is an essential guide for students new to accountancy, and an equally useful tool for more experienced students and researchers.

Financial Accounting and Reporting is the most up to date text on the market. Now fully updated in its fourteenth edition, it includes extensive coverage of International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS). This market-leading text offers students a clear, well-structured and comprehensive treatment of the subject. Supported by illustrations and exercises, the book provides a strong balance of theoretical and conceptual coverage. Students using this book will gain the knowledge and skills to help them apply current standards, and critically appraise the underlying concepts and financial reporting methods.

Financial Accounting: An Introduction 4e does not simply teach the accounting standards; it demonstrates that accounting is about 'how to' as well as 'why to' record and report information in a way that engages directly with Generation Y students.

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both

quantitative and qualitative research informed the findings of the book.

An introduction

The third edition of Loftus' Financial Reporting has been updated for recent developments in the Australian Accounting Standards, including the release of the new Conceptual Framework. This text is designed to be used across the 2nd and 3rd year financial accounting units. A hallmark feature of the text is that it provides both a conceptual understanding and a practical application of the accounting standards. For students, an understanding of the conceptual basis of accounting and the rationale behind the principles is crucial to the consistent application of standards in a variety of practical contexts. The Financial Reporting interactive e-text features a range of instructional media content designed to provide students with an engaging learning experience. This includes practitioner videos (from Ernst & Young), interactive worked problems and questions with immediate feedback. Loftus' unique resource can also form the basis of a blended learning solution for lecturers.

This is a principles-based financial management textbook for undergraduate and Honours accounting students. The book takes cognizance of changes in the economic environment and their implications for the role of financial management and the teaching of the subject.

Divided into a selection of questions, exercises, and problems, this workbook will help keep accountants on top of current international economic affairs. The questions are multiple-choice and ensure understanding of a topic before moving onto the exercises and problems. The exercises can be used to develop proficiency in a topic where students are expected to reach the standard of the problems, and the problems are longer and more complex in nature, requiring an in-depth understanding of the topic. Combined, this complete approach provides a full view of the up-to-date requirements of the International Financial Reporting Standards.

This concise volume evaluates the cause and significance of recent corporate failures and financial scandals, and how they reflect on the fitness for purpose of the external auditors, financial reports, financial watchdogs, boards, directors and senior management. Failures like the disastrous collapse of Carillion, examined at length, have ultimately led to a crisis of confidence not only in the audit process but in the entire process of financial reporting. Revealing the shortcomings in audit quality, independence, choice and the growing expectation gap, Financial Failures and Scandals questions if the profession, its regulators or government watchdogs, are adequately prepared for the challenges of increasing regulation, public outcry and political scrutiny in the face of inevitable future financial failures. The fundamental structures of financial reporting, annual reports, boards of directors and senior management are often found to have failed. Tighter regulation and new requirements for reporting will inevitably result. Drawing on extensive research and interviews with insiders, users and experts, this unique book provides a compelling account of the profoundly disruptive impact of financial failures on corporate and financial accountability. Topical and readable, this book will be of great interest to students, researchers and professionals in accounting and auditing, as well as to policy makers and regulators.

This book constitutes the proceedings of the 14th International Conference on Mobile and Contextual Learning, mLearn 2015, held in a cruise ship leaving from and arriving to Venice, Italy, in October 2015. The 22 revised full papers and 6 short papers presented were carefully reviewed and selected from 81 submissions. The papers deal with the topics related to the theme of the conference: "The mobile learning voyage: from small ripples to massive open waters". The conference theme paid tribute to the developments that brought mobile learning from its infancy steps in the early 2000s to maturity in 2015, while simultaneously paving the way for the broad and open waters ahead with new developments and progress in mobile learning, and emerging ambient technologies.

The roles and responsibilities of administrative managers are identified and explained in this updated and comprehensive resource on managing the information needs of an organization to facilitate timely, relevant, and accurate communication. Topical case studies and practical examples illustrate the knowledge and skills required for success in office management. Whether managing cultural diversity in the work place or learning proper business ethics, the instructions outlined in this guide provide the basis for arriving at meaningful decisions that can make a candidate an asset in any office environment.

Some years ago, Frank Hauser, then a retired freelance director, and writer Russell Reich, his former student, self-published Notes on Directing in hardcover. It was immediately acclaimed as "a gem-witty and full of insight;" "so sensible, so complete, and so right;" and "amazingly illuminating" by the likes of Judi Dench, Edward Albee, and Terry Teachout. Gathered over Frank Hauser's long career, and polished to a sharp edge by Russell Reich, the 130 "Notes" address a wide range of topics, from understanding the script and defining the director's role, to casting, how to handle a first read-through of a script, rules for rehearsal, how to talk to actors, how to get a laugh, and the key elements of staging. Filled with enduring good advice expressed in assertive, no-nonsense language, and supported with explanatory commentary, insightful quotes and examples, and six valuable appendices, this deceptively slim book has the impact of a privileged apprenticeship, providing deep insight into the hidden process of creating a live, shared experience. For the student or professional engaged in a directing or acting career, the executive or manager looking for inspiring new ideas on leadership, or the arts lover wanting insight into the creative process, this book will be an invaluable experience. This new edition includes an interview with the co-author.

This book presents a collection of different researches and results on "e-learning". The chapters cover the deficiencies, requirements, advantages and disadvantages of e-learning and distance learning. So, the authors reported their research and analysis results on "e-learning" according to their areas of expertise.
