The Anthropocene has become a field of studies in which the influence of human activity on the Earth System and nature is both the main threat and the potential solution. Social Representations Theory has been evolving since the 1960s. It links knowledge and practice in everyday life and is an effective way to deal with systemic crises based on common sense. This book assembles key contributions by Latin American scholars working with social representations in the social sciences that are of conceptual relevance to the study of the Anthropocene and that investigate the societal consequences of complex interrelations between common sense and topics of global relevance, such as the contradictions of sustainable development, the construction of risks beyond risk-perception, health, negotiation and governance in the field of education, gender equality, the usefulness of longitudinal and systemic ethnography and case studies, and agency and the link between inequality, crises and risk society in the context of COVID-19, presenting theoretical and methodological innovations from Spanish, Portuguese and French research that have rarely been available in English. • This is the first book to address the relevance of Social Representations Theory for the Anthropocene as a societal era • It presents the multidisciplinary scope of Social Representations • This book covers emerging research contributions in Social Representations Theory from Latin America • This book presents innovative research and commentaries by established researchers in the field • This multidisciplinary book should be in the libraries of many disciplines in the social sciences and humanities

BASYS conferences were initially organized to promote the development of balanced automation systems. The first BASYS conference was successfully launched in Victoria, Brazil, in 1995. BASYS'06 is the 7th edition in this series. This book comprises three invited keynote papers and forty-nine regular papers accepted for presentation at the conference. All together, these papers will make significant contributions to the literature of Intelligent Technology for Balanced Manufacturing Systems.

This book gathers the proceedings of the 6th International Conference and Exhibition on Sustainable Energy and Advanced Materials (ICE-SEAM 2019), held on 16–17 October 2019 in Surakarta, Indonesia. With the Beauty Killer Gretchen Lowell locked away behind bars once again, Archie Sheridan—a Portland police detective and nearly one of her victims—can finally rest a little easier. Meanwhile, the rest of the city of Portland is in crisis. Heavy rains have flooded the Willamette River, and several people have drowned in the quickly rising waters. Or at least that's what they thought until the medical examiner discovers that the latest victim didn't drown: She was poisoned before she went into the water. Soon after, three of those drownings are also proven to be murders. Portland has a new serial killer on its hands, and Archie and his task force have a new case. Reporter Susan Ward is chasing this story of a new serial killer with gusto, but she's also got another lead to follow for an entirely separate mystery: The flooding has unearthed a skeleton, a man who might have died more than sixty years ago, the last time Portland flooded this badly, when the water washed away an entire neighborhood and killed at least fifteen people. With Archie following the bizarre trail of evidence and evil deeds to catch a killer and possibly regain his life, and Susan Ward close behind, Chelsea Cain—one of today's most talented suspense writers—launches the next installment of her bestselling series with an electric thriller.

This book constitutes the refereed proceedings of the 4th International Symposium on Languages, Applications and Technologies, SLATE 2015, held in Madrid, Spain, in June 2015. The 17 revised full papers presented were carefully reviewed and selected from 57 submissions. The papers are organized in topical sections on human-human languages; human-computer languages; computer-computer

languages.

This book describes challenges in the policy and practices of the various water sectors in the Philippines that have led to water conflicts. Such conflicts arise in the nature of rural-urban competition, trans-administrative boundary issues, and inconsistencies between customary and state rules, and even within state rules. Using inter-, multi- and trans-disciplinary approaches, and analysing from various scales - community, local and national governments - the book discusses policies and strategies needed towards achieving water security especially for the poor. Reflective of the complex and urgent water policy and governance issues in many developing countries, the book offers valuable lessons and insights to policy makers, water sector managers, planners and regulators as well as to academics, researchers and students.

Traditional knot and interlace patterns, combined to form uniquely striking contemporary designs. Ever since her ground-breaking book Viking Patterns for Knitting was published, Elsebeth Lavold has been recognized as one of the world's leading experts on cabling. It was within the pages of her international bestseller—described as “an indispensable milestone in 20th century knitting literature”—that Lavold first introduced the world to her own innovation: using lifted increases to create interlace patterns, and bringing new life to the ornamental heritage of the Vikings as adornment on modern knitwear. In the years since, Lavold has sought new ideas and “design cousins” to Viking patterns to explore with her needles, and has undertaken a fascinating journey through archives, museums, libraries, and the internet. In more than a decade of continued research, she has studied cultures from all over the globe in search of similar types of ornamental expression, creating the foundation for this exciting new book: a glorious collection rich in imagery, history, patterns, and designs. Dozens of different sources of inspiration, catalogued and placed within their cultural and historical context, from all around the world. Complete, step-by-step instructions for an abundance of fresh and stunningly beautiful knit designs, presented in the book with full-color photographs. Lavold's own painstaking analysis of a huge number of interlace motif types, displayed in both swatch and chart form, to allow you to compose your own patterns based on her research. Learn how to knit fast using heavier-weight yarns to make comfy clothes and accessories for baby boys and girls. • 21 projects for blankets, socks, hats, tops, bottoms, and accessories • Original designs for newborns to 1-year-olds, with advice on colors • Simple stitch designs embellished with cute details, such as stripes, cables, and lace • Knitting basics with easy step-by-step instructions on styles and techniques • Information on supplies needed, yarn recommendations, and design options

