*In one way or another, we all carry trauma. It can manifest as anxiety, shame, low self-esteem, over-eating, under-eating, addiction, depression, confusion, people-pleasing, under-earning, low mood, negative thinking, social anxiety, anger, brain fog and more. Traumas, big or 'little', leave us trapped in cycles of dysfunctional behaviours, negative thoughts and difficult feelings. Yet many people are unaware they're stuck in old reactions and patterns that stem from their past traumas. Many of us are wary of the word and push it away instead of moving towards it and learning how to break free. Dr Sarah Woodhouse is a Research Psychologist who specialises in trauma and is passionate about helping people face this word and their past. In *You're Not Broken* she teaches you what a trauma is (it's probably not what you think), and how to recognise when, why and how your past is holding you back. She gently explains the pitfalls of ignoring awkward, upsetting episodes and how true freedom comes from looking back at your past with honesty. Then, sharing the latest research-based techniques and her own personal experience, she guides you towards breaking the trauma loop, reawakening your true self and reclaiming your future.*

*One of the Best 5 Books of 2014 — Esquire "I've been waiting for this book for a long time. Well, not this book, because I never imagined that the book I was waiting for would be so devastatingly smart and funny, so consistently entertaining and unflinchingly on target. In fact, I would like to have written it myself – if, that is, I had lived Linda Tirado's life and extracted all the hard lessons she has learned. I am the author of *Nickel and Dimed*, which tells the story of my own brief attempt, as a semi-undercover journalist, to survive on low-wage retail and service jobs. Tirado is the real thing." —from the foreword by Barbara Ehrenreich, New York Times bestselling author of *Nickel and Dimed* We in America have certain ideas of what it means to be poor. Linda Tirado, in her signature brutally honest yet personable voice, takes all of these preconceived notions and smashes them to bits. She articulates not only what it is to be working poor in America (yes, you can be poor and live in a house and have a job, even two), but what poverty is truly like—on all levels. Frankly and boldly, Tirado discusses openly how she went from lower-middle class, to sometimes middle class, to poor and everything in between, and in doing so reveals why "poor people don't always behave the way middle-class America thinks they should."*

The instant New York Times bestseller from Shark Tank star and Fubu Founder Daymond John on why starting a business on a limited budget can be an entrepreneur's greatest competitive advantage. Daymond John has been practicing the power of broke ever since he started selling his home-sewn t-shirts on the streets of Queens. With a \$40 budget, Daymond had to strategize out-of-the-box ways to promote his products. Luckily, desperation breeds innovation, and so he hatched an idea for a creative campaign that eventually launched the FUBU brand into a \$6 billion dollar global phenomenon. But it might not have happened if he hadn't started out broke - with nothing but hope and a ferocious drive to succeed by any means possible. Here, the FUBU founder and star of ABC's Shark Tank shows that, far from being a liability, broke can actually be your greatest competitive advantage as an entrepreneur. Why? Because starting a business from broke forces you to think more creatively. It forces you to use your resources more efficiently. It forces you to connect with your customers more authentically, and market your ideas more imaginatively. It forces you to be true to yourself, stay laser focused on your goals, and come up with those innovative solutions required to make a meaningful mark. Drawing his own experiences as an entrepreneur and branding consultant, peeks behind-the-scenes from the set of Shark Tank, and stories of dozens of other entrepreneurs who have hustled their way to wealth, John shows how we can all leverage the power of broke to phenomenal success. You'll meet: · Steve Aoki, the electronic dance music (EDM) deejay who managed to parlay a series of \$100 gigs into becoming a global superstar who has redefined the music industry · Gigi Butler, a cleaning lady from Nashville who built cupcake empire on the back of a family recipe, her maxed out credit cards, and a heaping dose of faith · 11-year old Shark Tank guest Mo Bridges who stitched together a winning clothing line with just his grandma's sewing machine, a stash of loose fabric, and his unique sartorial flair When your back is up against the wall, your bank account is empty, and creativity and passion are the only resources you can afford, success is your only option. Here you'll learn how to tap into that Power of Broke to scrape, hustle, and dream your way to the top.

