over the past three centuries, and it continues to shape the contemporary world. With new methods and organizations for producing goods, industrialization altered where people live, how they play, and even how they define political issues. By exploring the ways the industrial revolution reshaped world history, this book offers a unique look into the international factors that started the industrial revolution and its global spread and impact. In the fourth edition, noted historian Peter N. Stearns continues his global analysis of the industrial revolution with new discussions of industrialization outside of the West, including the study of India,

the Middle East, and China. In addition, an expanded conclusion contains an examination of the changing contexts of industrialization. The Industrial Revolution in World History is essential for students of world history and economics, as well as for those seeking to know more about the global implications of what is arguably the defining socioeconomic event of modern times.

The fall of empires and the rise of nation-states was a defining political transition in the making of the modern world. As United States imperialism becomes a popular focus of debate, we must understand how empire, the nineteenth century's dominant form of large-scale political organization, had disappeared by the end of the twentieth century. Here, ten prominent specialists discuss the empire-to-nation transition in comparative perspective. Chapters on Latin America, the Middle East,

Eastern Europe, Russia, and China illustrate both the common features and the diversity of the transition. Questioning the sharpness of the break implied by the empire/nation binary, the contributors explore the many ways in which empires were often nation-like and nations behaved imperially. While previous studies have focused on the rise and fall of empires or on nationalism and the process of nation-building, this intriguing volume concentrates on the empire-to-nation transition itself. Understanding this transition allows us to better interpret the contemporary political order and

The World in the Twentieth Century is a brief, accessible text written for students who may have little background in history. It focuses on encouraging students to make connections by delivering four important themes: the effects of technology on world history, changing global identities, shifting borders and globalization. These themes and the book's structure develop a deeper understanding of a fast-paced century by placing strong emphasis on student engagement.

West is the story of the coming of the modern world, this history accords importance to the 'underdeveloped world'.

Eurocentrism influences virtually all established historical writing. With the rise of Prussia and, by extension, Europe, eurocentrism became the dominant paradigm for world history. Employing the approaches of Gramsci and Foucault, Peter Gran proposes a reconceptualization of world history. He challenges the traditional convention of relying on totalitarian or democratic functions of a particular state to explain and understand relationships of authority and resistance in a number of national contexts. Gran maintains that there is no single developmental model but diverse

forms of hegemony that emerged out of the political crisis following the penetration of capitalism into each nation. In making comparisons between seemingly disparate and distinctive nations and by questioning established canons of comparative inquiry, Gran encourages people to recognize the similarities between the West and non-West nations. This book examines the historical interactions of the West and non-Western world, and investigates whether or not the exclusive adoption of Western-oriented 'international norms' is the prerequisite for the construction of international order. This book sets out to challenge the Eurocentric foundations of modern International Relations scholarship by examining

# File Type PDF World History The Modern World Standard Assessment

international relations in the early modern era, when European primacy had yet to develop in many parts of the globe. Through a series of regional case studies on East Asia, the Middle East, Africa and Latin America, and Russia written by leading specialists of their field, this book explores patterns of cross-cultural exchange and civilizational encounters, placing particular emphasis upon historical contexts. The chapters of this book document and analyse a series of regional international orders that were primarily defined by local interests, agendas and institutions, with European interlopers often playing a secondary role. These perspectives emphasize the central role of non-European agency in shaping global history, and stand in

stark contrast to conventional narratives revolving around the 'Rise of the West', which tend to be based upon a stylized contrast between a dynamic 'West' and a passive and static 'East'. Focusing on a crucial period of global history that has been neglected in the field of International Relations, International Orders in the Early Modern World will be interest to students and scholars of international relations, international relations theory, international history, early modern history and sociology.

Remaking the Modern World 1900 - 2015

Beyond Eurocentrism

For most of human history, states and regions were connected by long-distance commerce and war, yet they developed essentially separately. The century after 1750 marked a major shift. An Emerging Modern World, fourth in the six-volume series *A History of the World*, charts this transformative period outside the West.

The World Cup as World History uses football's premier event to analyze modern sports and world history.

William D. Bowman traces the history of a tournament that has become a global phenomenon that generates intense political, economic, and cultural interest and profound discussions about racial, ethnic, and

gender identity in the contemporary era. By focusing on the World Cup, the book keeps a tight thematic focus that allows for an integrated discussion of the core issues of globalization, money and finance, sport as spectacle, race and gender, and contemporary politics.

Cross-Cultural Encounters in Modern World History explores cultural contact as an agent of change. It takes an encounters approach to world history since 1500, rather than a political one, to reveal different perspectives and experiences as well as key patterns and transformations. It studies the spaces between cultures historically to help us transcend human differences today in a rapidly globalizing world. The text focuses on first encounters that suggest long-term developments and particularly significant encounters

that have changed the direction of world history. Because of the complexities of these encounters, the author takes a user-friendly approach to keep the text accessible to students with varying backgrounds in history. This product represents a complete resource package for the new GCSE specifications. Accompanying the student book, this resource pack has been specifically developed to match the AQA Modern World GCSE specification. The pack features practical advice and ready-to-use copymasters that aim to provide detailed assessment guidance; differentiated support for all ability levels; a breakdown of different types of questions in the written examination papers at two levels; and coverage of content options within each question type.
