One of the strengths of this book is the author's ability to motivate the use of Bayesian methods through simple yet effective examples. - Katie St. Clair MAA Reviews.

Kiera Smith is not like ordinary Genetically Engineered Persons . . . The Bureau of Alien Affairs needed a special GEP agent with empathic abilities to handle their most extraordinary assignments—and a rogue geneticist saw to it that Kiera fit their specifications. But she turned out stronger, faster, smarter, and more impervious to harm than anyone anticipated. A reluctant "superhero," Kiera wishes she were normal, but it is not to be. On Orpheus Two, the indigenous Buri race faces extinction, a prospect the powerful Dynatec corporation welcomes and, in fact, may be actively hastening. It is Kiera's job to protect these beautiful, exotic aliens . . . and to discover what there is on Orpheus Two that Dynatec feels is worth killing for. But the magnetic allure of Thor, the breathtaking Buri leader, is proving a dangerous distraction. And now, to save Thor's people, Kiera will need a power she's never before possessed—something hidden in the unexplored recesses of her heart.

Jennifer Egan's spellbinding novel circles the lives of Bennie Salazar, an ageing former punk rocker and record executive, and Sasha, the passionate, troubled young woman he employs. Although Bennie and Sasha never discover each other's pasts, the reader does, in intimate detail, along with the secret lives of a host of

other characters whose paths intersect with theirs, over many years, in locales as varied as New York, San Francisco, Naples, and Africa. We first meet Sasha in her mid-thirties, on her therapist's couch in New York City, confronting her long-standing compulsion to steal. Later, we learn the genesis of her turmoil when we see her as the child of a violent marriage, then a runaway living in Naples, then as a college student trying to avert the suicidal impulses of her best friend. We meet Bennie Salazar at the melancholy nadir of his adult life-divorced, struggling to connect with his nine-year-old son, listening to a washed up band in the basement of a suburban house-and then revisit him in 1979, at the height of his youth, shy and tender, revelling in San Francisco's punk scene as he discovers his ardour for rock and roll and his gift for spotting talent. We learn what became of his high school gang-who thrived and who faltered-and we encounter Lou Kline, Bennie's catastrophically careless mentor, along with the lovers and children left behind in the wake of Lou's far flung sexual conquests and meteoric rise and fall. A Visit from the Goon Squad is a book about the interplay of time and music, about survival, about the stirrings and transformations set inexorably in motion by even the most passing conjunction of our fates. In a breathtaking array of styles and tones ranging from tragedy to satire to Powerpoint, Egan captures the undertow of self-destruction that we all must either master or succumb to; the basic human hunger for redemption; and the universal tendency to reach for both-and escape the merciless progress of time-in the transporting realms of art and music. Sly, startling, exhilarating work from one of our boldest writers.

A revolutionary textbook introducing masters and doctoral students to the major research approaches and methodologies in the social sciences. Written by an outstanding set of scholars, and derived from successful course teaching, this volume will empower students to choose their own approach to research, to justify this approach, and to situate it within the discipline. It addresses questions of ontology, epistemology and philosophy of social science, and proceeds to issues of methodology and research design essential for producing a good research proposal. It also introduces researchers to the main issues of debate and contention in the methodology of social sciences, identifying commonalities, historic continuities and genuine differences.

The two-time Grammy-nominated singer-songwriter behind the groundbreaking album *Exile in Guyville* traces her life and career in a genre-bending memoir in stories about the pivotal moments that haunt her. "Honest, original and absolutely remarkable."—NPR (Best Books of the Year) When Liz Phair shook

things up with her musical debut, *Exile in Guyville*—making her as much a cultural figure as a feminist pioneer and rock star—her raw candor, uncompromising authenticity, and deft storytelling inspired a legion of critics, songwriters, musicians, and fans alike. Now, like a Gen X Patti Smith, Liz Phair reflects on the path she has taken in these piercing essays that reveal the indelible memories that have stayed with her. For Phair, horror is in the eye of the beholder—in the often unrecognized universal experiences of daily pain, guilt, and fear that make up our humanity. Illuminating despair with hope and consolation, tempering it all with her signature wit, *Horror Stories* is immersive, taking readers inside the most intimate junctures of Phair's life, from facing her own bad behavior and the repercussions of betraying her fundamental values, to watching her beloved grandmother inevitably fade, to undergoing the beauty of childbirth while being hit up for an autograph by the anesthesiologist. *Horror Stories* is a literary accomplishment that reads like the confessions of a friend. It gathers up all of our isolated shames and draws them out into the light, uniting us in our shared imperfection, our

uncertainty and our cowardice, smashing the stigma of not being in control. But most importantly, the uncompromising precision and candor of Horror Stories transforms these deeply personal experiences into tales about each and every one of us.