Nothing makes Portland detective Archie Sheridan happier than knowing that Gretchen Lowell—the serial killer whose stunning beauty is belied by the

*gruesome murders she's committed—is locked away in a psych ward. Archie can finally heal from the near-fatal physical and emotional wounds she's inflicted on him and start moving on with his life. To this end, Archie throws himself into the latest case to come across his desk: A cyclist has discovered a corpse in Mount Tabor Park on the eastern side of Portland. The man was gagged, skinned, and found hanging by his wrists from a tree. It's the work of a killer bold and clever enough to torture his victim for hours on a sunny summer morning in a big public park and yet leave no trace. And then Archie gets a message he can't ignore—Gretchen claims to have inside knowledge about this grisly murder. Archie finally agrees to visit Gretchen, because he can't risk losing his only lead in the case. At least, that's what he tells himself . . . but the ties between Archie and Gretchen have always been stronger, deeper, and more complex than he's willing to admit, even to himself. What game is she playing this time? And even more frightening, what long-hidden secrets from Gretchen's past have been dredged up that someone would kill to protect? At once terrifying and magnetic, "Beauty Killer" Gretchen Lowell returns with a vengeance in *Kill You Twice*, Chelsea Cain's latest razor-sharp psychological thriller.*

*This book presents original happiness research from and about a region that shows unexpectedly high levels of happiness. Even when Latin American countries cannot be classified as high-income countries their population do enjoy, on average, high happiness levels. The book draws attention to some important factors that contribute to the happiness of people, such as: relational values, human relations, solidarity networks, the role of the family, and the availability and gratifying using of leisure time. In a world where happiness is acquiring greater relevance as a final social and personal aim both the academic community and the social-actors and policy-makers community would benefit from *Happiness Research in Latin America*.*

Solid Waste Management (SWM) is a matter of great concern in the urban areas of developing countries. The municipal authorities who are responsible for managing municipal solid waste are unable to discharge their obligations effectively because they lack the in-house capacity to handle the complexities of the process. It is heartening to see that the World Bank has prepared this book covering all important aspects of municipal SWM in great depth. The book covers very lucidly the present scenario of SWM in urban areas, the system deficiencies that exist, and the steps that need to be taken to correct SWM practices in compliance with Municipal Solid Waste (Management and Handling) Rules 2000 ratified by the Government of India.

The book shares examples of best practices adopted in various parts of the country and abroad, and very appropriately covers the institutional, financial, social, and legal aspects of solid waste management, which are essential for sustainability of the system. It provides a good insight on how to involve the community, nongovernmental organizations, and the private sector to help improve the efficiency and cost effectiveness of the service, and shows how contracting mechanisms can be used to involve the private sector in SWM services. This book will be a very useful tool for city managers and various stakeholders who deal with municipal solid waste management in the design and execution of appropriate and cost-effective systems.

In the essays and lectures here titled *Neganthropocene*, Stiegler opens an entirely new front moving beyond the dead-end "banality" of the Anthropocene. Stiegler stakes out a battleplan to proceed beyond, indeed shrugging off, the fulfillment of nihilism that the era of climate chaos ushers in. Get creative with your stash with this indispensable book! If you've got a mountain of yarn waiting to be transformed into something wonderful, you'll love these scores of tips for turning lonely skeins into spectacular handknit designs. Dozens of patterns include tees, pullovers, and cardigans, plus ponchos, a purse, and even a teddy bear. Discover how to match your yarns with the right designs, and pick up tricks for stretching your stash to complete projects. Adapt these basic patterns to almost any yarn; color-splashed photos show how several designs can be knit in a variety of fibers.

As an initial attempt to understand innovation in fashion, this volume focuses on product innovations, realizing that this industry is truly an innovative sector in which diverse technologies, science, art, and tradition have been merged, synthesized, and utilized to solve the needs and concerns of the end-users. In doing so, this book categorizes product innovation into three levels—materials, style and product development—and aims to present the broader scope of innovation in the global fashion industry with the hope that other sectors can learn from these developments and be inspired.

