Praise for How Learning Works "How Learning Works is the perfect title for this excellent book. Drawing upon new research in psychology, education, and cognitive science, the authors have demystified a complex topic into clear explanations of seven powerful learning principles. Full of great ideas and practical suggestions, all based on solid research evidence, this book is essential reading for instructors at all levels who wish to improve their students' learning." "Barbara Gross Davis, assistant vice chancellor for educational development, University of California, Berkeley, and author, Tools for Teaching "This book is a must-read for every instructor, new or experienced. Although I have been teaching for almost thirty years, as I read this book I found myself resonating with many of its ideas, and I discovered new ways of thinking about teaching." "Eugenia T. Paulus, professor of chemistry, North Hennepin Community College, and 2008 U.S. Community Colleges Professor of the Year from The Carnegie Foundation for the Advancement of Teaching and the Council for Advancement and Support of Education "Thank you Carnegie Mellon for making accessible what has previously been inaccessible to those of us who are not learning scientists. Your focus on the essence of learning combined with concrete examples of the daily challenges of teaching and clear tactical strategies for faculty to consider is a welcome work. I will recommend this book to all my colleagues." "Catherine M. Casserly, senior partner, The Carnegie Foundation for the Advancement of Teaching "As you read about each of the seven basic learning principles in this book, you will find advice that is grounded in learning theory, based on research evidence, relevant to college teaching, and easy to understand. The authors have extensive knowledge and experience in applying the science of learning to college teaching, and they graciously share it with you in this organized and readable book." "From the Foreword by Richard E. Mayer, professor of psychology, University of California, Santa Barbara; coauthor, e-Learning and the Science of Instruction; and author, Multimedia Learning

Reading as a student demands new skills and new disciplines. Students must read. They must read to inform themselves about the subjects they are studying and to allow them to write assignments, reports and dissertations. Though most students can read fairly well, few can make as much or as efficient use as possible of the time they devote to reading for academic purposes. Many guides to study offer a pot pourri of techniques for improving reading skills. None gives as full a treatment of this essential and underpinning area of academic life as Reading at University. The authors believe that students must change both the ways in which they read and the ways in which they think about reading. This book offers effective and efficient strategies for fulfilling students' reading and study potential.

It explains how to provide comprehensive literacy instruction addressing these students' needs, whether they are emergent readers and writers or students acquiring conventional literacy skills. Literacy Education for all students -- from the authors teachers trust! Integrates phonics and literature-based reading and process writing instruction for a balanced approach to teaching literacy. Contains innovative ideas for supporting the most at risk students. Emphasizes the integration of literacy with science and social studies instruction. Discusses strategies and techniques for fostering children's use of decoding and comprehension strategies, and includes workable, practical strategies and activities to use in the classroom. Includes a variety of whole-class and small group plans which teachers use to provide support for struggling readers and challenges for advanced readers. Found in a new Chapter on Multi-level instruction (ch. 5). Celebrated authors Patricia Cunningham and Dick Allington bring the issue of literacy education to the fore as they discuss an integrative approach to literacy-based on the simple but true idea that the more children read and write, the better they will read and write. Patricia M. Cunningham is a professor of Education at Wake Forest University. She has authored and co-authored several books promoting literacy, including Phonics They Use: Words For Reading And Writing, Reading And Writing In Elementary Classrooms: Strategies And Observations, Schools That Work: Where All Children Read and Write, and Classrooms That Work: They Can All Read And Write. Richard L. Allingtonis the Fien Distinguished Professor of Education at the University of Florida, Gainesville. He was a co-recipient of the Albert J. Harris Award from the International Reading Association for his"contributions to the better understanding of reading and learning disabilities." Dick is also a past president of the National Reading Conference and has been elected to membership in the Reading Hall of Fame.

