This edition looks at the growing disenchantment with Liberal Democracy in ex-communist countries, continuing nationalist wars, feminism and green ideologies as well as examining such topics as US right-wing thought and Islamic nationalism.

To Whom it May Concern, It was easy to call us forbidden and harder to call us soulmates. Yet I believed we were both. Forbidden soulmates. When I arrived to Edgewood, Wisconsin I didn't plan to find him. I didn't plan to stumble into Joe's bar and have Daniel's music stir up my emotions. I had no clue that his voice would make my hurts forget their own sorrow. I had no idea that my happiness would remember its own bliss. When I started senior year at my new school, I wasn't prepared to call him Mr. Daniels, but sometimes life happens at the wrong time for all the right reasons. Our love story wasn't only about the physical connection. It was about family. It was about loss. It was about being alive. It was silly. It was painful. It was mourning. It was laughter. It was ours. And for those reasons alone, I would never apologize for loving Mr. Daniels. -Ashlyn Jennings

An account of the work, writings and career of Louise Bourgeois, who had a flourishing midwifery practice at the French royal court at the beginning of the seventeenth century. Bourgeois was notable as a successful and articulate woman practitioner and author. Perkins, who is an expert on French literature, has integrated into her account recent work of social historians on medicine: on the medical market place, on patient-doctor relations, especially between women and medical practitioners, and on the social construction of the body.

Marion Zimmer Bradley's legendary saga of Avalon's extraordinary women continues with a tale of fiery visions, a lost king, and a forthcoming destiny... A boy raised in secret after traitors kill his parents will return to Avalon-and when he does, he'll be faced with a formidable task: to prove his worth as a son of the kings and priestesses of his land and lead his followers to victory, wielding the newly-forged sword Excalibur.

Now in paperback and filled with stunning full-color photographs, Steve Swinburne's concept book introduces children to the basics of shadows. He then leads them on a shadow hunt, playing a game called "Guess Whose Shadow?," in which young ones will discover there's more to shadows than first meets the eye.

Making Women's Medicine Masculine challenges the common belief that prior to the eighteenth century men were never involved in any aspect of women's healthcare in Europe. Using sources ranging from the writings of the famous twelfth-century female practitioner, Trota of Salerno, all the way to the great tomes of Renaissance male physicians, and covering both medicine and surgery, this study demonstrates that men slowly established more and more authority in diagnosing and prescribing treatments for women's gynaecological conditions (especially infertility) and even certain obstetrical conditions. Even if their 'hands-on' knowledge of women's bodies was limited by contemporary mores, men were able to establish their increasing authority in this and all

branches of medicine due to their greater access to literacy and the knowledge contained in books, whether in Latin or the vernacular. As Monica Green shows, while works written in French, Dutch, English, and Italian were sometimes addressed to women, nevertheless even these were often re-appropriated by men, both by practitioners who treated women and by laymen interested to learn about the 'secrets' of generation. While early in the period women were considered to have authoritative knowledge on women's conditions (hence the widespread influence of the alleged authoress 'Trotula'), by the end of the period to be a woman was no longer an automatic qualification for either understanding or treating the conditions that most commonly afflicted the female sex - with implications of women's exclusion from production of knowledge on their own bodies extending to the present day.

Longarm sends Paradise straight to hell! Marshal Monty Kilpatrick was nobody's fool. That's why his killers had to take him by surprise. But with a bullet in his belly, Monty knew just how to right the last wrongs of his life—he wrote a letter to his good friend Marshal Custis Long, the one they call Longarm. Now Longarm is out to avenge his good friend's murder and set things right with the man's family—and he doesn't care what trail he'll have to ride, man he'll have to face, or girl he'll have to charm to get the job done. Credit Analysis and Lending Management is a new Australasian text that focuses on the core lending functions of financial institutions, covering asset management, credit risk assessment and analysis, lending policy formulation and management, and the rise of new product development and marketing in the financial services sector. The value of any financial institution is measured by its ability to effectively manage and reduce its credit risk. This text details the structure of the credit organisation, including loan markets. Relevant financial statements are presented to develop students' interpretative and analytical understanding of financial statements. Features: * Developments in loan marketing and new loan products are profiled and assessed (see chapter 17.) * Problem loan management is discussed as a growing professional issue (see chapter 16). * Detailed case studies at the end of the text present a diverse set of professional scenarios that can be used for assignment, assessment and group work activities. * 'Industry insight' boxes profile current professional issues and identify industry developments. * 'A day in the life of...' boxes highlight the diversity of professional roles in the banking industry.