After reviewing, from a grammaticalization perspective, the main stages in the evolution of Italian object clitic pronouns, the book discusses the distinctive morphosyntactic, semantic, and pragmatic features of Italian clitics. In particular, the book offers an original study of the most common examples of so-called *verbi procomplementari*, verbs which are characterized by the incorporation of clitics that no longer function as pronouns, and which are widely used in present-day Italian. Their emergence involves both grammaticalization of the clitic pronoun into an obligatory element, and lexicalization of the verb+clitic sequence. This study is essentially descriptive and maximally data-driven. The discussion of grammaticalization and lexicalization is reduced to the essentials and aims primarily at defining how these terms, which have received different and at times divergent interpretations, are employed in the book. The book is accessible to a wide and varied readership, which includes Italian and Romance linguists of functional and formal orientation, Italian language scholars, grammaticalization scholars interested in new case studies, as well as students of language change and variation.

Suspicion and fear surround the mysterious disappearance of a movie star's daughter. The race to claim the reward for finding Anna Louise Caley - dead or alive - spirals into a deadly voodoo trail in the French quarter of New Orleans. In her desperation to succeed in this, her first case as a private detective, ex-Lieutenant Lorraine Page is caught in a web of deceit and violence that threatens to drag her back into the murky world she has fought so hard to escape. Continuing the investigation means risking everything. But the million-dollar bonus is one hell of an incentive not to back off from a case that could kill her - or give her the future and the professional respect she craves. ****Lynda La Plante's Widows is now a major motion picture****

Vintage crochet lace techniques, on-trend garments and accessories! Lace is one of the hottest trends in crochet, but it is by no means a new technique. Each design also features a "Technique Tidbit" that will give you valuable insight into working the pattern. Robyn Chachula's vintage-inspired creations are all you need for a trendy one-of-a-kind wardrobe!

Written by a pioneer of modern fashion knitwear, *Classic Knits of the 1980s* describes the principal fundamentals of knitwear design and features original, colourful, textural and fun knitting patterns that capture the fashion zeitgeist of the 1980s designer knitwear boom. As well as selling ready-made knitwear to stores, several designers made their patterns available as home knitting kits. *Classic Knits of the 1980s* features a range of innovative designs from Sandy Black knitting kits, many published here for the first time. The patterns are suitable for a broad range of knitting skills, from those with good basic knowledge of knitting to the more experienced knitter. Made up of two parts: Part 1 establishes the fashion and knitwear context of the period and its influence on the development of the designs, examining the entire creative process from inspiration to final pattern. Lavishly illustrated with photographs, diagrams and charts, special features

include patchwork (modular) designs and intarsia or colour-block knitting, with techniques and tips for pattern calculations, working from charts and handling several colours. Part 2 then offers twenty-one original patterns and designs, grouped into themes of textural, graphic, heraldic and ornamental, plus the unique Siamese cat, leopard and tiger accessories. Contemporary photography, together with original images from the 1980s, illustrates the designs' timeless appeal, with close-up images of intricate pattern details and suggested design variations to aid creative knitters inspired by this pivotal decade.

An international study of natural dyeing aimed at teaching beautiful techniques Similar to cooking and the act of sharing meals, our relationship

to textiles is a core tenet of our human experience. Creating textiles cultivates connection, belonging, community, and friendships among people. In the world of textiles, natural dyeing is the closest we come to the act of cooking. Journeys in Natural Dyeing shares the story of Kristine Vejar and Adrienne Rodriguez's travels to four countries—Iceland, Mexico, Japan, and Indonesia—where they visited natural dyers who use locally-sourced dyes to create textiles that evoke beauty, a connection to their environment, and showcase their mastery of skill. This book shares their process of using their own locally-grown dyes and includes recipes and projects to create more than 400 shades of color. In addition, you will learn how to use your own natural environment to create deep, beautiful colors. No matter where you live, creating color naturally is possible.

Classical Rhetoric in the Middle Ages: The Medieval Rhetors and Their Art 400-1300, with manuscript survey to 1500 CE is a completely updated version of John Ward's much-used doctoral thesis of 1972, and is the definitive treatment of this fundamental aspect of medieval and rhetorical culture.

The Years of Alienation in Italy offers an interdisciplinary overview of the socio-political, psychological, philosophical, and cultural meanings that the notion of alienation took on in Italy between the 1960s and the 1970s. It addresses alienation as a social condition of estrangement caused by the capitalist system, a pathological state of the mind and an ontological condition of subjectivity. Contributors to the edited volume explore the pervasive influence this multifarious concept had on literature,

cinema, architecture, and photography in Italy. The collection also theoretically reassesses the notion of alienation from a novel perspective, employing Italy as a paradigmatic case study in its pioneering role in the revolution of mental health care and factory work during these two decades.