Do you believe that spending \$15,000 on a media center is vulgar, but that spending \$15,000 on a slate shower stall is a sign that you are at one with the Zenlike rhythms of nature? Do you

work for one of those visionary software companies where people come to work wearing hiking boots and glacier glasses, as if a wall of ice were about to come sliding through the parking lot? If so, you might be a Bobo. In his bestselling work of "comic sociology," David Brooks coins a new word, Bobo, to describe today's upper class -- those who have wed the bourgeois world of capitalist enterprise to the hippie values of the bohemian counterculture. Their hybrid lifestyle is the atmosphere we breathe, and in this witty and serious look at the cultural consequences of the information age, Brooks has defined a new generation.

What does it mean to be 'bad' at money? Money is not a maths problem. Spending, saving, splitting the bill or asking for a pay rise - these are moments dominated by our own hang-ups, habits, anxiety and ambitions. Money features in our friendships, family life, our choice of late-night treat and who we date. And yet it's so often hidden behind shame and silence. We need to start talking about it. Funny, frank, and filled with insights, practical advice and conversations with everyone from company CEOs to debt advisors to housemates, Open Up is the book that will transform your relationship to money. It shows how talking can change your life, relationships and bank balance, and influence bigger issues like pay gaps or the living wage. This book strips away the awkwardness to help you gain knowledge, take control of your finances and finally get 'good' with money.

"This book is a message from autistic people to their parents, friends, teachers, coworkers and doctors showing what life is like on the spectrum. It's also my love letter to autistic people. For too long, we have been forced to navigate a world where all the road signs are written in another language." With a reporter's eye and an insider's perspective, Eric Garcia shows what it's like to be autistic across America. Garcia began writing about autism because he was frustrated by the media's coverage of it; the myths that the disorder is caused by vaccines, the narrow portrayals of autistic people as white men working in Silicon Valley. His own life as an autistic person didn't look anything like that. He is Latino, a graduate of the University of North Carolina, and works as a journalist covering politics in Washington D.C. Garcia realized he needed to put into writing what so many autistic people have been saying for years; autism is a part of their identity, they don't need to be fixed. In We're Not Broken, Garcia uses his own life as a springboard to discuss the social and policy gaps that exist in supporting those on the spectrum. From education to healthcare, he explores how autistic people wrestle with systems that were not built with them in mind. At the same time, he shares the experiences of all types of autistic people, from those with higher support needs, to autistic people of color, to those in the LGBTQ community. In doing so, Garcia gives his community a platform to articulate their own needs, rather than having others speak for them, which has been the standard for far too long.

The hauntingly prophetic classic novel set in a not-too-distant future where books are burned by a special task force of firemen.

The Founder's Dilemmas examines how early decisions by entrepreneurs can make or break a startup and its team. Drawing on a decade of research, including quantitative data on almost ten thousand founders as well as inside stories of founders like Evan Williams of Twitter and Tim Westergren of Pandora, Noam Wasserman reveals the common pitfalls founders face and how to avoid them.

If you have ADHD, your brain doesn't work in the same way as a "normal" or neurotypical brain does because it's wired differently. You and others may see this difference in circuitry as somehow wrong or incomplete. It isn't. It does present you with significant challenges like time management, organization skills, forgetfulness, trouble completing tasks, mood swings, and relationship problems. In Your Brain's Not Broken, Dr. Tamara Rosier explains how ADHD affects every aspect of your life. You'll finally understand why you think, feel, and act the way you do. Dr. Rosier applies her years of coaching others to offer you the critical practical tools that can dramatically improve your life and relationships. Anyone with ADHD--as well as anyone who lives with or loves someone with ADHD--will find here a compassionate, encouraging guide to living well and with hope.