Ask successful writers and they'll tell you, the key to writing well is revision. Ask elementary school teachers and they'll tell you, the real challenge of writing instruction is teaching kids how to revise. Ruth Culham is both a successful writer and a writing teacher, and she's discovered how to teach writing and revision in a way that's accessible to both teacher and students: First read the writing, assess it using the traits of writing, then teach the writers and guide revision decisions using traits as a common language and map. This book shows you how to assess and teach writing in a way that's practical and doable--and best of all, see results. Part 1 walks you through the traits of writing and their key qualities, showing step by step how to read students' writing and offer feedback that nudges them forward through the revision process. Chapters will help you address challenges students face within each mode of writing (narrative, expository, persuasive), and provide tools young writers can use to evaluate their own writing and make revision decisions accordingly. Part 2 dives into instruction, offering specific guidance for how to use what you've learned from reading student writing to design lessons that scaffold students toward making their own craft decisions and revisions. In addition, there's an entire chapter devoted to mentor texts that you can use to model traits and key qualities for your students.

Writing Skills and Strategies for Students of English

Primary Writing:

Yes—we can have our cake and eat it too! We can improve students' reading and writing performance without sacrificing authenticity. In Read, Talk, Write, Laura Robb shows us how. First, she makes sure students know the basics of six types of talk. Next, she shares 35 lessons that support rich conversation. Finally, she includes new pieces by Seymour Simon, Kathleen Krull, and others so you have texts to use right away. Read, Talk, Write: it' s a process your students not only can do, but one they will love to do.

When writers read, they evaluate all the time. They can't help it. But they can become better at it, and that's what this second edition of When Writers Read is about: what students can do to become better evaluators of themselves as writers and readers, and how you can help. Extensively revised, the second edition is organized around five concepts that are central to an effective writing-reading program. Voices: When writers read, they listen for a strong author voice; they know they can hear their own when they write and assume other authors' voices come through as well. It's essential that all voices, both those of students and professional writers, be honored and supported by an evaluation system dedicated to this notion. Decisions: When writers read, they make decisions, so it's only natural that they look for evidence of the decisions other authors make. To become effective writers and readers, students must learn to make decisions about which types of writing to create, what to write and read about, where to work, when to do so, whom to share their work with, and what to do to become better writers and readers. Time: When writers read, they read and read and read. One of your primary responsibilities as their teacher is to provide plenty of opportunities for them to do so and create an overall framework in which students spend their time wisely. Response: When writers read, they look for a message. Students need to understand that to respond effectively to other writers, they should listen closely and think appreciatively and critically about the author. Self-discipline: When writers read, it's their self-discipline that keeps them engaged. By providing plenty of good books, writing possibilities, and self-evaluation opportunities, you can help ensure your students are self-disciplined and eager.

In this book you will find the McLaughlin Model of teaching emergent literacy to young children set down in a clear format that makes it easy for you to glean the information you need to establish the program in your classroom. As it spreads through pilot programs in Palm Beach County School District, Florida, this model of teaching is proving to be highly successful for children from many different backgrounds and to produce outstanding results in "Title 1" kindergarten classes. Chapter by chapter, you will discover how to lead your students into reading books and flowing with writing. You will find how to do this by teaching skills through meaningful reading and writing and by training your students in the habits they need to be successful. You will be guided into quickly evaluating your students and dividing them into small groups where they can learn at their own level and pace, moving on and up when they are ready. You will learn how to build your students' self-esteem and self-confidence and how to train them to work cooperatively as part of a positive, risk-free classroom community where everyone is a teacher and learner. You will also learn how to keep the excitement and momentum flowing in your classroom all through the year. As you use this model with your students, you will find that your expectations rise. Your enjoyment of teaching will increase as you get caught up in your students' energy for learning and their excitement at what they achieve. Like the teachers in the McLaughlin Model Pilot Programs, you will most likely be amazed at the results.

"Read Write Speak Better English" uses the new phonetic alphabet (Fonixk) to teach reading with phonics. Students learn to read and speak English quickly with this new multi sensory/programed learning process. Reading out loud is also part of the process. The study techniques include visualization, syllabication, pronunciation, syllable stress, silent association, formatted vowel symbols, and spelling drills. This course does three things: It helps those who speak English improve their speech, comprehension, and reading speed. It is also for ESL students who want to improve their English on their own. With programmed learning, students learn to read on their own simply by studying and reading the book.

