The book has three sections but all are significant to nurture and nature in life. It is a journey of love, pain and acceptance in society and in all relationships. There are hints of feminism, racism and body positivity discussions. The entire book is an expression of life and the beauty of it. To embrace of differences and our pain so that we can grow and evolve. There are essences of pain throughout because we all suffer. It is to show that are a species we can all relate to one another in some ways. If that is through low self-esteem or trauma. The experiences are apart of us and it is the way that we overcome them and help one another. Communities and individuals bring others down and spread hatred but my poetry is to spread love and open the minds.

Looks at online communities in the United States, Japan, England, and France, describes the types of interaction possible through computer networks, and looks at the threats posed by commercialization and government monitoring

The more powerful the family...the darker the secrets. Meet the family everyone's talking about in this prequel novella to the Sicily's Corretti Dynasty series, brought to you by Harlequin Presents. Investigative journalist Emily Hyslop is furious when her editor—and ex—reassigns her from a career-making expos to a frivolous wedding in Sicily. But scandalous secrets lie behind the union of the rival Corretti and Battaglia families. Things start looking up when Emily meets the most intimidating, not to mention sexiest, man she's ever encountered.... Detective Anton Soranno has valuable insight into the Correttis and their scandalous dealings...and plenty of reason to hate them. He's the perfect source of information—and the more he helps Emily with her story, the more time they have to explore their intense desire. But even as their passionate nights uncover surprising feelings in both of them, Emily and Anton know that she must leave Sicily once the wedding is over.... Look for more books in the Sicily's Corretti Dynasty series from Harlequin Presents, beginning with A Legacy of Secrets by Carol Marinelli.

Boccaccio's masterpiece is here issued unabridged. It is a complete world in itself, one in which we can walk about even as the characters themselves. It is not, in fact, necessary to read very much of this exquisite prose before we become as much part of the amorous and lyrical fourteenth century as the ladies and gentlemen themselves, who wile away their time with stories on the slope at Fiesole. Boccaccio's extensive knowledge of human nature enabled him to seal with his characters not too seriously, but with that ironic detachment and air of humorous omniscience that is the privilege of the greatest writers and the delight of their readers. Hock the platinum. Take down the vacation photos. Cancel the joint checking account. There's no question. . . . Divorce Sucks. And perhaps no one knows that better than author Mary Jo Eustace, whose ex-husband Dean McDermott married Tori Spelling a mere thirty days after their divorce was finalized. One part tell-all and one part guide to get readers on their feet after a bitter breakup, this hilarious addition to the bestselling Sucks series tells everything readers don't want to know about divorce - from what a phone call with a lawyer will cost, to how to handle your newer, younger replacement, to what Hollywood divorcees are actually thinking when they watch their ex walk the red carpet with a millionairess. Sometimes horrifying, sometimes gratifying, and never merciful, this book will give readers an inside look at one of today's most public divorces while reminding them - hey, it could always be worse.

Developers who want to access USB devices from their embedded systems will find a helpful resource in USB Embedded Hosts: The Developer's Guide. This new book from the author of USB Complete shows how small systems can take advantage of the same wealth of USB devices available to conventional PCs. The book begins with a review of USB host communication protocols. Readers then learn which USB host requirements are relaxed for embedded systems and what new requirements some embedded systems must meet. To help in selecting a development platform, the book explores available hardware and software for USB host communications in small systems. The heart of the book focuses on communicating with USB devices. The topics (with example code) include USB drives, keyboards, virtual serial ports, network bridges, mics, speakers, video cameras, and printers, plus devices that don't fit defined USB classes. Also discussed are systems that support both USB host and device functions. The example code is written for the BeagleBoard-xM open development board using a distribution of Linux targeted to small systems. Also covered is how to use Linux commands and utilities to learn about, monitor, and debug communications with USB devices.

Sir William Temple, diplomat, statesman, and writer, retired to his garden in the 1680s and wrote what has become one of the key texts, not only of gardening, but also of the English aesthetic. It was he who introduced the idea of the charm of irregularity, and who gave it the allegedly Chinese name sharawadgi. The English style of landscape gardening can be traced in a direct line to this essay, which has not been in print for over 95 years.

This book analyzes environmental protection and resource use in a comprehensive framework where not only economic but also natural scientific aspects are taken into consideration. The special features of the book are (i) that the authors utilize a natural scientific variable, entropy, to characterize the economic system and the environment, (ii) that environmental protection and resource use are analyzed in combination, and (iii) that a replacement of techniques over time is analyzed. The authors investigate the use of the environment both as a supplier of resources and as a recipient of pollutants with the help of thermodynamic relationships. The book therefore provides a new set of tools for environmentalists and economists.