INSTANT NEW YORK TIMES BESTSELLER The #1 New York Times bestselling author of It Ends with Us—whose writing is “emotionally wrenching and utterly original” (Sara Shepard, New York Times bestselling author of the Pretty Little Liars series)—delivers a tour de force novel about a troubled marriage and the one old forgotten promise that might be able to save it. Quinn and Graham’s perfect love is threatened by their imperfect marriage. The memories, mistakes, and secrets that they have built up over the years are now tearing them apart. The one thing that could save them might also be the very thing that pushes their marriage beyond the point of repair. All Your Perfects is a profound novel about a damaged couple whose potential future hinges on promises made in the past. This is a heartbreaking page-turner that asks: Can a resounding love with a perfect beginning survive a lifetime between two imperfect people?

From one of the sharpest Christian voices of her generation and host of the podcast Relatable comes a framework for escaping our culture of trendy narcissism—and embracing God instead. We're told that the key to happiness is self-love. Instagram influencers, mommy bloggers, self-help gurus, and even Christian teachers promise that if we learn to love ourselves, we'll be successful, secure, and complete. But the promise doesn't deliver. Instead of feeling fulfilled, our pursuit of self-love traps us in an exhausting cycle: as we strive for self-acceptance, we become addicted to self-improvement. The truth is we can't find satisfaction inside ourselves because we are the problem. We struggle with feelings of inadequacy because we are inadequate. Alone, we are not good enough, smart enough, or beautiful enough. We're not enough--period. And that's okay, because God is. The answer to our insufficiency and insecurity isn't self-love, but God's love. In Jesus, we're offered a way out of our toxic culture of self-love and into a joyful life of relying on him for wisdom, satisfaction, and purpose. We don't have to wonder what it's all about anymore. This is it. This book isn't about battling your not-enoughness; it's about embracing it. Allie Beth Stuckey, a Christian, conservative new mom, found herself at the dead end of self-love, and she wants to help you combat the false teachings and self-destructive mindsets that got her there. In this book, she uncovers the myths popularized by our self-obsessed culture, reveals where they manifest in politics and the church, and dismantles them with biblical truth and practical wisdom.

Do you believe Chicago is broke? Me, neither. I set out to prove by assembling a great team of Chicago experts to write short articles on how can can save and generate MAJOR revenues for Chicago. Revenues that are progressive, sustainable and NOT wrung from those who can least afford to pay. Our goal is to influence the discussions around Chicago's budget and her future. All the details are at www.wearenotbroke.org. I published this via the CivicLab (which I co-founded in 2013) in the Summer of 2016. Since then we've been invited to present at 65 public meetings all over the city! "Tom Tresser's latest book is essential reading for all who have an interest and investment in the future of our city, from City Hall to the residents of each of Chicago's 77 neighborhoods. This book offers solutions, not only for the city to dig itself out from where it is, but for taxpayers, legislators, and concerned Chicagoans, to learn about the financial state of the city, and provides a progressive and responsible path forward." - Cook County Clerk David Orr "There are only a few people courageous enough to sift through the lies and tangled webs that proves Chicago isn't broke, but the politics are. Most people won't take the time to do the research, but Tom Tresser and his team have and this book should be on your list." - Karen Lewis, President, Chicago Teachers Union

Escaping the Toxic Culture of Self-Love

You're Broke Because You Want to Be

What is "woke" and how can a business be it? How can you avoid a mistake that could get you "cancelled"? Alison Tedford developed a program that is social justice education for business owners that explains how to create diversity statements, content plans for ongoing social justice topics and moderating online communities to let important conversations take place (and what to do when it looks like you might get "cancelled"). What she found on the heels of George Floyd's murder was business owners didn't know how to sell with sensitivity, they didn't know how to share where they stood on social justice issues with their audiences and they didn't know what their audience wanted from them. They didn't want to say the wrong thing. With more big brands weighing in through their advertising and content, small business owners wanted to learn how to dip their toes in the water of inclusive marketing. Tedford spent over a decade doing cross cultural communication and education and she approaches social justice from an Indigenous perspective. She has contributed to culturally responsive programming and policy as well as equity and inclusion planning at the federal government level.