Everyone is talking about this New York Times bestselling rom-com that Mindy Kaling called “utterly charming!” *Eleanor & Park* meets Bollywood in this hilarious and heartfelt novel about two Indian-American teens whose parents conspire to arrange their marriage. Dimple Shah has it all figured out. With graduation behind her, she’s more than ready for a break from her family, from Mamma’s inexplicable obsession with her finding the “Ideal Indian Husband.” Ugh. Dimple knows they must respect her principles on some level, though. If they truly believed she needed a husband right now, they wouldn’t have paid for her to attend a summer program for aspiring web developers...right? Rishi Patel is a hopeless romantic. So when his parents tell him that his future wife will be attending the same summer program as him—wherein he’ll have to woo her—he’s totally on board. Because as silly as it sounds to most people in his life, Rishi wants to

be arranged, believes in the power of tradition, stability, and being a part of something much bigger than himself. The Shahs and Patels didn't mean to start turning the wheels on this "suggested arrangement" so early in their children's lives, but when they noticed them both gravitate toward the same summer program, they figured, Why not? Dimple and Rishi may think they have each other figured out. But when opposites clash, love works hard to prove itself in the most unexpected ways.

mind and explains the two systems that drive the way we think. System 1 is fast, intuitive, and emotional; System 2 is slower, more deliberative, and more logical. The impact of overconfidence on corporate strategies, the difficulties of predicting what will make us happy in the future, the profound effect of cognitive biases on everything from playing the stock market to planning our next vacation—each of these can be understood only by knowing how the two systems shape our judgments and decisions. Engaging the reader in a lively conversation about how we think, Kahneman reveals where we can and cannot trust our intuitions and how we can tap into the benefits of slow thinking. He offers practical and enlightening insights into how choices are made in both our business and our personal lives—and how we can use different techniques to guard against the mental glitches that often get us into trouble. A heartbreaking and powerful story about a black boy killed by a police officer, drawing connections through history, from award-winning author Jewell Parker Rhodes. Only the living can make the world better. Live and make it better. Twelve-year-old Jerome is shot by a police officer who mistakes his toy gun for a real threat. As a ghost, he observes the devastation that's been unleashed on his family and community in the wake of what they see as an unjust and brutal killing. Soon Jerome meets another ghost: Emmett Till, a boy from a very different time but similar circumstances. Emmett helps Jerome process what has happened, on a journey towards recognizing how historical racism may have led to the events that ended his life. Jerome also meets Sarah, the daughter of the police officer, who grapples with her father's actions. Once again Jewell

Parker Rhodes deftly weaves historical and socio-political layers into a gripping and poignant story about how children and families face the complexities of today's world, and how one boy grows to understand American blackness in the aftermath of his own death.

Diane Arbus was one of the greatest photographers of the last century. Her portraiture of freaks, circus performers, twins, nudists and others on the social margins connected with a wide public at a deep psychological level.

Her suicide in New York in 1971 overshadowed the reception to her work. Her posthumous exhibition at the Museum of Modern Art a year later drew lines around the block. She was born into a Russian-Jewish family, the Nemerovs, who owned a department store on Fifth Avenue. They were family friends with the Avedons. Richard Avedon later championed Arbus's work. Avedon rose to greater and greater commercial success through the magazine world. Arbus died in a rent-protected apartment scrambling to earn her keep with odd teaching assignments. Lubow's biography begins at the moment Arbus quit the world of commercial photography to be an artist. She was uncompromising in that ambition. The book ends with her death. The entire narrative is a slow march towards that event.

