During his lifetime, the sounds of Handel's music reached from court to theater, echoed in cathedrals, and filled crowded taverns, but the man himself—known to most as the composer of Messiah—is a bit of a mystery. Though he took meticulous care of his musical manuscripts and even provided for their preservation on his death, very little of an intimate nature survives. One document—Handel's will—offers us a narrow window into his personal life. In it, he remembers not only family and close colleagues but also neighborhood friends. In search of the private man behind the public figure, Ellen T. Harris has spent years tracking down the letters, diaries, personal accounts, legal cases, and other documents connected to these bequests. The result is a tightly woven

tapestry of London in the first half of the eighteenth century, one that interlaces vibrant descriptions of Handel's music with stories of loyalty, cunning, and betrayal. With this wholly new approach, Harris has achieved something greater than biography. Layering the interconnecting stories of Handel's friends like the subjects and countersubjects of a fugue, Harris introduces us to an ambitious, shrewd, generous, brilliant, and flawed man, hiding in full view behind his public persona.

For more than a century, scientists have raced to unravel the human family tree and have grappled with its complications. Now, with an astonishing new discovery, everything we thought we knew about primate origins could change. Lying inside a high-security vault, deep within the heart of one of the world's leading natural history museums, is the scientific find of a lifetime - a perfectly fossilized early primate, older than the previously most famous primate fossil, Lucy, by forty-four

million years. A secret until now, the fossil - "Ida" to the researchers who have painstakingly verified her provenance - is the most complete primate fossil ever found. Forty-seven million years old, Ida rewrites what we've assumed about the earliest primate origins. Her completeness is unparalleled - so much of what we understand about evolution comes from partial fossils and even single bones, but Ida's fossilization offers much more than that, from a haunting "skin shadow" to her stomach contents. And, remarkably, knowledge of her discovery and existence almost never saw the light of day. With exclusive access to the first scientist to study her, the award-winning science writer Colin Tudge tells the history of Ida and her place in the world. A magnificent, cutting-edge scientific detective story followed her discovery, and *The Link* offers a wide-ranging investigation into

Ida and our earliest origins. At the same time, it opens a stunningly evocative window into our past and changes what we know about primate evolution and, ultimately, our own.

Written for prospective and practicing visual arts, music, drama, and dance educators, *Teaching the Arts to Engage English Language Learners* offers guidance for engaging ELLs, alongside all learners, through artistic thinking. By paying equal attention to visual art, music, drama, and dance education, this book articulates how arts classrooms can create

rich and supportive contexts for ELLs to grow socially, academically, and personally. The making and relating, perceiving and responding, and connecting and understanding processes of artistic thinking, create the terrain for rich curricular experiences. These processes also create the much-needed spaces for ELLs to gain communicative practice, skill, and confidence. Special features include generative texts such as films, poems, and performances that function as springboards for arts educators to adapt according to the needs of their classroom; teaching tips, formative assessment practices, and related instructional tables and resources; an annotated list of internet sites, reader-friendly research articles, and instructional materials; and a glossary for readers' reference.
