Critical thinking is the essential tool for ensuring that students fulfill their promise. But, in reality, critical thinking is still a luxury good, and students with the greatest potential are too often challenged the least. Thinking Like a Lawyer: Introduces a powerful but practical framework to close the critical thinking gap. Gives teachers the tools and knowledge to teach critical thinking to all students. Helps students adopt the skills, habits, and mindsets of lawyers. Empowers students to tackle 21st-century problems. Teaches students how to compete in a rapidly changing global marketplace. Colin Seale, a teacher-turned-attorney-turned-education-innovator and founder of thinkLaw, uses his unique experience to introduce a wide variety of concrete instructional strategies and examples that teachers can use in all grade levels and subject areas. Individual chapters address underachievement, the value of nuance, evidence-based reasoning, social-emotional learning, equitable education, and leveraging families to close the critical thinking gap.

From the 23rd to 26th of November 2009 in La Palma island, in the Canaries, the Comparative Education Society in Europe (CESE) organized an international symposium entitled PISA under Examination: Changing Knowledge, Changing Tests, and Changing Schools. During four days seventeen leading scholars of Europe and America presented their contributions to debate the different problematiques of the remarkable phenomenon represented by the OECD Programme for International Student Assessment or PISA. PISA is not merely an educational event. It is also a media circus which involves the public rehearsal for reasons for

failure or success; and even, in some cases, public and political and academic explanations about why 'failure' was not really that, and why 'success' was not really that either. At the centre of all these indications, we find the growing influence of international agencies on education and schooling which is decisively contributing to a marketisation of the field of education, in the context of an increasingly multilevel and fragmented arena for educational governance based on the formulation, the regulation and the transnational coordination and convergence of policies, buttressed at the same time by the diffusion of persuasive discursive practice.

Organized in four sections entitled The Comparative Challenges of the OCDE PISA Programme, PISA and School Knowledge, The Assessment of PISA, School Effectiveness and the Socio-cultural Dimension, PISA and the Immigrant Student Question, and Extreme Visions of PISA: Germany and Finland, the contributions of this book offers a comprehensive approach of all these challenging and significant issues written from different and distinct research and academic traditions.

There has been an increase in awareness (and perhaps occurrence) of individual and organized cheating on tests. Recent reports of widespread problems with state student accountability tests and teacher certification

testing have raised questions about the very validity of assessment programs. While there are several books that specifically detail the issues of test security cheating on assessments, few outline the statistical procedures used for detecting various types of potential test fraud and the associated research findings. Without a significant research literature base, the new generation of researchers will have little opportunity or incentive to improve on existing methods. Enlisting a variety of experts and scholars in different fields of testing, this edited volume expands on the current literature base by including examples of detailed research findings arrived at by statistical methodology. It also provides a synthesis of the current state of the art with regard to the statistical detection of testing infidelity, particularly for large-scale assessments. By presenting methods currently used by testing organizations and research on new methods, the volume offers an important forum for expanding the literature in this area.

Award-winning education journalist Peg Tyre mines up-to-the-minute research to equip parents with the tools and knowledge necessary to get their children the best education possible. We all know that the quality of education served up to our children in U.S. schools ranges from outstanding to shockingly inadequate. How can parents tell the difference? And how do they make sure their kids get what's best? Even the most involved and informed parents can feel overwhelmed and confused when making important decisions about their child's education. And the scary truth is that evaluating a school based on test scores and college admissions data is like selecting a car based on the color of its paint.