The book presents high quality research work in cutting edge technologies and most-happening areas of computational intelligence and data engineering. It contains selected papers presented at International Conference on Computational Intelligence and Data Engineering (ICCIDE 2017). The conference was conceived as a forum for presenting and exchanging ideas and results of the researchers from academia and industry onto a common platform and help them develop a comprehensive understanding of the challenges of technological advancements from different viewpoints. This book will help in fostering a healthy and vibrant relationship between academia and industry. The topics of the conference include, but are not limited to collective intelligence, intelligent transportation systems, fuzzy systems, Bayesian network, ant colony optimization, data privacy and security, data mining, data warehousing, big data analytics, cloud computing, natural language processing, swarm intelligence, and speech processing.

This collection uses the concept of 'story' to connect literary materials and methods of analysis to wider issues of social and political importance. Drawing on a range of texts, themes include post-colonial literatures, history in literature, old stories in contemporary contexts, and the relationship between creativity and criticism.

Reader: beware. Warlocks with dark spells, hunters with deadly aim, and bakers with ovens retrofitted for cooking children lurk within these pages. But if you dare, turn the page and learn the true story of Hansel and Gretel - the story behind (and beyond) the bread crumbs, edible houses and outwitted witches. Come on in. It may be frightening, it's certainly bloody, and it's definitely not for the faint of heart. This volume addresses the relationship between irony and popular culture and the role of the consumer in determining and disseminating meaning. Arguing that in a cultural climate largely characterised by fractious communications and perilous linguistic exchanges, the very role of irony in popular culture needs to come under greater scrutiny, it focuses on the many uses, abuses, and misunderstandings of irony in contemporary popular culture, and explores the troubling political populism at the heart of many supposedly satirical and (apparently) non-satirical texts. In an environment in which irony is frequently claimed as a defence for material and behaviour judged controversial, how do we, as a society entrenched in forms of popular culture and media, interpret work that is intended as satire but which reads as unironic? How do we accurately decode works of popular film, literature, television, music, and other cultural forms which self themselves as bitingly ironic commentaries on current society, but which are also problematic celebrations of the very issues they purport to critique? And what happens when texts intended and received in one manner are themselves ironically recontextualised in another? Bringing together studies across a range of cultural texts including popular music, film and television, Isn't it Ironic?' will appeal to scholars of the social sciences and humanities with interests in cultural studies, media studies, popular culture, literary studies and sociology.

Analyzing Media Messages provides a comprehensive and comprehensible guide to conducting content analysis research. It establishes a formal definition of quantitative content analysis; gives step-by-step instruction on designing a content analysis study; and explores in depth research questions that recur in content analysis, in such areas as measurement, sampling, reliability, data analysis, validity, and technology. This Second Edition maintains the concise, accessible approach of the first edition while offering an updated discussion and new examples. The goal of this resource is to make content analysis understandable, and to produce a useful guide for novice and experienced researchers alike. Accompanied by detailed, practical examples of current and classic applications, this volume is appropriate for use as a primary text for content analysis coursework, or as a supplemental text in research methods courses. It is also an indispensable reference for researchers in mass communication fields, political science, and other social and behavioral sciences.

Reauthorization of the Satellite Television Extension and Localism Act

"In an online, interconnected world, democracy is increasingly made up of wikis and blogs, pokes and tweets. Citizens have become accidental journalists thanks to their handheld devices, politicians are increasingly working online, and the traditional sites of democracy—assemblies, public galleries, and plazas—are becoming less and less relevant with every new technology. And yet, Democracy and Public Space argues, such views are leading us to confuse the medium with the message, focusing on electronic transmission when often what cyber citizens transmit is pictures and narratives of real democratic action in physical space. Democratic citizens are embodied, take up space, battle over access to physical resources, and perform democracy on physical stages at least as much as they engage with ideas in virtual space. Combining conceptual analysis with interviews and observation in capital cities on every continent, John Parkinson argues that democracy requires physical public space, that some kinds of space are better for performing some democratic roles than others, and that some of the most valuable kinds of space are under attack in developed democracies. He argues that accidental publics like shoppers and lunchtime crowds are increasingly valued over purposive, active publics, over citizens with a point to make or an argument to listen to. This can be seen not just in the way that traditional protest is regulated, but in the ways that ordinary city streets and parks are managed, even in the design of such quintessentially democratic spaces as legislative assemblies. Democracy and Public Space offers an alternative vision for democratic public space, and evaluates 11 cities—from London to Tokyo—against that ideal."—Publisher's website.

"Based on the feature length animated film produced by the National Film Board. The story follows Rosie Ming (Sandra Oh), a young Canadian poet of mixed descent that grew up believing that her father abandoned her. She's been invited to perform her poetry at a festival in Iran, where she finds that what she'd been told as a child may not necessarily be the entire truth."-

The tree, the river, the old textbook-a triptych with shifting borders hangs in a place where dreams and memories intersect. Omission and loss haunt those who live here, suspended as they are in an endless struggle to connect. Contracting and expanding as it progresses, the narrative of their existence ever-circles around a shrouded core.