For intermediate-level courses in Integrated Reading and Writing. A meaningful, content-driven approach to integrated reading and writing proficiency Read Think Write: True Integration Through Academic Content helps students develop the skills they need to succeed in all subsequent discipline-specific courses. The authors start with an introduction to the reading, thinking, and writing processes and a detailed discussion of how students can get the most out of the text. Subsequent chapters are organized thematically, each covering an academic content area. This builds students' academic vocabulary and enables them to develop and pursue academic interests. Each discipline chapter ends with an essay assignment that asks students to integrate skills they've learned in the chapter and ideas from the other chapter readings. Students apply these skills by reading actively, thinking about and evaluating text, identifying the topics, main ideas, and details, making inferences, and recognizing key patterns of organization and translating these reading skills into their writing equivalents to write thoughtful, effective essays. It's been a decade since Lynne Dorfman and Rose Cappelli wrote the first edition of Mentor Texts and helped teachers across the country make the most of high-quality children's literature in their writing instruction. In the second edition of this important book Lynne and Rose show teachers how to help students become confident, accomplished writers by using literature as their foundation. The second edition includes brand-new "Your Turn Lessons," built around the gradual release of responsibility model, offering suggestions for demonstrations and shared or guided writing. Reflection is emphasized as a necessary component to understanding why mentor authors chose certain strategies, literary devices, sentence structures, and words. Lynne and Rose offer new children's book titles in each chapter and in a carefully curated and annotated Treasure Chest. At the end of each chapter a "Think About It--Talk About It--Write About It" section invites reflection and conversation with colleagues. The book is organized around the characteristics of good writing--focus, content, organization, style, and conventions. Rose and Lynne write in a friendly and conversational style, employing numerous anecdotes to help teachers visualize the process, and offer strategies that can be immediately implemented in the classroom. This practical resource demonstrates the power of learning to read like writers.

In this book, Falk-Ross and the contributing authors offer their different perspectives on supporting English language learners through specific strategies for assessment and instruction. It presents specific issues and challenges, supportive research and up-to-date information, classroom implications and strategies, and case study applications.

A series that prepares students for paragraph and composition writing, while making the process enjoyable. Writing from Within, Level 1 focuses on paragraph writing. The book contains twelve units, each one centering around a final writing assignment. As students prepare for their assignment, they brainstorm ideas for writing and analyze sample paragraphs for both language and organization. While most units involve students writing one or two well-organized paragraphs for the final assignment, also included are units that have students prepare less formal types of writing, such as composing an email, writing a thank-you note, writing a simple movie review, and writing an invitation.

Writing Matters is designed to develop students' writing ability and give them the confidence to use this ability in everyday life. Through extensive use of real-life examples it provides useful models for students and teachers to work from and discuss in the classroom. It emphasizes that writing is a process and also that the demands of writing vary depending on the reader, the purpose, the content and the writing situation. Accordingly, the book is divided into two parts. Part 1 deals with basic procedures such as preparing, drafting and revising texts and also offers help in the often difficult areas of spelling and punctuation. Part 2 focuses on writing contexts ranging from the functional (letters of application, postcards, advertisements) to more creative, personal writing. The units in this part give practice in all these different types of writing. This book - guides students progressively towards proficient and effective writing - uses lively, authentic material as models - is relevant to students' real-life needs and interests - can be used flexibly as a course or as supplementary material. Written by experienced teachers specialising in writing skills development, Writing Matters can also be used by adult speakers of English as a first language and secondary school students.

If you are searching for a way to creatively reinforce, enrich and assess your students' learning, your search ends here. This book, designed for the middle years, provides 24 fun, educationally stimulating report formats that your students will truly enjoy writing ... and you'll enjoy reading! Also included is an assessment rubric after each report, so that students can evaluate their own work and learn how to improve.

This remarkable book shows teachers how to inspire students to learn to write and write to learn. Committed to the premise that all students can learn to write with appropriate teaching, modelling, and practice, it argues that reading and writing go hand in hand. Through reading, writing and the inevitable discussions that follow, students learn from the experiences of others, open their minds to many possibilities, gain a glimpse into new worlds, make connections to their lives, and reflect on their own choices and learning. This practical book shows you how to use freewriting and powerful mentor texts to create classrooms where students enjoy putting pencil to paper and taking the necessary risks to grow and flourish as writers.