Synthesizing cutting-edge research and firsthand reporting, Peg Tyre offers parents far smarter and more sophisticated ways to assess a classroom and decide if the school and the teacher have the right stuff. Passionate and persuasive, The

SAT Study Guide and Practice Test Questions to Score a 1600

A top SAT coach—whose high-scoring strategies earned him \$300 an hour from Manhattan's elite private-school students—now makes his unique, proven secrets available to all. Money can buy academic success, and the SAT is no exception. Harvard honors graduate Eliot Schrefer

discovered this lucrative truth when he took a job at the nation's most exclusive test-prep firm. He has helped hundreds of his clients raise their scores an average of 300 points and reel in admission to exclusive colleges. Now, in a guide that is as unique as his tricks, Schrefer brings his extraordinary pointers to every anxious applicant. This user-friendly rescue manual delivers such scoreboosting features as: a killer vocabulary list, including words the SAT has repeated for decades (and why reading *Vanity Fair* magazine is smart test prep) cheap tricks to master the math section (surprise! you learned all you needed to know about SAT math by the eighth grade) how to be a grammar genius without cracking another book (bonus: discover the tiny subset of grammar rules that is the SAT's secret lover) Schrefer writes in a snappy, conversational tone, dishing gossipy anecdotes about former clients while presenting advice not found in competing books. With a design that is as vibrant as a gamer's virtual world, this is the ultimate weapon in the quest for test-score triumph.

Rosa and Eddie are among hundreds of teens applying to NASA's mysterious Interworlds Agency. They're not exactly sure what the top-secret program entails, but they know they want in. Rosa has her brilliant parents' legacies to live up to, and Eddie has nowhere else to go--he's certainly not going to stick around and wait for his violent father to get out of jail. Even if they are selected, they

have no idea what lies in store. But first they have to make it through round after round of crazy-competitive testing. And then something happens that even NASA's scientists couldn't predict . . . From the author of the acclaimed *Learning to Swear in America* comes another high-stakes adventure that's absolutely out of this world. For decades we've been studying, experimenting with, and wrangling over different approaches to improving public education, and there's still little consensus on what works, and what to do. The one thing people seem to agree on, however, is that schools need to be held accountable—we need to know whether what they're doing is actually working. But what does that mean in practice? High-stakes tests. Lots of them. And that has become a major problem. Daniel Koretz, one of

the nation's foremost experts on educational testing, argues in *The Testing Charade* that the whole idea of test-based accountability has failed—it has increasingly become an end in itself, harming students and corrupting the very ideals of teaching. In this powerful polemic, built on unimpeachable evidence and rooted in decades of experience with educational testing, Koretz calls out high-stakes testing as a sham, a false idol that is ripe for manipulation and shows little evidence of leading to educational improvement. Rather than setting up incentives to divert instructional time to pointless test prep, he argues, we need to measure what matters, and measure it in multiple ways—not just via standardized tests. Right now, we're lying to ourselves about whether our children are learning. And the longer we accept that lie, the more damage we do. It's time to end our blind reliance on high-stakes tests. With *The Testing Charade*, Daniel Koretz insists that we face the facts and change course, and he gives us a blueprint for doing better.

Today's students are tomorrow's leaders, and the college years are a critical period for their development of ethical standards. *Cheating in College* explores how and why students cheat and what policies, practices, and participation may be useful in promoting academic integrity and reducing cheating. The authors investigate trends over time, including internet-based cheating. They consider personal and situational explanations, such as the culture of groups in which dishonesty is more common (such as business majors) and social settings that support cheating (such as fraternities and sororities). Faculty and administrators are increasing their efforts to promote academic honesty among students. Orientation and training sessions, information on college and university websites, student handbooks that describe codes of conduct, honor codes, and course syllabi all define cheating and establish the consequences. Based on the authors' multiyear, multisite surveys, *Cheating in College* quantifies and analyzes student cheating to demonstrate why academic integrity is important and to describe the cultural efforts that are effective in restoring it. -- Gary Pavela, Syracuse University

High Stakes is a critical ethnography of an underfunded public elementary school in this era of accountability and high stakes testing. The book was written during the year the authors served as third and fourth grade teachers, and it juxtaposes the experiences of mostly minority children of poverty and their teachers with an examination of high stakes testing policies and the loss of a comprehensive education to political dictates.