In 2006, about 69 million U.S. households had pets, giving homes to around 73.9 million dogs, 90.5 million cats, and 16.6 million birds, and spending more than 38 billion dollars on companion animals. As never before in history, our pets are truly members of the family. But the notion of “companion species”—knotted from human beings, animals and other organisms, landscapes, and technologies—includes much more than “companion animals.” In *When Species Meet*, Donna J. Haraway digs into this larger phenomenon to contemplate the interactions of humans with many kinds of critters, especially with those called domestic. At the heart of the book are her experiences in agility training with her dogs Cayenne and Roland, but Haraway’s vision here also encompasses wolves, chickens, cats, baboons, sheep, microorganisms, and whales wearing video cameras. From designer pets to lab animals to trained therapy dogs, she deftly explores philosophical, cultural, and biological aspects of animal-human encounters. In this deeply personal yet intellectually groundbreaking work, Haraway develops the idea of companion species, those who meet and break bread together but not without some indigestion. “A great deal is at stake in such meetings,” she writes, “and outcomes are not

guaranteed. There is no assured happy or unhappy ending-socially, ecologically, or scientifically. There is only the chance for getting on together with some grace." Ultimately, she finds that respect, curiosity, and knowledge spring from animal-human associations and work powerfully against ideas about human exceptionalism.

This is the dramatic, heart-wrenching tale of Max (from *Freak the Mighty*) and Worm, two outsiders who turn to each other for survival.

Can you plan happiness? It's been a year since Paige's first boyfriend died in a swimming accident and it's time she rejoined the real world. So she makes a plan: 1. Date a boy (long-standing crush Ryan Chase seems like the perfect choice) 2. Attend parties (with best friends by your side: doable) 3. Join a club (simple enough, right?) 4. Travel (might as well dream big) 5. Swim (terrifying. Impossible) But when she meets Ryan's sweet but so nerdy cousin, Max, he opens up her world and Paige's plans start to change. Is it too late for a second chance at life? Brimming with characters so real you feel you could pick up the phone and call them, *The Start of Me and You* will prove that it's never too late for second chances. Perfect for fans of Rainbow Rowell, Jennifer Niven and John Green. Chosen by bestselling author Amy Alward as part of the 2017 Zoella Book Club!

#1 New York Times Bestseller Over 1 million copies sold In this generation-defining self-help guide, a superstar blogger cuts through the crap to show us how to stop trying to be "positive" all the time so that we can truly become better, happier people. For decades, we've been told that positive thinking is the key to a happy, rich life. "F**k positivity," Mark Manson says. "Let's be honest, shit is f**ked and we have to live with it." In his wildly popular Internet blog, Manson doesn't sugarcoat or equivocate. He tells it like it is—a dose of raw, refreshing, honest truth that is sorely lacking today. The Subtle Art of Not Giving a F**k is his antidote to the coddling, let's-all-feel-good mindset that has infected American society and spoiled a generation, rewarding them with gold medals just for showing up. Manson makes the argument, backed both by academic research and well-timed poop jokes, that improving our lives hinges not on our ability to turn lemons into lemonade, but on learning to stomach lemons better. Human beings are flawed and limited—"not everybody can be extraordinary, there are winners and losers in society, and some of it is not fair or your fault." Manson advises us to get to know our limitations and accept them. Once we embrace our fears, faults, and uncertainties, once we stop running and avoiding and start confronting painful truths, we can begin to find the courage, perseverance, honesty, responsibility, curiosity, and forgiveness

we seek. There are only so many things we can give a f**k about so we need to figure out which ones really matter, Manson makes clear. While money is nice, caring about what you do with your life is better, because true wealth is about experience. A much-needed grab-you-by-the-shoulders-and-look-you-in-the-eye moment of real-talk, filled with entertaining stories and profane, ruthless humor, *The Subtle Art of Not Giving a F**k* is a refreshing slap for a generation to help them lead contented, grounded lives.

Which theoretical and methodological approaches of contemporary cultural criticism resonate within the field of disability studies? What can cultural studies gain by incorporating disability more fully into its toolbox for critical analysis? *Culture - Theory - Disability* features contributions by leading international cultural disability studies scholars which are complemented with a diverse range of responses from across the humanities spectrum. This essential volume encourages the problematization of disability in connection with critical

theories of literary and cultural representation, aesthetics, politics, science and technology, sociology, and philosophy. It includes essays by Lennard J. Davis, Rosemarie Garland-Thomson, Dan Goodley, Robert McRuer and Margrit Shildrick.

