The former US Congresswoman "offers the Watergate investigation as a model for the kind of open, wide-ranging inquiry that she argues is necessary."—The New York Review of Books Elizabeth Holtzman has been a principled leader and a persistent voice for equality and accountability since she became the youngest woman ever elected to Congress in 1973, which she remained for forty-two years. But she saw American democratic ideals, and the rule of law in the United States, eroding under President Trump. And as a member of the House Judiciary Committee that voted to impeach Nixon, and one of the members of the Homeland Security advisory council who resigned in protest of President Donald Trump’s policy of separating families at the border, former Congresswoman Holtzman knows of which she speaks. The Case for Impeaching Trump establishes the requirements for impeachment as set out by the Constitution and proves that President Trump’s actions met those requirements. Holtzman makes the definitive, constitutional case that impeachment was justified. "Elizabeth Holtzman has always been the first and the bravest, the smartest and most trusted. She is the expert we need to deal with an accidental President who got there as a serial sexual harasser, a candidate who lost the popular vote, and an unsuccessful businessman who was born on third base and thinks he hit a home run. Now what? Ask Liz!" —Gloria Steinem Praise for Elizabeth Holtzman "A forceful advocate." —USA Today "Considered one of the brightest stars in New York City politics, earning a reputation for intelligence and honesty." —The Washington Post "A Watergate hero." —The New Republic "A woman of integrity who lives by her principles." —Publishers Weekly

*"This "salutary song" becomes a celebration of the richness of existence in all its forms that reached moments of arresting beauty and great lyric intensity, as the poet acknowledges that his debt of gratitude to the world is far from being extinguished, and that he has not fully expressed his appreciation for having had the opportunity to read and interpret the signs of the great book of nature.*

*Frances Yates and the Hermetic Tradition*

*This is the first full-length biography of British historian Frances Yates, author of such acclaimed works as Giordano Bruno and The Hermetic Tradition and The Art of Memory, one of the most influential non-fiction books of the twentieth century. Jones's book explores Yates' remarkable life and career and her interest in the mysterious figure of Giordano Bruno and the influence of the Hermetic tradition on the culture of the Renaissance. Her revolutionary way of viewing history, literature, art, and the theater as integral parts of the cultural picture of the time period did much to shape modern interdisciplinary approaches to history and literary criticism. Jones focuses not only on the particulars of Yates' life, but also sheds light on the tradition of female historians of her time and their contributions to Renaissance scholarship. In addition to her insightful commentary on Yates' academic work, Jones quotes from Frances' diaries and the writings of those who were close to her, to shed light on Yates' private life. This biography is significant for those with an interest in literary criticism, women's history, scientific history, or the intellectual atmosphere of post-war Britain, as well as those interested in the Hermetic tradition.*

The average age of the world’s population is increasing at an unprecedented rate and this increase is changing the world. This “Silver tsunami” emphasizes the need to provide advanced training in epidemiology and increase the cadre of experts in the study of aging. This book is designed to summarize unique methodological issues relevant to the study of aging, biomarkers of aging and the biology/physiology of aging and in-depth discussions of the etiology and epidemiology of common geriatric syndromes and diseases. Contributing authors in the book represent many disciplines, not only epidemiology and clinical geriatrics, but also demography, health services, research, cardiovascular disease, diabetes, psychiatry, neurology, social services, musculoskeletal diseases and cancer. The aim of the book is to provide a broad multidisciplinary background for any student/researcher interested in aging. The material in the book is organized and comprehensive. It represents the most up-to-date information on the scientific issues in aging research written by academics who specialize in research and training in the broad field of aging. The structure and organization of the book reflects our course series in the Epidemiology of Aging starting with the broad issues of demography and methodology, and then addressing specific health conditions and geriatric conditions common to older persons.

The first historical heroic epic authored by a woman. Scanderbeide recounts the exploits of fifteenth-century Albanian warrior-prince George Scanderbeg and his war of resistance against the Ottoman sultanate. Filled with scenes of intense and suspenseful battles contrasted with romantic episodes, Scanderbeide combines the action and fantasy characteristic of the genre with analysis of its characters' motivations. In selecting a military campaign as her material and epic poetry as her medium, Margherita Sarrocchi (1560?-1617) not only engages in the masculine subjects of political conflict and warfare but also tackles a genre that was, until that point, the sole purview of men. First published posthumously in 1623, Scanderbeide reemerges here in an adroit English prose translation that maintains the suspense of the original text and gives ample context to its rich cultural implications.

*Designed for teaching astrophysics to physics students at advanced undergraduate or beginning graduate level, this textbook also provides an overview of astrophysics for astrophysics graduate students, before they delve into more specialized volumes. Assuming background knowledge at the level of a physics major, the textbook develops astrophysics from the basics without requiring any previous study in astronomy or astrophysics. Physical concepts, mathematical derivations and observational data are combined in a balanced way to provide a unified treatment. Topics such as general relativity and plasma physics, which are not usually covered in physics courses but used extensively in astrophysics, are developed from first principles. While the emphasis is on developing the fundamentals thoroughly, recent important discoveries are highlighted at every stage.*

Ed Lynskey, one of the most acclaimed modern crime noir authors, returns to the Smoky Mountains with a new hardboiled tale of murder, passion, and intense action.

The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien’s major poem, Yvain, in verse that fully and satisfyingly

captures the movement, the sense, and the spirit of the Old French original. Yvain is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary

and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.