Now in paperback: The New York Times bestselling author and star of A&E's reality series Big Spender, Larry Winget, cleans up America's personal finance crisis More than 40 percent of families today are feeling financial pressure: spending more than they earn, and worrying about retiring and being dependent on the government, family, or charity. Larry Winget knows. He grew up poor, then made and lost a fortune when a business in which he'd invested went bankrupt. But he worked his way back from rock bottom to become a multimillionaire. In You're Broke Because You Want to Be, Winget expands

- Feel bad. Have remorse. You need to feel deep emotion to take action. So start crying and take responsibility.
- Figure out who you owe and how much you owe. It'll be a scary number to face, but you need to know where you are and what you have.
- ?People are stupid, lazy, or they don't give a damn.? You already know you need to do something; Larry will help you finally do something.
- Are you more interested in looking cool and being cute or providing a financially secure future for your family? How you spend your money will tell you that.

With a boot-camp regimen that is steeped in personal accountability, Winget cuts through the double-talk contained in most finance books and presents a simple, guided program that is sure to motivate anyone out of their money problems.

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In The Psychology of Money, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. " Some of the key concepts discerned in the study, " comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people. " Perhaps, but who can afford to ignore these findings?

The New York Times bestselling financial guide aimed squarely at "Generation Debt"—and their parents—from the country's most trusted and dynamic source on money matters. The Money Book for the Young, Fabulous & Broke is financial expert Suze Orman's answer to a generation's cry for help. They're called "Generation Debt" and "Generation Broke" by the media — people in their twenties and thirties who graduate college with a mountain of student loan debt and are stuck with one of the weakest job markets in recent history. The goals of their parents' generation — buy a house, support a family, send kids to college, retire in style — seem absurdly, depressingly out of reach. They live off their credit cards, may or may not have health insurance, and come up so far short at the end of the month that the idea of saving money is a joke. This generation has it tough, without a doubt, but they're also painfully aware of the urgent need to take matters into their own hands. The Money Book was written to address the specific financial reality that faces young people today and offers a set of real, not impossible solutions to the problems at hand and the problems ahead. Concisely, pragmatically, and without a whiff of condescension, Suze Orman tells her young, fabulous & broke readers precisely what actions to take and why. Throughout these pages, there are icons that direct readers to a special YF&B domain on Suze's website that offers more specialized information, forms, and interactive tools that further customize the information in the book. Her advice at times bucks conventional wisdom (did she just say use your credit card?) and may even seem counter-intuitive (pay into a retirement fund even though your credit card debt is killing you?), but it's her honesty, understanding, and uncanny ability to anticipate the needs of her readers that has made her the most trusted financial expert of her day. Over the course of ten chapters that can be consulted methodically, step-by-step or on a strictly need-to-know basis, Suze takes the reader past broke to a secure place where they'll never have to worry about revisiting broke again. And she begins the journey with a bit of overwhelmingly good news (yes, there really is good news): Young people have the greatest asset of all on their side — time.

A tiny American town's plans for radical self-government overlooked one hairy detail: no one told the bears. Once upon a time, a group of libertarians got together and hatched the Free Town Project, a plan to take over an American town and completely eliminate its government. In 2004, they set their sights on Grafton, NH, a barely populated settlement with one paved road. When they descended on Grafton, public funding for pretty much everything shrank: the fire department, the library, the schoolhouse. State and federal laws became meek suggestions, scarcely heard in the town's thick wilderness. The anything-goes atmosphere soon caught the attention of Grafton's neighbors: the bears. Freedom-loving citizens ignored hunting laws and regulations on food disposal. They built a tent city in an effort to get off the grid. The bears smelled food and opportunity. A Libertarian Walks Into a Bear is the sometimes funny, sometimes terrifying tale of what happens when a government disappears into the woods. Complete with gunplay, adventure, and backstabbing politicians, this is the ultimate story of a quintessential American experiment -- to live free or die, perhaps from a bear.