Almost everyone can run. Only very few can run a marathon. But what is it for agents to be able to do things? This question, while central to many debates in philosophy, is still awaiting a comprehensive answer. The book provides just that. Drawing on some valuable insights from previous works of abilities and making use of possible world semantics, Jaster develops the "success view", a view on which abilities are a matter of successful behavior. Along the way, she explores the gradable nature of abilities, the contextsensitivity of ability statements, the difference between general and specific abilities, the relationship between abilities and dispositions, and the ability to act otherwise. The book is mandatory reading for anyone working on abilities, and provides valuable insights for anyone dealing with agents' abilities in other fields of philosophy. For this book, Romy Jaster has received both the Wolfgang Stegmüller Prize and the De Gruyter Prize for Analytical Philosophy of Mind or Metaphysics/Ontology. A story of determination and survival from the acclaimed author of FREAK THE MIGHTY. "This thrilling and elegant book ... will hold the interest of even the most stalwart landlubber." -- PWTwelve-year-old Skiff Beaman's mom just died, and his fisherman dad is too depressed to drag himself off the couch and go to work. So these days Skiff has to take care of everything himself. But when his dad's boat sinks, Skiff discovers it will cost thousands to buy a new engine. Skiff's lobster traps won't earn him enough, but there are bigger fish in the sea -- bluefin

tuna. If he can catch one of those monster fish, Skiff just might save the boat -- and his family. This is the first text in a generation to re-examine the purpose of the mathematical statistics course. The book's approach interweaves traditional topics with data analysis and reflects the use of the computer with close ties to the practice of statistics. The author stresses analysis of data, examines real problems with real data, and motivates the theory. The book's descriptive statistics, graphical displays, and realistic applications stand in strong contrast to traditional texts that are set in abstract settings. An erotically charged, addictive thriller from the future queen of suspense. Living in Toronto for a year, Elena is leading the normal life she has always dreamed of, including a stable job as a journalist and a nice apartment shared with her boyfriend. As the lone female werewolf in existence, only her secret midnight prowls and her occasional inhuman cravings set her apart. Just one year ago, life was very different. Adopted by the Pack when bitten, Elena had spent years struggling with her

resentment at having her life stolen away. Torn between two worlds, and overwhelmed by the new passions coursing through her body, her only option for control was to deny her awakening needs and escape. But now the Pack has called Elena home to help them fight an alliance of renegade werewolves who are bent on exposing and annihilating the Pack. And although Elena is obliged to rejoin her "family," she vows not to be swept up in Pack life again, no matter how natural it might feel. She has made her choice. Trouble is, she's increasingly uncertain if it's the right one. An erotically charged thriller, *Bitten* will awaken the voracious appetite of every reader, as the age-old battle between man and beast, between human and inhuman forces, comes to a head in one small town and within one woman's body.

A comprehensive introduction to statistics that teaches the fundamentals with real-life scenarios, and covers histograms, quartiles, probability, Bayes' theorem, predictions, approximations, random samples, and related topics.

This book explores the relationships between financial inclusion, poverty and inclusive development from Islamic perspectives. Financial inclusion has become an important global agenda and priority for policymakers and regulators in many Muslim countries for sustainable long-term economic growth. It has also become an integral part of many development institutions and multilateral development banks in efforts to promote inclusive growth. Many studies in economic development and poverty reduction suggest that financial inclusion matters. Financial inclusion, within the

broader context of inclusive development, is viewed as an important means to tackle poverty and inequality and to address the sustainable development goals (SDGs). This book contributes to the literature on these topics and will be of interest to researchers and academics interested in Islamic finance and financial inclusion.

Decision Making for Educational Leaders

Half the world's population is now urbanised and cities are assuming a larger role in debates about the security and sustainability of the global food system. Hence, planning for sustainable food production and consumption is becoming an increasingly important issue for planners, policymakers, designers, farmers, suppliers, activists, business and scientists alike. The rapid growth of the food planning movement owes much to the unique multi-functional character of food systems. In the wider contexts of global climate change, resource depletion, a burgeoning world population, competing food production systems and diet-related public health concerns, new paradigms for urban and regional planning capable of supporting sustainable and equitable food systems are urgently needed. This book addresses this urgent need. By working at a range of scales and with a variety of practical and theoretical models, this book reviews and elaborates definitions of sustainable food systems, and begins to define ways of achieving them. Four different themes have been defined as entry-points

into the discussion of 'sustainable food planning'. These are (1) urban food governance, (2) integrating health, environment and society, (3) urban agriculture (4) planning and design. 'This is an important compilation on a timely topic. It brings together the work of planners and designers from both sides of the Atlantic, and challenges us to think about how to create food systems that deliver healthy, just, and sustainable communities and vital places. The book moves dexterously between the grassroots and policy halls and draws valuable lessons for theory and practice.' Dr. Kami Pothukuchi, Department of Urban Studies & Planning, Wayne State University

