Conventional wisdom would have us believe that it is the size of your network that matters: how many people do you know? We're told to mix, mingle, and connect. But social science research suggests otherwise. The quality and structure of our relationships have far greater impact on our personal and professional lives. Our relationships with friends, family, co-workers, neighbours, and collaborators are by far our greatest asset. Yet, most people leave them to chance. In this ground-breaking study, Marissa King, Professor of Organizational Behavior at the Yale, argues that there are strategic ways in which we can alter our relationships for a happier and more fulfilling life. With new understanding, this book

States. Legionella occur naturally in water from many different environmental sources, but grow rapidly in the warm, stagnant conditions that can be found in engineered water systems such as cooling towers, building plumbing, and hot tubs. Humans are primarily exposed to Legionella through inhalation of contaminated aerosols into the respiratory system. Legionnaires' disease can be fatal, with between 3 and 33 percent of Legionella infections leading to death, and studies show the incidence of Legionnaires' disease in the United States increased five-fold from 2000 to 2017.