PASSPORT TO HELL Buffy, Oz, and Angel are Europe-bound, only they're not flying any airlines. They're traveling limbo's "ghost roads" in search of Jacques Regnier. Jacques is the sole heir of the dying Gatekeeper whose Boston mansion is the supernatural barrier restraining thousands of the world's monsters. The evil Sons of Entropy will do anything to destroy the gate -- even if it means trading the power-laden Spear of Longinus to the wicked vampires holding Jacques. Back home, the ghost ship Flying Dutchman has set sail for Sunnydale, determined to shanghai new crewmen -- dead or alive. For Willow, Xander, Cordelia, and Giles, it's an ocean of trouble, especially when the monstrous Kraken reemerges with a vengeance. But everyone's assistance will be needed once Buffy locates Jacques, and uncovers the shocking plans the Sons of Entropy have already placed in motion -- a plan that, if successful, will destroy the world and create a horrible new realm ruled by monsters.

The model system created by the European Convention on Human Rights is internationally renowned. The rights it protects are among the most important, covering not only civil and political rights, but also certain social and economic rights, such as the right to respect for personal possessions. The European Court of Human Rights stands at the heart of the protection mechanism guaranteeing these rights. It is now an entirely judicial system since the adoption and entry into force of Protocol No. 11, which reorganised the whole system and extended

the Court's jurisdiction. The Court's excessive caseload is a problem, though, and this has led to the further improvements contained in Protocol No. 14, designed to strengthen the operation and effectiveness of the Court.

National Book Award Nominee: "Somehow both genuinely scary and genuinely funny, sometimes on the same page—a wickedly entertaining ride."—Publishers Weekly (starred review) One of Publishers Weekly's Best Books of the Year On the outskirts of Buenos Aires in 1907, a doctor becomes involved in a misguided experiment that investigates the threshold between life and death. One hundred years later, a celebrated artist goes to extremes in search of aesthetic transformation, turning himself into an art object. How far are we willing to go, this novel asks, in pursuit of transcendence? The world of Comemadre is full of vulgarity, excess, and discomfort: strange ants that form almost perfect circles, missing body parts, obsessive love affairs, and man-eating plants. Darkly funny, smart, and engrossing, here the monstrous is not alien, but the consequence of our relentless pursuit of collective and personal progress. "Outrageous...insanely funny."—BOMB "In this dark, dense, surprisingly short debut novel by the Argentinian author, we're confronted with enough grotesqueries to fill a couple Terry Gilliam films and, more importantly, with the idea that the only real monsters are those that are formed out of our own ambition." —The Millions

In a pathbreaking study of the gendering of the practices of history, Bonnie Smith examines the differences in 19th-century approaches to history between male and female perspectives. Smith demonstrates that even today, the practice of history is still propelled by fantasies of power and subjugation.

I was warned about Tristan Cole. "Stay away from him," people said. "He's cruel." "He's cold." "He's damaged." It's easy to judge a man because of his past. To look at Tristan and see a monster. But I couldn't do that. I had to accept the wreckage that lived inside of him because it also lived inside of me. We were both empty. We were both looking for something else. Something more. We both wanted to put together the shattered pieces of our yesterdays. Then perhaps we could finally remember how to breathe.

The greatest Americans Have not been born yet They are waiting quietly For their past to die please give blood Here is the account of a man so ravished by a kiss that it distorts his highest and lowest frequencies of understanding into an Incongruent mean of babble and brilliance... This is the complete history of the alleged mob activity in Newport, Kentucky, and the magnificent Beverly Hills Supper Club, where 169 people died and the lives of thousands were changed in an instant. Unlike other publications, however, this is the true untold story of what

led to Kentucky's worst tragedy-a story of greed, corruption, deceit, Mafia rule, government cover-ups, kidnapping, and even murder. In fact, this book details one of the worst cases of mass murder in US history.

THE FIRST MERCY THOMPSON NOVEL! Moon Called is the novel that introduced Patricia Briggs's Mercy Thompson to the world and launched a #1 bestselling phenomenon... Mercy Thompson is a shapeshifter, and while she was raised by werewolves, she can never be one of them, especially after the pack ran her off for having a forbidden love affair. So she's turned her talent for fixing cars into a business and now runs a one-woman mechanic shop in the Tri-Cities area of Washington State. But Mercy's two worlds are colliding. A half-starved teenage boy arrives at her shop looking for work, only to reveal that he's a newly changed werewolf on the run and desperately trying to control his animal instincts. Mercy asks her neighbor Adam Hauptman, the Alpha of the local werewolf pack, for assistance. But Mercy's act of kindness has unexpected consequences that leave her no choice but to seek help from those she once considered family—the werewolves who abandoned her... In the increasingly crowded field of kick-ass supernatural heroines, Mercy stands out as one of the best. Locus