'To address the problems of urban food production we need to look at the city in a completely different way. This timely book will act as an important source for those who have an ethical interest, not only in food, but in improving the quality and justice of life in our city communities.' Prof. Flora Samuel, School of Architecture, University of Sheffield and member of Royal Institute of British Architects Research and Development Committee

'This publication provides a lot of "food for thought", not just for persons professionally involved in the food sector and officials dealing with national food policies, but especially for local and regional authorities, urban planners and architects, NGOs and community based organisations, health and environmental officers and concerned consumers. Against the background of the growing awareness of the elevated social, health and ecological costs of the mainstream globalized agri-

food system, this book analyses the emergence of a new vision and many initiatives that seek to reconnect (sustainable) production with (sustainable) consumption Hence, the book delivers what is promised in its title: it discusses new concepts related to food and sustainable urban/regional planning based on a critical review of innovative practices at various levels.' Ir. Henk de Zeeuw, Director RUA Foundation 'For those who work to address the future challenges facing city development, this book is a must. Why? Because today practitioners and professionals are being asked to understand urban food production within a social, economic and ecological context. This book shows us how these connections are being made. The chapters are accessible and fascinating and will help beginners and experts to deal with food production in their everyday work.' Dr. Carlo W. Becker, bgmr Landscape Architects Berlin/Leipzig and Technical University Cottbus

In The Nones: Where They Came From, Who They Are, and Where They Are Going, Ryan P. Burge details a comprehensive picture of an increasingly significant group--Americans who say they have no religious affiliation. The growth of the nones in American society has been dramatic. In 1972, just 5 percent of Americans claimed "no religion" on the General Social Survey. In 2018, that number rose to 23.7 percent, making the nones as numerous as both evangelical Protestants and Roman Catholics. Every indication is that the nones will be the largest religious group in the United States in the next decade. Burge illustrates his precise but accessible descriptions with charts and graphs drawn from over a dozen carefully curated datasets, some tracking changes in American religion over a long period of time, others large enough to allow a statistical deep dive on subgroups such as atheists and agnostics. Burge also draws

on data that tracks how individuals move in and out of religion over time, helping readers understand what type of people become nones and what factors lead an individual to return to religion. The Nones gives readers a nuanced, accurate, and meaningful picture of the growing number of Americans who say they have no religious affiliation. Burge explains how this rise happened, who the nones are, and what they mean for the future of American religion.

A presentation of music and language within an integrative, embodied perspective of brain mechanisms for action, emotion, and social coordination. This book explores the relationships between language, music, and the brain by pursuing four key themes and the crosstalk among them: song and dance as a bridge between music and language; multiple levels of structure from brain to behavior to culture; the semantics of internal and external worlds and the role of emotion; and the evolution and development of language. The book offers specially commissioned expositions of current research accessible both to experts across disciplines and to non-experts. These chapters

provide the background for reports by groups of specialists that chart current controversies and future directions of research on each theme. The book looks beyond mere auditory experience, probing the embodiment that links speech to gesture and music to dance. The study of the brains of monkeys and songbirds illuminates hypotheses on the evolution of brain mechanisms that support music and language, while the study of infants calibrates the developmental timetable of their capacities. The result is a unique book that will interest any reader seeking to learn more about language or music and will appeal especially to readers intrigued by the relationships of language and music with each other and with the brain. A guide to decision making for school administrators.

It seems, at first glance, like an obvious step to take to improve industrial productivity: one should simply watch workers at work in order to learn how they actually do their jobs. But American engineer FREDERICK WINSLOW TAYLOR (1856-1915) broke new ground with this 1919 essay, in which he applied the rigors of scientific observation to such labor as shoveling and bricklayer in order to streamline their work... and bring a sense of logic and practicality to the management of that work. This highly influential book, must-reading for anyone seeking to understand modern management practices, puts lie to such misconceptions that making industrial processes more efficient increases unemployment and that shorter workdays decrease productivity. And it laid the foundations for the discipline of management to be studied, taught, and applied with methodical precision.