Moments. Our lives are a collection of moments. Some utterly painful and full of yesterday's hurts. Some beautifully hopeful and full of tomorrow's promises. I've had many moments in my lifetime, moments that changed me, challenged me. Moments that scared me and engulfed me. However, the biggest ones—the most heartbreaking and breathtaking ones—all included him. I was ten years old when I lost my voice. A piece of me was stolen away, and the only person who could truly hear my silence was Brooks Griffin. He was the light during my dark days, the promise of tomorrow, until tragedy found him. Tragedy that eventually drowned him in a sea of memories. This is the story of a boy and girl who loved each other, but didn't love themselves. A story of life and death. Of love and broken promises. Of moments. (Book Three in the Elements Series. Complete Standalone.)

Recently the history of science in early modern Europe has been both invigorated and obscured by divisions between scholars of different schools. One school tends to claim that rigorous textual analysis provides the key to the development of science, whereas others tend to focus on the social and cultural contexts within which disciplines grew. This volume challenges such divisions, suggesting that multiple historical approaches are both legitimate and mutually complementary."--

In upstate Idaho, Ness Hook is run out of his mom's house by his bullying brother Shawn. In Redding, California, Tristan Carter is graduating college, but with no job and no prospects, she'll have to move back in with her parents. Then the world ends. After Ness discovers his best friend dead of disease, Shawn takes their family to the mountains to wait out the plague. As Tristan's parents fall sick, she's left to care for her younger brother Alden. Both sets of siblings dig in for the long haul. Humanity is reduced to splinters. And then the creatures who sent the virus appear in the sky. Flushed from the mountains, Shawn and Ness join a tribe at a nuclear power plant, where they plan to launch a guerrilla war against the invaders. In California, Tristan and Alden are taken prisoner. Separated from her brother, Tristan crosses the ruins of America to track him down. She will stop at nothing to get Alden back--but her fellow survivors prove even more dangerous than the monsters who broke the world. ~ Melt Down is the second book in the post-apocalyptic Breakers series. Druidry and Wicca, also known as "the Craft", are the two great streams of the Western Pagan tradition. Both traditions originated in the British Isles, and both are now experiencing a renaissance all over the world, as more and more people seek a spirituality rooted in a love of nature.

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality.

Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views.

In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

The fifth book in L.J. Smith's beloved bestselling Night World series is now available as a special collector's edition! She stalks the lonely back alleys of Boston, the deserted industrial docks of the harbor, seeking revenge on the vampires who killed her mother. Rashel Jordon knows where they live. But they don't yet know that the black-haired, green-eyed girl is as deadly as she is beautiful, killing the Night People one by one. Armed with a wooden stake, martial arts, and the will to resist a vampire's mind control, she is safe as long as her true identity remains a secret. But when she rescues a girl from certain death, Rashel is suddenly swept into the Night World Slave Trade, the gateway to the vampires' secret enclave. Here the gatekeeper is the dark, dangerous, and irresistible Quinn. Quinn decides who is chosen. He holds the keys to the realm Rashel is desperate to enter. But when she looks into his eyes, she's stunned to see her soulmate—a vampire who she has vowed to destroy.

According to ancient records, the patriarchs and founders of the early civilizations in Egypt, India, China, Peru, Mesopotamia, Britain, and the Americas were colonized by the Serpents of Wisdom—spiritual masters associated with the serpent—who arrived in these lands after abandoning their beloved homelands and crossing great seas. While bearing names denoting snake or dragon (such as Naga, Lung, Djedhi, Amaru, Quetzalcoatl, Adder, etc.), these Serpents of Wisdom oversaw the construction of magnificent civilizations within which they and their descendants served as the priest kings and as the enlightened heads of mystery school traditions. The Return of the Serpents of Wisdom recounts the history of these "Serpents"—where they came from, why they came, the secret wisdom they disseminated, and why they are returning now.

The full sweep of the rich history of Avalon - from the fall of Atlantis to the founding of a new temple on the mist-shrouded isle of Britain - is finally revealed in this magnificent tale.

Marion Zimmer Bradley's Ravens of Avalon follows the journey of Boudica, a Celtic princess, and Lhiannon, a priestess who is Boudica's mentor on the Druids' Isle. When the Romans conquer Britain, Lhiannon fights them while Boudica marries a king who has surrendered. Theirs is a great love story, but when he dies, the Romans brutalize Boudica and her daughters. In rage, Boudica rouses the tribes in a quest to drive the Romans from Britain - and the results will seal both her own and Lhiannon's place in history.
